## 1 Introduction

#### 1.1 The Quality of Government Institute

The QoG Institute was founded in 2004 by Professor Bo Rothstein and Professor Sören Holmberg. It is an independent research institute within the Department of Political Science at the University of Gothenburg. The institute conducts research on the causes, consequences and nature of Good Governance and the Quality of Government (QoG) - that is, trustworthy, reliable, impartial, uncorrupted, and competent government institutions.

The main objective of the research is to address the theoretical and empirical problems of how political institutions of high quality can be created and maintained. A second objective is to study the effects of Quality of Government on a number of policy areas, such as health, environment, social policy, and poverty. While Quality of Government is the common intellectual focal point of the research institute, a variety of theoretical and methodological perspectives are applied.

### 1.2 The QoG Data

One aim of the QoG Institute is to make comparative data on QoG and its correlates publicly available. To accomplish this, we have compiled several datasets that draw on a number of freely available data sources, including aggregated individual-level data. The QoG datasets are available in several file formats, making them usable in most statistical softwares as well as in Excel.

The QoG Standard Dataset is our largest dataset consisting of more than 2,000 variables. For those who prefer a smaller dataset, we provide the QoG Basic Dataset, consisting of approximately the 300 most used variables from the QoG Standard Dataset. We also provide a dataset called the QoG OECD Dataset which covers OECD member countries and has high data coverage in terms of geography and time.

The Standard, Basic, and OECD datasets are all available in both time-series (TS) and crosssectional (CS) versions, as separate datasets. In the TS datasets, the unit of analysis is country-year (e.g. Sweden-1984, Sweden-1985 and so on). The CS datasets, unlike the TS datasets, do not include multiple years for a particular country, therefore, the unit of analysis is country. Although, many of the variables are available in both TS and CS, some variables are not, so it is advisable to use the codebook to see which variables are included. Each variable entry in this codebook specifies in which dataset you will find the variable.

The variables in the Standard, Basic, and OECD datasets are categorized in 19 thematic categories. This categorization should be seen as a guideline rather than a definite classification. Most variables belong only to one category, but some variables belong to more than one category.

On the QoG website, we also provide three additional datasets. The QoG Expert Survey (2014), the QoG EU Regional Dataset (2010 & 2013) and the QoG EQI Dataset (2017). The QoG Expert Survey is a dataset based on a survey among experts on public administration around the world. The data is available in an individual dataset and an aggregated dataset. The QoG EU Regional dataset is a dataset consisting of approximately 450 variables covering three levels of European regions. The EQI dataset is based on a survey among 34,000 respondents and concerns corruption on a regional level within the EU (NUTS 2).

Previous versions of all our datasets are available in the Data Archive on the QoG website: http://qog.pol.gu.se/data/datadownloads/data-archive

#### 1.3 QoG Standard Dataset

#### 1.3.1 Cross-Sectional (CS)

In the QoG Standard CS dataset, data from and around 2015 is included. Data from 2015 is prioritized, however, if no data are available for a country for 2015, data for 2016 is included. If no data for 2016 exists, data for 2014 is included, and so on up to a maximum of +/-3 years.

While this works fine for some variables, it does not for others. For GDP growth it might be far from ideal to use figures from the following or previous year, whereas it might be more or less unproblematic for bureaucratic structures, which are more stable and fluctuate less. We advise you to carefully read the codebook and use your own judgment when using the CS dataset.

In the description of each variable in this codebook, there are basic descriptive statistics (minimum year, maximum year and number of countries [N]) and a map indicating the countries that have data for that specific variable in the CS dataset. If the variable is not included in the CS dataset, there is a text simply stating that this is the case. The maps in the codebook should not be confused for visualizations of the data itself; they are only visualizations of the data availability in the dataset.

#### 1.3.2 Time-Series (TS)

In the QoG Standard TS dataset, data from 1946 to 2018 are included and the unit of analysis is country-year (e.g. Sweden-1946, Sweden-1947 and so on).

As countries are not static phenomena, this has resulted in a number of what we call *historical* countries. Historical countries are in most cases denoted by a parenthesis, following the country name, and within the parenthesis we have added the to - date (e.g. Ethiopia [-1992]). Consequentially, the historical countries are often associated with a present-day version of the "same" country. These are also denoted by a parenthesis but within that parenthesis we have added the from - date (e.g. Ethiopia [1993-]). You will find more information on which countries this applies to, and our line of reasoning for each country, in the section on countries and time coverage.

We have decided not to include data that was available for a country before that country became independent according to our judgment. This is debatable; it might be argued that if an original source has included values, the values are correct and could be included. However, we have reasoned that if the datasets primarily are used in cross-country comparisons, all units should be independent countries and not, for example, semi-independent territories.

In each entry in this codebook there are basic descriptive statistics (minimum year, maximum year, number of countries [N], number of observations [n], average number of countries per year  $[\overline{N}]$  and average number of years per country  $[\overline{T}]$ ) and a bar graph indicating the number of countries with data available each year from 1946 to 2018. If the variable is not included in the TS dataset, there is a text simply stating that this is the case. The maps in the codebook should not be confused for visualizations of the data itself; they are only visualizations of the data availability in the datasets.

#### 1.3.3 Country and Time Coverage

When deciding which countries to include in the datasets, we have relied on the following reasoning: We have included current members of the United Nations (UN) as well as previous members, provided that their de facto sovereignty has not changed substantially since they were members; this means that we, for example, have included Taiwan.

Using UN membership to decide whether or not to include a country in the dataset works quite well for cases from around 1955. Afterwards, independent states, in general, joined the UN following independence. This leaves us with the question of what to do with countries that might be said to have been independent some time during the period from 1946 to around 1955, but were not independent after that period (such as Tibet). We have decided to include data for Tibet from 1946 to 1950, making it possible for users to decide for themselves whether to include Tibet in their analysis or not. It is worth noting that we do not use the date on which a country gained membership to the UN to decide when a country came into being. All in all, this means that we have 194 countries included in the cross-sectional dataset.

In the time-series dataset, we include the same 194 countries, plus an additional 17 historical countries that did not exist in 2014: Tibet, Pakistan pre-1971 (including East Pakistan, presently Bangladesh), North and South Vietnam, North and South Yemen, East and West Germany, Yugoslavia pre-1992 (the Peoples Republic of Yugoslavia), Serbia and Montenegro, the USSR, Czechoslovakia, Ethiopia pre-1993 (including Eritrea), France pre-1962 (including Algeria), Malaysia pre-1965

(including Singapore), Cyprus pre-1974 (including the later Turkish-occupied North Cyprus) and Sudan pre-2012 (including South Sudan). This makes a total of 211 countries. In the Appendix we have included the full list of countries and a short note on how we have reasoned for each country.

Unfortunately, no established international standard exists on how historical cases, resulting either from country mergers or country splits, should be treated in a time-series setting. We have applied the following principles:

After a merger of two countries, the new country is considered a new case, even when the new state formed could be considered a continuation of one of the merged states. This rule applies to: (1) Vietnam, which merged North and South Vietnam in 1976; (2) Yemen, which merged North and South Yemen in 1990: and (3) Germany, which merged East and West Germany in 1990.

If a country has split, the new countries are considered new cases, even when one of the new states could be considered a continuation of the state that split. This rule applies to: (1) Pakistan, which split into Pakistan and Bangladesh in 1971; (2) the USSR, which split into 15 Post-Soviet countries in 1991; (3) Yugoslavia, which split into Slovenia, Croatia, Bosnia and Herzegovina, Macedonia, and Serbia and Montenegro from 1991 onwards; (4) Czechoslovakia, which was split into the Czech Republic and Slovakia in 1993; (5) France, which split into France and Algeria in 1962; (6) Malaysia, which split into Malaysia and Singapore in 1965; (7) Cyprus, which was occupied by Turkey in 1974, effectively splitting the country into Cyprus and the internationally unrecognized Northern Cyprus; and (8) Ethiopia, which split into Ethiopia and Eritrea in 1993. There is one exception to this rule: Indonesia is considered a continuation of the country that existed before the independence of Timor-Leste in 2002 (while Timor-Leste is considered a new country).

Since most of the original data sources treat these cases of country mergers and splits differently, we have rearranged data in accordance with our criteria above. Consequently, if a merger or a split has occurred and the data source does not treat the countries as different cases, we still consider them to be different cases.

To determine where to put the data for the year of the merger/split and when to include data for a newly independent country, we have relied on the July 1st-principle. If the merger/split or independence occurred after July 1st, the data for this year will belong to the historical country or it will not be included.

Thus, for example: If Germany in a data source is treated as a continuation of West Germany, we place data up to and including 1990 on West Germany and leave Germany blank until and including 1990, since the merger of Germany occurred in October 1990 (after July 1st, 1990). If, on the other hand, Serbia and Montenegro in a data source is treated as a continuation of Yugoslavia, we place the data up to and including 1991 on Yugoslavia and from 1992 and onward on Serbia and Montenegro (which is left blank until and including 1991), since the split occurred from June 1991-March 1992 (before July 1st, 1992).

Finally, Cyprus (1974-) denotes the Greek part of the island after the Turkish occupation. Most sources probably do the same with the data they refer to Cyprus, but the documentation of the original data rarely specifies this.

In 2018, we updated the name of Swaziland to Eswatini (former Swaziland); however, the other identification codes remain the same.

#### 1.3.4 Note for Stata/IC Users

The Stata/IC has a limitation of 2 047 variables. The QoG Standard datasets are larger, therefore users of the Stata/IC cannot use these datasets in its original form. If you have access to Stata/IC, you can open only those variables of the QoG Standard dataset that you need for studies.

First, you need to download the QoG Standard data file in .dta format to your computer. Then, open Stata/IC and write the following command in the command window and run it:

use list of variables using "C: Link to file filename.dta"

list of variables can be any of the following:

- list of all variable names (e.g. aid\_cpnc fh\_status vi\_ext) that you need
- the prefixes of the data sources (e.g. bl\_\*, ciri\_\*) to open all variables from one or several data sources
- a range of variables (e.g. aid cpnc-vi ext).

Note: A list of the prefixes and variable names are presented in the codebook. We recommend that you always add and open the identification variables: cname, ccode and year (for time-series).

#### 1.3.5 A brief note on the QoG Standard 2019 update

To improve consistency and compatibility of statistical data related to QoG, we continuously work to improve the coverage and data quality. For the 2019 update of the QoG Standard Dataset, we have included seven new data sources that previously were not part of the QoG datasets. Some examples are:

- Africa Integrity Indicators (Global Integrity, 2018). It assesses key social, economic, political and anti-corruption mechanisms at the national level in all 54 African countries.
- The ATOP State-Year dataset (Alliance Treaty Obligations and Provisions Project, 2002). It provides data regarding the content of military alliance agreements signed by all countries of the world between 1815 and 2016.
- Comparative Abortion Index (Forman and Sommer, 2018). It provides data about the permissiveness of abortion policies worldwide.
- Ease of Doing Business (Ease of Doing Business Report, 2018). It provides objective measures of business regulations and their enforcement across 190 economies.
- The Gender Inequality Index (UNDP, 2018). It reflects gender-based disadvantage in three dimensions reproductive health, empowerment and the labour market.
- Human Understanding Measured Across National (HUMAN) Surveys (Klassen, 2018). It combines multiple sources of public opinion data and creates commonly formatted variables.
- Societal Violence Scale (The Political Terror Scale Project, 2016). It seeks to develop measures of societal violence based on annual US State DepartmentâĂŹs Human Rights reports.
- Worldwide Bureaucracy Indicators (The World Bank Group, 2018). A dataset on public sector employment and wages.
- World Income Inequality Database (UNU-WIDER, 2018). It has information on income inequality for 182 countries.

## 1.4 Thematic Categories

### 1.4.1 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

### 1.4.2 Civil Society/Population/Culture

This category includes variables that relate to social capital, personal beliefs, size and distribution of the population as well as ethnic and linguistic fractionalization.

### 1.4.3 Conflict

This category includes variables concerning armed conflict, including civil war and terrorism, government revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

### 1.4.4 Education

This category includes a variety of indicators related to education, such as key characteristics of the educational system (public expenditure, gross enrollment, number of teachers), the students (age, gender, educational level), and educational outcomes (mean scores, literacy rates, numbers of researchers and scientists).

### 1.4.5 Energy and Infrastructure

This category includes indicators that cover descriptions of different energy sources (production, consumption and trade) and variables related to quality and quantity of different sectors of infrastructure (transportation and communication).

#### 1.4.6 Environment

This category includes geographical characteristics such as the geographical region, land area etc. as well as indicators describing the state of the environment, ecosystems and materials, the impact of human beings on the environment, and environmental protection.

## 1.4.7 Gender Equality

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

#### 1.4.8 Health

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

## 1.4.9 History

This category includes variables related to historical phenomena or situations, for example colonial origin, legal origin and GDP/capita in the year 1500.

#### 1.4.10 Judicial

This category includes judicial indicators, generally covering legal rights granted by a state to its citizens and their compliance, as well as measures of crimes and the overall state of the judicial system.

### 1.4.11 Labour Market

This category includes variables about employment, unemployment and union density rate, in general, as well as in subgroups of the population.

## 1.4.12 Media

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

## 1.4.13 Migration

This category includes indicators related to migratory phenomena such as immigration rates, level of education, brain drain, and refugee population.

## 1.4.14 Political Parties and Elections

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

## 1.4.15 Political System

This category includes variables describing the rules of the political system (presidential or parliamentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

### 1.4.16 Public Economy

This category includes economic indicators that reflect the involvement of the government in the economy (taxes, tariff rates and government expenditures), economic key figures of a state (GDP, inflation, and economic inequality), and indicators that characterize the state of the economy (aid-flows, debt).

#### 1.4.17 Private Economy

This category includes variables characterizing the private sector in a country, inter alia: regulation of the private sector, indicators concerning economic characteristics of groups in the society, such as poverty and household consumption, as well as tax rates.

## 1.4.18 Religion

This category includes variables regarding numbers of followers of specific religions and the status of religion in the constitution.

## 1.4.19 Welfare

This category includes indicators on government expenditure related to social welfare (pension, sickness coverage and accidents coverage).

## 2 List of Variables by Categories

# 3 Identification Variables

#### 3.0.1 ccode Country Code

Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging files (in combination with year for time-series data). (http://en.wikipedia.org/wiki/ISO\_3166-1\_numeric)

#### 3.0.2 ccodealp 3-letter Country Code

A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

#### 3.0.3 ccodealp\_year 3-letter Country Code and Year

A three-letter country code and year.

#### 3.0.4 ccodecow Country Code COW

Country code from the Correlates of War.

#### 3.0.5 ccodewb Country Code World Bank

Country code from the World Bank.

#### 3.0.6 cname Country Name

The name of the country.

#### 3.0.7 cname\_year Country Name and Year

Country name and year.

#### 3.0.8 version Version of the Dataset

Version of the QoG dataset.

3.0.9 year Year

Year.

## 4 Description of Variables by Original Data Sources

#### 4.1 AidData

http://aiddata.org/aiddata-research-releases (Tierney et al., 2011) (AidData, 2017) (Data downloaded: 2018-09-11)

#### AidData v. 3.1

AidData's Core Research Release 3.1 is a corrected snapshot of AidData's entire project-level database from April 2016. This database includes commitment information for over 1.5 million development finance activities funded between 1947 and 2013.

Note: The observations with year=9999 has been dropped.

# 4.1.1 aid\_cpnc Number of Recipients to whom Commitments were provided (not incl. Int. Org.)

Number of Recipients to whom Commitments were provided, not including International Organizations

#### 4.1.2 aid cpsc Sum of Commitments provided to Recipients (not incl. Int. Org.)

Sum of Commitments provided to Recipients, not including International Organizations

# 4.1.3 aid\_crnc Number of Donors from whom Commitments were recieved (not incl. Int. Org.)

Number of Donors from whom Commitments were recieved, not including International Organizations

Min. Year:1962 Max. Year: 2013 N: 198 n: 5775  $\overline{N}$ : 111  $\overline{T}$ : 29

#### 4.1.4 aid crnio Number of Int. Org. from whom Commitments were recieved

Number of International Organizations from whom Commitments were recieved

4.1.5 aid\_crsc Sum of Commitments recieved from Donors (not incl. Int. Org.)

Sum of Commitments recieved from Donors, not including International Organizations

Mm. Year:2013 Max. Year: 2013 N: 139

Min. Year:1962 Max. Year: 2013 N: 198 n: 5775  $\overline{N}$ : 111  $\overline{T}$ : 29

#### 4.1.6 aid\_crsio Sum of Commitments recieved from Int. Org.

Sum of Commitments recieved from International Organizations

Min. Year:1947 Max. Year: 2013 N: 197 n: 6231  $\overline{N}$ : 93  $\overline{T}$ : 32

#### 4.2 Global Integrity

https://aii.globalintegrity.org/scores-map?stringId=transparency\_accountability&year= 2018 (Global Integrity, 2018)

(Data downloaded: 2018-10-23)

#### Africa Integrity Indicators

The Africa Integrity Indicators (AII) assesses key social, economic, political and anti-corruption mechanisms at the national level in all 54 African countries in two sections: Transparency and Accountability, and Social Development. The Africa Integrity Indicators are scored by in-country researchers following an evidence-based investigation methodology. The resultant data points are then reviewed blindly by a panel of peer reviewers, drawing on the expertise of a mix of in-country experts as well as outside experts.

The Transparency and Accountability indicator is made of sub-indicators in the following categories: rule of law, accountability, elections, public management, civil service integrity, access to information
and openness, and social development.

For this version of the QoG Datasets, we have decided to only include the scores for the broader components of Transparency and Accountability, given that the Social Development Indicators are already represented by the Mo Ibrahim Foundation's Index of African Governance.

### 4.2.1 aii acc Accountability sub-index

Accountability. This sub index from 0 to 100 is composed of:

- 1. In law, the independence of the judiciary is guaranteed.
- 2. In practice, the independence of the judiciary is guaranteed.

3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.

- 4. In practice, national-level judges give reasons for their decisions/judgments.
- 5. In law, there is a supreme audit institution.
- 6. In law, the independence of the supreme audit institution is guaranteed.
- 7. In practice, the independence of the supreme audit institution is guaranteed.
- 8. In practice, appointments to the supreme audit institution support the independence of the agency.
- 9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

### 4.2.2 aii aio Access to Information and Openness sub-index

Access to Information and Openness. This sub index from 0 to 100 is composed of:

10. In law, corruption is criminalized as a specific offense.

11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.

12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.

13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.

14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.

15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.

16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.

17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.

18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year: 2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

#### aii cilser Civil Service Integrity sub-index 4.2.3

Civil Service Integrity. This sub index from 0 to 100 is composed of:

19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.

20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.

21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.

22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.

23. In practice, candidates/political parties have equitable access to state-owned media outlets.

#### 4.2.4aii elec Elections sub-index

Elections. This sub index from 0 to 100 is composed of:

24. In law, major public procurements require competitive bidding.

25. In practice, major public procurements involve competitive bidding.

26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).

27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.

28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids.

29. In practice, citizens can access the financial records of state-owned companies.

30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.

31. In practice, significant public expenditure receives legislative approval on an annual basis.

32. In law, both the executive's budget proposal and the approved budget must be published in full every year.

33. In practice, a legislative committee exercises oversight of public funds.

**N**: 54 **n**: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

#### 4.2.5aii pubm Public management sub-index

Public Management. This sub index from 0 to 100 is composed of:

35. In law, civil servants are required to report cases of alleged corruption.

36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.

37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.

38. In practice, civil servants' work is not compromised by political interference.

39. In practice, civil servants are appointed and evaluated according to professional criteria.

40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

### 4.2.6 aii q01 Law: the independence of the judiciary is guaranteed

Sub-score (0-100). Question N 1. In law, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:

1) the law establishes that the judiciary is independent from the executive and legislative branches, and

2) the law establishes the judiciary's right, authority or mandate to review laws, issue judicial decisions, and choose the cases heard by courts.

A 0 score is earned where no such law exists, or a law exists but it does not include ALL of the elements described in 100.

### 4.2.7 aii q02 Practice: the independence of the judiciary is guaranteed

Sub-score (0-100). Question N 2. In practice, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:

1) judges have autonomy to interpret and review existing laws, legislation and policy, and

2) judges operate without fear or favor, independent from other branches of government.

A 50 score is earned where any of the following conditions apply:

1) judges' autonomy to interpret and review existing laws is occasionally restricted, or

2) judges are occasionally subject to negative or positive political incentives (for example, judges are demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

A 0 score is earned where at least one of the following conditions apply:

1) judges rarely have autonomy to interpret and review existing laws, legislation and policy, or 2) judges are routinely subject to negative or positive political incentives (for example, judges are frequently demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

### 4.2.8 aii q03 Practice: national-level judges support the independence of judiciary

Sub-score (0-100). Question N 3. In practice, national-level judges appointments (justices or magis-trates) support the independence of the judiciary.

A 100 score is earned where all the following conditions are met:

1) national-level judges are chosen through a merit-based selection system,

2) they have security of tenure, and

3) they are disciplined/removed/transferred only through due process by a peer panel/independent oversight body.

A 50 score is earned where any of the following conditions apply:

1) national-level judges are occasionally appointed without following a merit-based selection system,

2) some judges are denied security of tenure, or

3) occasionally judges are disciplined/removed/transferred without due process or the peer panel/independent oversight body occasionally includes representatives of the executive or legislative branches.

A 0 score is earned where at least one of the following conditions apply:

1) there's a merit-based selection system but it fails to require basic skills (ex. legal education, litigation experience, etc.) or is so weak that individuals with less merit are usually appointed over those with more merit,

2) there is no security of tenure, or

3) the due process usually involves the Executive or Legislative branches.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

### 4.2.9 aii q04 Practice: national-level judges give reasons for their decisions

Sub-score (0-100). Question N 4. In practice, national-level judges give reasons for their decisions/judgments.

A 100 score is earned where all the following conditions are met:

1) judges routinely provide formal reasoning for their rulings,

2) their reasoning references the laws/jurisprudence they considered and the specific interpretation they gave them in relation to the case, and

3) their reasoning is public (for this indicator, national security exceptions are allowed).

A 50 score is earned where any of the following conditions apply:

1) judges occasionally fail to provide formal reasoning for their decisions,

2) the reasoning occasionally lacks references to the laws/jurisprudence considered or the respective judges' interpretations, or

3) it takes more than two weeks for citizens to obtain the reasoning after requested.

A 0 score is earned where at least one of the following conditions apply:

1) judges rarely provide formal reasoning for their rulings, or

2) their reasoning rarely references the laws/juris prudence they considered and/or the specific interpretations they gave them in relation to the case, or

3) the reasoning is not public.

#### 4.2.10 aii q05 Law: there is a supreme audit institution

Sub-score (0-100). Question N 5. In law, there is a supreme audit institution.

A 100 score is earned where the law mandates the creation of a supreme audit institution or office of the Auditor General, tasked with auditing the government accounts. A 0 score is earned where no such law exists.

### 4.2.11 aii\_q06 Law: the independence of supreme audit institution is guaranteed

Sub-score (0-100). Question N 6. In law, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:

1) the law establishes that the audit institution is independent from the executive and legislative branches,

2) the institution has the right, authority or mandate to audit any government account, issue recommendations and resolutions, and refer cases to the prosecutor's office, and

3) the institution has a consistent source of funding to operate.

A 0 score is earned where no such law exists, or a law exists but it doesn't establish ALL of the conditions described in 100.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

### 4.2.12 aii\_q07 Practice: the independence of supreme audit institution is guaranteed

Sub-score (0-100). Question N 7. In practice, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:

- 1) auditors have autonomy to audit accounts,
- 2) auditors operate without fear or favor, independent from other offices of government, and
- 3) they have a predictable source of funding that is consistent from year to year.

A 50 score is earned where any of the following conditions apply:

1) auditors usually have autonomy to audit any account but exceptions exist,

2) auditors are occasionally subject to negative or positive political incentives (for example, auditors are demoted/promoted or relocated to worse/better offices in retaliation/reward for not auditing/not auditing or issuing favorable/unfavorable resolutions), or

3) funding is occasionally inconsistent.

A 0 score is earned where at least one of the following conditions apply:

- 1) auditors rarely have autonomy to audit accounts,
- 2) they routinely operate with fear or favor, dependent of other offices of government, or
- 3) the source of funding is usually inconsistent from year to year.

**N**: 54

### 4.2.13 aii q08 Practice: appointments to audit institution support agency's independ.

Sub-score (0-100). Question N 8. In practice, appointments to the supreme audit institution support the independence of the agency.

A 100 score is earned where all the following conditions are met:

1) appointments to positions in the agency follow a merit-based system,

2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and

3) auditors are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:

1) appointments don't always follow a merit-based system,

2) appointees sometimes have conflicts of interest, or

3) auditors are sometimes disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:

1) appointments to positions in the agency rarely or never follow a merit-based system, or the meritbase system is so weak that individuals with less merit are usually appointed over those with more merit,

2) appointees usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or

3) appointees are usually disciplined/removed/transferred without observing due process by a peer panel/oversight body.

### 4.2.14 aii q09 Practice: the supreme audit agency releases frequent reports

Sub-score (0-100). Question N 9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

A 100 score is earned where all the following conditions are met:

- 1) the agency in average publishes 10 reports or more per year, and
- 2) the reports are published less than one month after issuance, and
- 3) they are accessible online or on paper within two weeks of requested at photocopying cost.

A 50 score is earned where any of the following conditions apply:

1) the agency publishes between three and nine reports per year,

2) the reports are published more than one month after issued, or

3) they are available on paper but it takes more than two weeks after requested to obtain them or costs are higher than photocopying.

A 0 score is earned where at least one of the following conditions apply:

1) the audit institution publishes one or less reports per year, or

2) the reports are not available to citizens.

### 4.2.15 aii q10 Law: corruption is criminalized as a specific offense

Sub-score (0-100). Question N 10. In law, corruption is criminalized as a specific offense.

A 100 score is earned where a national law criminalizes corruption as a specific offence(s) for at least three of the following: extortion, offering a bribe, accepting a bribe, kickbacks, using public resources for private gain, using confidential state information for private gain, money laundering, conspiring or attempting to commit any of the above, organized crime and trafficking.

A 0 score is earned where no such law exists, or a law exists but it alludes to corruption in general terms without criminalizing specific offences.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

### 4.2.16 aii q11 Law: there are indep. bodies to investigate cases of pubsec. corruption

Sub-score (0-100). Question N 11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.

A 100 score is earned where all of the following conditions are met:

1) a law mandates a specific body to receive and investigate citizens' allegations of public sector corruption, and

2) a law establishes that the body is independent from the Executive and Legislative branches.

A 0 score is earned where no such law exists, or a law exists but it doesn't meet the two conditions described in 100.

#### 4.2.17 aii q12 Practice: corruption allegations are investigated by independent body

Sub-score (0-100). Question N 12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.

A 100 score is earned where all the following conditions are met:

1) allegations against senior level politicians and/or civil servants of any level are investigated, and 2) the members of the body mandated to investigate the allegations work without fear or favor from other offices.

A 50 score is earned where any of the following conditions apply:

1) not all allegations against senior level politicians and/or civil servants of any level are investigated, or

2) the members of the body mandated to investigate the allegations are occasionally subjected to positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

A 0 score is earned where at least one of the following conditions apply:

1) allegations against senior level politicians and/or civil servants of any level are rarely or never investigated, or

2) the members of the body mandated to investigate the allegations routinely receive positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

### 4.2.18 aii\_q13 Practice: bodies investigating pubsector corruption allegations are effective

Sub-score (0-100). Question N 13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.

A 100 score is earned where all the following conditions are met:

1) the body has a functioning system in place to receive citizens' allegations of public sector corruption,

- 2) it investigates most of the allegations within three months of being reported, and
- 3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:

- 1) the system to receive citizens' allegations may not work for several days at a time,
- 2) not all cases reported are investigated or investigations take more than three months to start, or
- 3) the body rarely or never starts investigations out of its own initiative.

A 0 score is earned where at least one of the following conditions apply:

- 1) there's no system to receive citizens' allegations, or
- 2) cases reported are rarely or never investigated.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

## 4.2.19 aii\_q14 Practice: appointees to bodies investigating pubsec corruption support independ.

Sub-score (0-100). Question N 14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.

A 100 score is earned where all the following conditions are met:

1) appointments follow a merit-based system,

2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and

3) appointees are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:

1) appointments don't always follow the merit-based system,

2) appointees occasionally have conflicts of interest, or

3) appointees are occasionally disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:

1) appointments to positions in the body rarely follow a merit-based system,

2) individuals appointed usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or

3) due process by a peer panel/oversight body is rarely or never followed to discipline/remove/transfer the appointees.

## 4.2.20 aii\_q15 Law: head of state and gov. can be investigated and prosecuted while in office

Sub-score (0-100). Question N 15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.

A 100 score is earned where the law doesn't protect the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime. A 0 score is earned where a law protects/gives immunity to the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.

### 4.2.21 aii\_q16 Practice: head of state and gov. can investigated and prosecuted while in office

Sub-score (0-100). Question N 16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.

A 100 score is earned where all the following conditions are met:

1) criminal allegations against heads of state and government are investigated while they are in office, 2) heads of state and government are prosecuted when investigations find evidence of possible wrong-

doing, and

3) legal punishment is imposed if/when they are found guilty.

A 50 score is earned where any of the following conditions apply:

1) not all allegations are investigated while they are in office,

2) not all investigations that find evidence of criminal activity result in prosecution, or

3) not all guilty verdicts result in legal punishment.

A 0 score is earned where at least one of the following conditions apply:

1) allegations against heads of state and government are rarely investigated while they are in office,

- 2) criminal evidence rarely results in prosecution, or
- 3) guilty verdicts rarely result in legal punishment.

A 0 also applies if the heads of state and government have immunity, therefore making it impossible in practice to investigate, prosecute or punish them.

### 4.2.22 aii\_q17 Law: there are mechanisms for citizens to report police force misconduct/abuse

Sub-score (0-100). Question N 17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.

A 100 score is earned where a law establishes the existence of an oversight body/entity specifically mandated to investigate police misconduct or abuse of force.

A 0 score is earned when no such law exists.

### 4.2.23 aii\_q18 Practice: mechanisms for citizens to report police misconduct/abuse are effect.

Sub-score (0-100). Question N 18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

A 100 score is earned where all the following conditions are met:

1) the body has a functioning system in place to receive citizens' allegations of police misconduct or abuse of force,

2) it investigates most of the allegations within one week of being reported, and

3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:

- 1) the system to receive citizens' allegations may not work for several days at a time,
- 2) not all cases reported are investigated or investigations take more than one week to start, or
- 3) none or only a minority of the investigations are self-started by the body.

A 0 score is earned where at least one of the following conditions are met:

- 1) there's no system to receive citizens' allegations, or
- 2) cases reported are rarely investigated.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

#### aii q19 Law: independence of agencies that organize & monitor elections is 4.2.24guaranteed

Sub-score (0-100). Question N 19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.

A 100 score is earned where all the following conditions are met:

1) the law establishes that the agency(ies) mandated to organize and monitor national elections is independent from the Executive, Legislative and Judicial branches, and

2) it establishes its right, authority or mandate to review elections, issue binding decisions, and choose the cases to be heard by the agency(ies).

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100.

#### aii q20 Practice: appointees to agencies organizing elections support agencies' 4.2.25independ

Sub-score (0-100). Question N 20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.

A 100 score is earned where electoral officials are always chosen through merit-selection systems.

A 50 score is earned where electoral officials are generally chosen through merit-selection systems, but there are exceptions (for ex. sometimes candidates with less merit are selected over those with more merit).

A 0 score is earned where electoral officials are rarely chosen through merit-selection systems, or the selection system is so weak it can't guarantee candidates are appointed based on merit (for ex. no legal education is required, the President has discretion to decide who the top candidates are, etc.).

**N**: 54 **n**: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

#### 4.2.26aii q21 Practice: agencies that organize elections are protected from pol. interference

Sub-score (0-100). Question N 21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.

A 100 score is earned where all the following conditions are met:

1) appointees are disciplined/removed only through due process by a peer panel/oversight body, and

2) appointees are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:

1) appointees are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or

2) appointees are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:

1) appointees are usually disciplined/removed without following due process, or the due process is so weak it doesn't support independence (for ex. members of the Executive or Legislative branches are part of the panel that conducts the due process), or

2) appointees are usually removed when a new administration takes power.

### 4.2.27 aii q22 Practice: reports before after a national election are publicly available

Sub-score (0-100). Question N 22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.

A 100 score is earned where all the following conditions are met:

1) the agency/agencies publish/es at least one report before the election and one report after the election, and

2) the publications are easily accessible to citizens less than one month after issuance online or at cost of photocopying.

A 50 score is earned where any of the following conditions apply:

1) the agency only publishes one report before or after the election, or

2) the publication is generally accessible to citizens but published more than one month after issued or the cost is higher than photocopying.

A 0 score is earned where no reports about the elections are published or reports are not available to the public.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

## 4.2.28 aii\_q23 Practice: candidates/pol. parties have fair access to state-owned media outlets

Sub-score (0-100). Question N 23. In practice, candidates/political parties have equitable access to state-owned media outlets.

A 100 score is earned where all the following conditions are met:

1) candidates/political parties have equal access to and receive fair treatment in state-owned media outlets,

2) access is equal in both news reports and editorial commentary, and

3) candidates/political parties are offered the same rates for campaign advertising.

A 50 score is earned where any of the following conditions apply:

1) some candidates/political parties occasionally have more access to and receive better treatment in state-owned media outlets,

2) access is occasionally unequal in either news reports or editorial commentary, or

3) occasionally a candidate/political party is offered better rates for campaign advertising.

A 0 score is earned where at least one of the following conditions apply:

1) some candidates/political parties usually have more access to and/or receive better treatment in state-owned media outlets,

2) access is usually unequal in both news reports or editorial commentary, or

3) some candidates/political parties are usually offered better rates for campaign advertising.

#### 4.2.29 aii q24 Law: major public procurements require competitive bidding

Sub-score (0-100). Question N 24. In law, major public procurements require competitive bidding.

A 100 score is earned where all major procurements are required by law to follow competitive bidding.

A 0 score is earned where no such law exists.

### 4.2.30 aii q25 Practice: major public procurements involve competitive bidding

Sub-score (0-100). Question N 25. In practice, major public procurements involve competitive bidding.

A 100 score is earned where all the following conditions are met:

1) bids from competing contractors, suppliers, or vendors are invited through open advertising of the scope, specifications, and terms of the proposed contract, and

2) the criteria by which the bids are evaluated is available for scrutiny.

A 50 score is earned where any of the following conditions apply:

1) bids from competing contractors, suppliers, or vendors are invited though open advertising, but the advertising doesn't leave much time for bidders to prepare their offers or it lacks basic components (scope, specifications, or terms of the proposed contract), or

2) the criteria by which the bids are evaluated is not readily available for scrutiny.

A 0 score is earned where at least one of the following conditions apply:

1) bids from competing contractors, suppliers, or vendors are rarely or never invited through open

advertising of the scope, specifications, and terms of the proposed contract, or 2) the criteria by which the bids are to be evaluated is rarely available for scrutiny.

## 4.2.31 aii\_q26 Practice: citizens can access results & procurement contracts related documents

Sub-score (0-100). Question N 26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).

A 100 score is earned where all the following conditions are met:

1) there is an archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, and

2) full records are readily available on or off line for scrutiny by journalists, auditors, competitors and any citizen who request them.

A 50 score is earned where any of the following conditions apply:

1) there is an archive but it doesn't contain complete records of all procurement contracts, whether in a central government office or at each contracting institution, and

2) full records are not readily available on/off line for scrutiny by journalists, auditors, competing contractors and any citizen who request them.

A 0 score is earned where at least one of the following conditions apply:

1) there's no archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, or

2) full records are rarely or never available on/off line for scrutiny by journalists, auditors, competitors or any citizen who request them.

Min. Year:2015 Max. Year: 2015 N: 54

## 4.2.32 aii\_q27 Law: companies guilty of procurement violations can't participate in future bid

Sub-score (0-100). Question N 27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.

A 100 score is earned where the law forbids companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) from participating in future bidding in the country, whether indefinitely or for a limited period of time.

A 0 score is earned where no such law exists.

## 4.2.33 aii\_q28 Practice: companies guilty of violations cannot participate in future bids

Sub-score (0-100). Question N 28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids

A 100 score is earned where all the following conditions are met:

1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are forbidden from participating in future bidding in the country, whether indefinitely or for a limited period of time, and

2) there is a registry of companies forbidden from bidding that citizens can access immediately or in less than two weeks upon request. A 100 is also earned if there is a registry in place that at the time of this research is empty because no company has violated the law.

A 50 score is earned where any of the following conditions apply:

1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are generally forbidden from participating in future bidding, but there is evidence that some exceptions exist, or

2) citizen access to the full list of companies forbidden from participating takes more than two weeks.

A 0 score is earned where at least one of the following conditions apply:

1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are rarely forbidden from participating in future bidding, or

2) there is no registry of companies forbidden from participating or it exists but it's not public.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

### 4.2.34 aii\_q29 Practice: citizens can access the financial records of state-owned companies

Sub-score (0-100). Question N 29. In practice, citizens can access the financial records of state-owned companies.

A 100 score is earned where all the following conditions are met:

1) financial records of state-owned companies are available on/offline to journalists, auditors and citizens at least quarterly, and

2) the records can be obtained immediately for free online or on paper in less than two weeks of requested at cost of photocopying.

A 50 score is earned where any of the following conditions apply:

1) financial records of state-owned companies are available less than quarterly, or

2) obtaining the records takes two weeks to a month, or costs are higher than photocopying.

A 0 score is earned where financial records of state-owned companies are rarely available to the public or don't exist.

## 4.2.35 aii\_q30 Practice: citizens can access natural resources exploitation financial records

Sub-score (0-100). Question N 30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.

A 100 score is earned where all the following conditions are met:

1) financial records associated with natural resource projects are available on/offline to journalists, auditors and citizens at least quarterly, and

2) the records can be obtained immediately for free online or on paper in less than two weeks of requested at cost of photocopying.

A 50 score is earned where any of the following conditions apply:

1) financial records associated with natural resource projects are available less than quarterly, or

2) obtaining the records occasionally takes more than two weeks of requested, or costs are higher than photocopying.

A 0 score is earned where financial records associated with natural resource projects are rarely available to the public or don't exist.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

### 4.2.36 aii\_q31 Practice: significant public expenditure receives legislative approval yearly

Sub-score (0-100). Question N 31. In practice, significant public expenditure receives legislative approval on an annual basis.

A 100 score is earned where all the following conditions are met:

1) all significant government expenditure is approved by the legislature on an annual basis in open hearings, and

2) the legislature makes in-year budget amendments to the government proposed budget.

A 100 score is earned even if defense expenditure is approved in closed hearings.

A 50 score is earned where any of the following conditions apply:

1) not all significant government expenditure is approved annually by the legislature or it's not approved in open hearings, or

2) the legislature occasionally doesn't approve in-year budget amendments.

A 0 score is earned where at least one of the following conditions applies:

- 1) the legislative rarely approves significant government expenditure, or
- 2) the legislature rarely makes in-year budget amendments to the government proposed budget.

### 4.2.37 aii\_q32 Law: executive's proposal & approved budget must be published in full yearly

Sub-score (0-100). Question N 32. In law, both the executive's budget proposal and the approved budget must be published in full every year.

A 100 score is earned where in law both the budget proposed by the Executive (draft sent to Congress for approval) and the approved budget must be published in full every year.

A 0 score is earned where no such law exists.

#### 4.2.38 aii q33 Practice: citizens can provide input for budget decisions

Sub-score (0-100). Question N 33. In practice, citizens can provide input for budget decisions.

A 100 score is earned where all the following conditions are met:

1) the government publicly invites citizens to provide input for budget decisions with at least four weeks of time for citizens to study the full budget, and

2) functioning mechanisms are in place for citizens to submit their input (from on/off line submission mechanisms to town hall meetings).

A 50 score is earned where any of the following conditions apply:

1) the government publicly invites citizens to provide input in budget discussions but the invitation allows them less than four weeks to study the full budget, or

2) functioning mechanisms for citizens to submit their input (from on/off line submission mechanisms to town hall meetings) are sporadic, limited to a few actors, or not always in service.

A 0 score is earned where at least one of the following conditions applies:

1) the government rarely publicly invites citizens to provide input for budget decisions, or

2) no functioning mechanisms are in place for citizens to submit their input.

### 4.2.39 aii\_q34 Practice: a legislative committee exercises oversight of public funds

Sub-score (0-100). Question N 34. In practice, a legislative committee exercises oversight of public funds.

A 100 score is earned where all the following conditions are met:

1) there is a functioning oversight committee that goes into session at least weekly, and

2) the committee has conducted at least one investigation in the last year (even if the investigation hasn't finished at the time of this research).

A 50 score is earned where any of the following conditions apply:

1) there is a functioning oversight committee but it goes into session at least biweekly, or

2) the committee has conducted only one investigation in the last two years.

A 0 score is earned where at least one of the following conditions applies:

1) no functioning oversight committee exists or it exists but it meets monthly or less frequently, or 2) the committee has not conducted any investigation in the last two years.

2) the committee has not conducted any investigation in the last two years.

4.2.40 aii q35 Law: civil servants are required to report cases of alleged corruption

Sub-score (0-100). Question N 35. In law, civil servants are required to report cases of alleged corruption.

A 100 score is earned where the law creates a explicit legal requirement for civil servants to report any cases of alleged corruption they are aware of. A 0 score is earned if no such law exists.

### 4.2.41 aii q36 Law: civil servants who report corruption cases are protected

Sub-score (0-100). Question N 36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.

A 100 score is earned where all the following conditions are met:

1) there is a law specifically created to protect public sector whistle-blowers, and

2) the law forbids termination, transfer, harassment or other negative consequences against whistleblowers. Note: General protections for civil servants do not grant a 100.

A 0 score is earned if no such law exists.

#### 4.2.42aii q37 Law: there are formal rules to prevent conflicts of interest, nepotism, etc.

Sub-score (0-100). Question N 37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronvism and patronage in all branches of government.

A 100 score is earned where at least two of the following three conditions are met:

1) the law prohibits conflicts of interest, nepotism, cronvism, and patronage (at least two of these offenses must be prohibited),

2) the law applies to all branches of government, including the civil service, and

3) it mandates mechanisms such as competitive recruitment and promotion procedures, safeguards against arbitrary disciplinary actions and dismissal, and recusal procedures.

A 0 score is earned where no such law exist. It also scores 0 if only one of the three conditions described in 100 is met.

**N**: 54 **n**: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

#### aii q38 Practice: civil servants' work is not compromised by political interfer-4.2.43ence

Sub-score (0-100). Question N 38. In practice, civil servants' work is not compromised by political interference.

A 100 score is earned where all the following conditions are met:

1) civil servants are disciplined/removed/transferred only through due process by a peer panel/oversight body, and

2) civil servants are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:

1) civil servants are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or

2) civil servants are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:

1) the due process is so weak it doesn't protect civil servants (for ex. the members of the panel that

conducts the due process have a particular interest in how the issue is decided), or 2) civil servants are usually removed when a new administration takes power.

## 4.2.44 aii\_q39 Practice: civil servants are appointed and evaluated according to prof. criteria

Sub-score (0-100). Question N 39. In practice, civil servants are appointed and evaluated according to professional criteria.

A 100 score is earned where all the following conditions are met:

1) appointments to the civil service are made on a merit-based system,

2) individuals appointed are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and

3) performance evaluations are based on standard benchmarks.

A 50 score is earned where any of the following conditions apply:

- 1) not all civil servants are appointed because of their merits,
- 2) not all appointees are free of conflicts or interest, or

3) performance evaluations are not always based on standard benchmarks.

A 0 score is earned where at least one of the following conditions apply:

- 1) no merit-based system is in place or it's so weak it's useless,
- 2) civil servants frequently have conflicts of interest, or
- 3) performance evaluations are usually based on personal, discretionary criteria.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

## 4.2.45 aii\_q40 Law: there are restrictions for civil. servants entering private sector after

Sub-score (0-100). Question N 40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

A 100 score is earned where the law forbids civil servants to take a position in the private sector for a period of time after leaving government if the position involve any of the following:

- 1) would present a conflict of interest,
- 2) would involve seeking to influence their former government colleagues, or
- 3) would establish a relationship between the former and the new office.

A 0 score is earned if no such law exists.

## 4.2.46 aii\_q41 Law: citizens have a right to request public information from state bodies

Sub-score (0-100). Question N 41. In law, citizens have a right to request public information from state bodies.

A 100 score is earned where all the following conditions are met:

1) a Constitutional principle guarantees citizens' rights to request and receive access to any public documents and information, and

2) there is a specific access to information law that establishes the process for this right to be implemented. Note: It's possible to score 100 if national security or individual privacy information is protected, as long as the law defines the parameters and processes to declare what information is protected and they are limited in scope. Just the constitutional protection is 0T enough to score 100.

A 0 score is earned if there is no such law, or a law exists but it doesn't mandate all the conditions described in 100.

### 4.2.47 aii q42 Practice: citizen requests for public information are effective

Sub-score (0-100). Question N 42. In practice, citizen requests for public information are effective.

A 100 score is earned where all the following conditions are met:

1) records are available online or on paper less than two weeks after requested, and

2) costs are limited to photocopying. A 100 score is possible even if there are exceptions for information protected by national security or individual privacy laws.

A 50 score is earned where any of the following conditions apply:

1) many records are not online and/or it takes between two and four weeks for citizens' to obtain them, or

2) costs sometimes are higher than photocopying.

A 0 score is earned where at least one of the following conditions applies:

1) most records are not online and it takes more than a month for a citizen to obtain them, or 2) costs are usually higher than photocopying.

### 4.2.48 aii q43 Practice: citizens can access legislative processes and documents

Sub-score (0-100). Question N 43. In practice, citizens can access legislative processes and documents.

A 100 score is earned where all the following conditions are met:

1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are accessible to the public online or at the cost of photocopying,

2) most records are available within a day of legislative proceedings, and

3) there is a complete, easily available legislative archive either on or off line.

A 50 score is earned where any of the following conditions apply:

1) occasionally legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are not accessible to the public online or the cost is higher than photocopying;

2) records are usually available within a week of legislative proceedings, or

3) citizens have limited access to a legislative archive either on or off line or the archive is not complete.

A 0 score is earned where at least one of the following conditions apply:

1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are rarely accessible to the public online,

2) records take more than a week after legislative proceedings to be available, or

3) there is no legislative archive or citizens don't have access to it.

N: 54

## 4.2.49 aii\_q44 Law: senior officials of govovernment are required to disclose records of assets

Sub-score (0-100). Question N 44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.

A 100 score is earned where in law all the following conditions are met:

1) senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) must file asset disclosures,

2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and

3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:

1) no such law exists or it exists but it doesn't apply to all senior officials of the three branches of government,

2) the law requires so little information as to render the disclosures useless (for ex. it doesn't require

disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or 3) the law doesn't make the disclosures public.

3) the law doesn't make the disclosures public.

### 4.2.50 aii q45 Practice: asset disclosure process of senior officials branches is effective

Sub-score (0-100). Question N 45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.

A 100 score is earned where all the following conditions are met:

1) senior officials of the three branches of government file their asset disclosures,

2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and3) disclosures are available to the public online or within two weeks of requested at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:

1) not all senior officials of the three branches of government file their asset disclosures,

2) their disclosures don't contain detailed information about them and their immediate family, or

3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying.

A 0 score is earned where at least one of the following conditions apply:

1) senior officials of the three branches of government routinely fail to file asset disclosures,

2) asset disclosures contain so little information they are useless (for ex. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or

3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

## 4.2.51 aii\_q46 Law: civil service members are required to disclose assets & these are public

Sub-score (0-100). Question N 46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.

A 100 score is earned when in law all the following conditions are met:

1) members of the civil service must file asset disclosures,

2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments, both domestic and foreign), and

3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:

1) no such law exists or it exists but it doesn't apply to all members of the civil service,

2) the law requires so little information as to render the disclosures useless (for ex. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or

3) the law doesn't make the disclosures public.

#### 

Sub-score (0-100). Question N 47. In practice, the asset disclosure process for members of the civil service is effective.

A 100 score is earned where all the following conditions are met:

1) all members of the civil service file their asset disclosures,

2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and

3) disclosures are available to the public online or within two weeks of requested at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:

1) most but not all members of the civil service file their asset disclosures,

2) their disclosures are not complete (for ex., they contain real estate assets but not movable property, or list the asset but don't provide its estimated value), or

3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:

1) members of the civil service routinely fail to file asset disclosures,

2) asset disclosures contain so little information they are useless (for ex. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or

3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Min. Year:2015 Max. Year: 2015 N: 54

## 4.2.53 aii\_q48 Law: political parties are required to disclose public donations (Gov. funds)

Sub-score (0-100). Question N 48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).

A 100 score is earned where a law requires political parties to publish all public contributions. A 0 score is earned where no such law exists.

### 4.2.54 aii\_q49 Practice: pol. parties disclose public donations & these are available to public

Sub-score (0-100). Question N 49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:

1) political parties disclose public donations within a month of received, and

2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:

1) political parties don't always disclose public donations or disclose them more than a month of received, or

2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose public donations.

### 4.2.55 aii q50 Law: political parties are required to disclose private donations

Sub-score (0-100). Question N 50. In law, political parties are required to regularly disclose private donations.

A 100 score is earned where the law requires political parties to publish all private contributions.

A 0 score is earned where no such law exists.

## 4.2.56 aii\_q51 Practice: pol. parties disclose private donations & this is available to public

Sub-score (0-100). Question N 51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:

1) political parties disclose private donations within a one month of received, and

2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:

1) political parties don't always disclose private donations or disclose them more than a month of received, or

2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose private donations.

Min. Year:2015 Max. Year: 2015 N: 54

## 4.2.57 aii\_q52 Practice: media organizations disclose their owner's identities to the public

Sub-score (0-100). Question N 52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.

A 100 score is earned where all the following conditions are met:

- 1) major media organizations disclose the names of their owners to the public, and
- 2) the information is readily available to any citizen (online, on the newspaper, etc.).

A 50 score is earned where any of the following conditions apply:

1) only some major media organizations disclose the name of their owners or they disclose only some of the owners, or

2) the information is public but obtaining it takes two weeks or more.

A 0 score is earned where at least one of the following conditions apply:

1) major media organizations don't disclose the names of their owners, or

2) the information is available only to the government.

# 4.2.58 aii\_q53 Practice: journalists & editors adhere to professional practices in reporting

Sub-score (0-100). Question N 53. In practice, journalists and editors adhere to strict, professional practices in their reporting.

A 100 score is earned where all the following conditions are met:

1) major media organizations have a formal document with standards guiding journalistic work (Code of Ethics, Editorial Guidelines, Statement of Principles, Code of Conduct, etc.),

2) the document codifies standards for use of anonymous sources, conflicts of interest, and impartiality, and

3) major media organizations enforce this document.

A 50 score is earned where any of the following conditions apply:

1) some but not all major media organizations have a formal document,

2) the formal document contains only one of the three aspects mentioned in 100 (use of anonymous sources, conflicts of interest, and impartiality), or

3) major media organizations enforce this document but some exceptions exist.

A 0 score is earned where at least one of the following conditions apply:

1) most major media organizations lack a formal document,

2) the formal document is vague and doesn't provide guidance on use of anonymous sources, conflicts of interest, and impartiality, or

3) major media organizations rarely or never enforce this document.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2014 Max. Year: 2018 N: 54 n: 270  $\overline{N}$ : 54  $\overline{T}$ : 5

## 4.2.59 aii\_q54 Law: it's legal to report accurate news even if it damages pub. figures' reput.

Sub-score (0-100). Question N 54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.

A 100 score is earned where all the following conditions are met:

1) it is legal to report accurate information on public figures regardless of damage to their reputations, 2) journalists can only be convicted if malice is proved (a story was published even though the journalist knew it was false or didn't try to verify it).

Note: Public figures include anyone in a position of responsibility in the government or civil service; political leaders; and leaders of civil society organizations, religious groups, trade unions, or large businesses.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100. A 0 score is also earned where the law establishes the presumption of bad faith for all comments deemed defamatory and/or the burden of proof falls to journalists.

### 4.2.60 aii q55 Practice: the government does not promote the media's self-censorship

Sub-score (0-100). Question N 55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.

A 100 score is earned where all the following conditions are met:

1) the government never prevents the publication of information, and

2) the government doesn't promote the media's self-censorship (for ex. with threats, discrimination

in the application of tax laws, government advertising, etc.).

A 50 score is earned where any of the following conditions apply:

1) the government occasionally prevents the publication of information, or

2) it occasionally encourages the media to self-censor (for ex. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 0 score is earned where at least one of the following conditions apply:

1) the government usually prevents the publication of information, or

2) it usually encourages the media to self-censor (for ex. with threats, discrimination in the application of tax laws, government advertising, etc.).

## 4.2.61 aii\_q56 Practice: government doesn't promote the self-censorship of citizens online

Sub-score (0-100). Question N 56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).

A 100 score is earned where all the following conditions are met:

1) the government never prevents the publication online of information by citizens, and

2) the government doesn't promote citizen's self-censorship (for ex. with arrests, threats to prosecute, interrogations, etc.).

A 50 score is earned where any of the following conditions apply:

1) the government occasionally prevents the publication online of information by citizens, or

2) it occasionally encourages citizens to self-censor (for ex. with arrests, threats to prosecute, interrogations, etc.).

A 0 score is earned where at least one of the following conditions apply:

1) the government usually prevents the publication online of information by citizens, or

2) it usually encourages citizens to self-censor (for ex. with arrests, threats to prosecute, interrogations, etc.).

#### 4.2.62aii q57 Practice: government doesn't block (or ask ICT firms to block) online content

Sub-score (0-100). Question N 57. In practice, the government does not block (or require ICT firms to block) online content.

A 100 score is earned where all the following conditions are met:

1) there is no evidence that politically sensitive websites, keywords, search results or content are filtered, blocked or taken down, and

2) Web users in the country are able to access any website in the world without restriction. A 100 score can still be earned if child pornography or delinquent intellectual property websites have been taken down.

A 50 score is earned where any of the following conditions apply:

1) a small number of sites, keywords or search results on a specific issue are blocked (blocking cannot include widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter), or 2) citizens are occasionally unable to access certain websites (national or international).

A 0 score is earned where at least one of the following conditions apply:

1) politically sensitive websites, keywords, search results or content are usually filtered, blocked or taken down, or

2) Web users in the country are usually unable to access many websites without restriction, including widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter.

#### aii q58 Practice: ministries and autonomous agencies have websites 4.2.63

Sub-score (0-100). Question N 58. In practice, ministries and autonomous agencies have websites.

A 100 score is earned where all the following conditions are met:

1) all ministries and autonomous agencies (public service providers) have websites, and

2) are updated at least once a month.

A 50 score is earned where any of the following conditions apply:

1) about half of the ministries and autonomous agencies (public service providers) have websites, or

2) the websites are updated less than once a month.

A 0 score is earned where less than 10% of the ministries and autonomous agencies (public service providers) have websites.

### 4.2.64 aii q59 Practice: the public services regulatory agencies have websites

Sub-score (0-100). Question N 59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

A 100 score is earned where all the following conditions are met:

1) all the public services regulatory agencies and the national ombudsman (if one exists) have websites,

2) the websites inform users of their rights and how to exercise them in a way that is easy to grasp for users with limited education, and

3) the websites allow users to file complaints online. Note: other digital methods to file complaints, such as mobile apps or phone lines, can also be considered for this indicator.

A 50 score is earned where any of the following conditions apply:

1) some but not all the public services regulatory agencies and the national ombudsman have websites,

2) the websites contain little information about users rights and how to exercise them or the information is difficult to grasp for users with limited education, or

3) the websites don't allow users to file complaints online.

A 0 score is earned where at least one of the following conditions apply:

1) the public services regulatory agencies and the national ombudsman lack websites, or

2) the websites generally lack basic information about users rights or how to exercise them.

Min. Year:2015 Max. Year: 2015 N: 54

#### 4.2.65 aii rol Rule of law sub-index

Rule of Law. This sub index from 0 to 100 is composed of:

41. In law, citizens have a right to request public information from state bodies.

42. In practice, citizen requests for public information are effective.

43. In practice, citizens can access legislative processes and documents.

44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.

45. In practice, the asset disclosure process for senior officials of the three branches of government

(heads of state and government, ministers, members of Parliament, judges, etc.) is effective.

46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.

47. In practice, the asset disclosure process for members of the civil service is effective.

48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).

49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.

50. In law, political parties are required to regularly disclose private donations.

51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.

52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.

53. In practice, journalists and editors adhere to strict, professional practices in their reporting.

54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.

55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.

56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).

57. In practice, the government does not block (or require ICT firms to block) online content.

58. In practice, ministries and autonomous agencies have websites.

59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

### The Bayesian Corruption Index

The Bayesian Corruption Index is a composite index of the perceived overall level of corruption: with corruption refered to as the "abuse of public power for private gain". Perceived corruption: Given the hidden nature of corruption, direct measures are hard to come by, or inherently flawed (e.g. the number of corruption convictions). Instead, we amalgamate the opinion on the level of corruption from inhabitants of the country, companies operating there, NGOs, and officials working both in governmental and supra-governmental organizations. Composite: It combines the information of 20 different surveys and more than 80 different survey questions that cover the perceived level of corruption.

It is an alternative to the other well-known indicators of corruption perception: the Corruption Perception Index (CPI) published by Transparency International and the Worldwide Governance Indicators (WGI) published by the World Bank. Methodologically, it is most closely related to the latter as the methodology used in the construction of the BCI can be seen as an augmented version of the Worldwide Governance Indicators' methodology.

The augmentation allows an increase of the coverage of the BCI: a 60% to 100% increase relative to the WGI and CPI, respectively. In addition, in contrast to the WGI or CPI, the underlying source data are entered without any ex-ante imputations, averaging or other manipulations. This results in an index that truly represents the underlying data, unbiased by any modeling choices of the composer.
#### 4.6.1 bci bci The Bayesian Corruption Indicator

The BCI index values lie between 0 and 100, with an increase in the index corresponding to a raise in the level of corruption. This is a first difference with CPI and WGI where an increase means that the level of corruption has decreased.

There exists no objective scale on which to measure the perception of corruption and the exact scaling you use is to a large extent arbitrary. However, we were able to give the index an absolute scale: zero corresponds to a situation where all surveys say that there is absolutely no corruption. On the other hand, when the index is one, all surveys say that corruption is as bad as it gets according to their scale. This is another difference with CPI and WGI, where the scaling is relative. They are rescaled such that WGI has mean 0 and a standard deviation of 1 in each year, while CPI always lies between 0 and 100.

In contrast, the actual range of values of the BCI will change in each year, depending how close countries come to the situation where everyone agrees there is no corruption at all (0), or that corruption is as bad as it can get (100). By way of illustration, the figure below shows the histogram of the BCI in 2014. The country with the lowest level of corruption is New Zealand (15.4), while corruption is most problematic in Somalia (70.9).

The absolute scale of the BCI index was obtained by rescaling all the individual survey data such that zero corresponds to the lowest possible level of corruption and 1 to the highest one. We subsequently rescaled the BCI index such that when all underlying indicators are zero (one), the expected value of the BCI index is zero (hundred).

#### 4.7 The World Conservation Union Red List of Threatened Species

https://www.iucnredlist.org/resources/summary-statistics (International Union for Conservation of Nature and Natural Resources, 2018) (Data downloaded: 2018-10-11)

#### IUCN Red List of Threatened Species (version 2018-1)

The IUCN Red List of Threatened Species is widely recognized as the most comprehensive, objective global approach for evaluating the conservation status of plant and animal species. From its small beginning, The IUCN Red List has grown in size and complexity and now plays an increasingly prominent role in guiding conservation activities of governments, NGOs and scientific institutions. The introduction in 1994 of a scientifically rigorous approach to determine risks of extinction that is applicable to all species, has become a world standard.

Note: For reptiles, fishes, molluscs, other invertebrates, plants, fungi & protists: there are still many species that have not yet been assessed for the IUCN Red List and therefore their status is not known (i.e., these groups have not yet been completely assessed). Therefore the figures presented below for these groups should be interpreted as the number of species known to be threatened within those species that have been assessed to date, and not as the overall total number of threatened species for each group.

We advise users to abstain from making comparisons through time using this data, given that there could be changes to the methodology for the country reports.

#### 4.8 Bonn International Center for Conversion

http://gmi.bicc.de/ (Mutschlet, Max. M and Marius Bales, 2018) (Data downloaded: 2019-01-15)

#### **Global Militarization Index**

Compiled by BICC, the Global Militarization Index (GMI) presents on an annual basis the relative weight and importance of a country's military apparatus in relation to its society as a whole. The GMI 2018 covers 155 countries and is based on the latest available figures (in most cases data for 2017). The index project is financially supported by Germany's Federal Ministry for Economic Cooperation and Development.

#### 4.8.1 bicc gmi Global Militarization Index

The Global Militarization Index is divided into three overarching categories: expenditure, personnel and heavy weapons. (See variables bicc\_milexp, bicc\_milper, and bicc\_hw).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula x=(y-min)/(max-min), with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:

Military expenditures as percentage of GDP - 5 Military expenditures in relation to health spending - 3 Military and paramilitary personnel in relation to population - 4 Military reservers in relation to population - 2 Military and paramilitary personnel in relation to physicians - 2 Heavy weapons in relation to population - 4

Min. Year:2013 Max. Year: 2017 N: 159

Min. Year:1990 Max. Year: 2017 N: 167 n: 4109  $\overline{N}$ : 147  $\overline{T}$ : 25

#### 4.8.2 bicc hw Heavy Weapons Index

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size). Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

#### 4.8.3 bicc milexp Military Expenditure Index

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years. Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

**In. Year**:2013 **Max. Year**: 2017 **N**: 159

Min. Year:1990 Max. Year: 2017 N: 167 n: 4109  $\overline{N}$ : 147  $\overline{T}$ : 25

#### 4.8.4 bicc milper Military Personnel Index

the level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military alone does not adequately reflect the total size of the armed forces. The main criterion for coding an organizational entity as either military or paramilitary is that the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

Min. Year:2013 Max. Year: 2017 N: 159

Min. Year:1990 Max. Year: 2017 N: 167 n: 4109  $\overline{N}$ : 147  $\overline{T}$ : 25

#### 4.9 Bar-Ilan University

http://www.religionandstate.org (Fox, 2011) (Fox, 2015) (Fox, 2018) (Data downloaded: 2018-09-11)

#### **Religion and State Project**

The Religion and State (RAS) project is a university-based project located at Bar Ilan University in Ramat Gan, Israel. Its goal is to create a set of measures that systematically gauge the intersection between government and religion. Specifically, it examines government religion policy. The project's goals are threefold:

- To provide an accurate description of government religion policies worldwide.

- To create a tool which will lead to greater understanding of the factors which influence government religion policy.

- To provide the means to examine how government religion policy influences other political, social, and economic factors as well as how those factors influence government religion policy.

Round 2 of the RAS dataset, which is currently the official version available for download, measures the extent of government involvement in religion (GIR) or the lack thereof for 175 states on a yearly basis between 1990 and 2008. This constitutes all countries with populations of 250,000 or more as well as a sampling of smaller states. The data includes the following information:

Official Religion: A 15 value variable which measures the official relationship between religion and the state. This includes five categories of official religions and nine categories of state-religion relationships which range from unofficial support for a single religion to overt hostility to all religion.

Religious Support: This includes 51 separate variables which measure different ways a government can support religion including financial support, policies which enforce religious laws, and other forms of entanglement between government and religion.

Religious Restrictions: This includes 29 separate variables which measure different ways governments regulate, restrict, or control all religions in the state including the majority religion. This includes restrictions on religion's political role, restrictions on religious institutions, restrictions on religious practices, and other forms of regulation, control, and restrictions.

Religious Discrimination: This includes 30 types of restrictions that are placed on the religious institutions and practices of religious minorities that are not placed on the majority group. This includes restrictions on religious practices, restrictions on religious institutions and clergy, restrictions on conversion and proselytizing, and other restrictions.

The dataset also includes several sets of detailed variables measuring certain policies in depth. These topics include religious education, the registration of religious organizations, restrictions on abortion, restrictions on proselytizing, and religious requirements for holding public office or citizenship.

#### 4.9.1 biu offrel Official Religion

Official Religion measures whether the government has an established religion. For a religion to be established there must be a constitutional clause, a law, or the equivalent explicitly stating that a specific religion or specific religions are the official religions of that state. This variable is coded on the following scale:

- 0. The State has no official religion
- 1. The state has multiple established religions
- 2. The state has one established religion.

Min. Year:1990 Max. Year: 2014 N: 180 n: 4286  $\overline{N}$ : 171  $\overline{T}$ : 24

#### 4.9.2 biu\_relleg Religious Legislation

Composite measure of religious legislation, 2014 (higher scores indicate higher levels of religious legislation).

#### 4.10 Barro and Lee

http://www.barrolee.com/ (Barro & Lee, 2013) (Data downloaded: 2018-07-13)

#### **Educational Attainment Dataset**

The Barro-Lee Data set provide data disaggregated by sex and by 5-year age intervals. It provides educational attainment data for 146 countries in 5-year intervals from 1950 to 2010. It also provides information about the distribution of educational attainment of the adult population over age 15 and over age 25 by sex at seven levels of schooling - no formal education, incomplete primary, complete primary, lower secondary, upper secondary, incomplete tertiary, and complete tertiary. Average years of schooling at all levels - primary, secondary, and tertiary - are also measured for each country and for regions in the world. Aside from updating and expanding the previous estimates (1993, 1996, and 2001), the accuracy of estimation in the current version is improved by using more information and better methodology. To reduce measurement error, the new estimates are constructed using recently available census/survey observations from consistent census data, disaggregated by age group, and new estimates of mortality rate and completion rate by age and by education.

#### **Event History Coding of Democratic Breakdowns**

Binary coding of all democracies from 1913 until 2005 prepared for use in event history analysis.

#### 4.12.1 bnr dem Democratic Breakdown

The variable is a binary coding of all democracies from 1913 until 2005 (included in the QoG dataset are only the years 1946-2005) prepared for use in event history analysis. Countries that meet the minimum conditions for democracy (see below) enter the dataset and are coded "0." When countries cease to meet those minimum criteria they are coded "1" and exit from the dataset. If, after a

democratic breakdown, a country again meets our minimum criteria it re-enters the data as a new democratic episode. The time frame onset in 1913 is a function of when the first country (Norway) meets the minimum conditions. All series terminate in either in a breakdown in various years or right censorship in 2005. The minimal conditions are based on Dahl's notion of polyarchy (competitiveness, inclusiveness) combined with Linz and Stepan's stateness criteria.

Competitiveness: Countries that hold elections for both the executive and legislature, and in which more than one party contests the elections, are included. However, we exclude cases in which we detected outcome changing vote fraud, in which there was either extensive or extreme violence that inhibited voters' preference expression, or in which political parties representing a substantial portion of the population were banned.

Inclusiveness: We only include competitive polities in which at least fifty percent of all adult citizens are enfranchised to vote in our set of democracies.

Stateness: We also considered questions of sovereignty, not including colonial states, where founding elections were held prior to the granting of independence, and countries experiencing internal wars in which twenty percent or greater of the population or territory was out of control of the state.

#### 4.13 Bertelsmann Stiftung

http://www.social-inclusion-monitor.eu/downloads/ (Schraad-Tischler & Schiller, 2016) (Data downloaded: 2018-07-05)

#### Social Justice Index

The Social Justice Index is designed to measure on a regular basis the progress made and the ground lost on issues of social justice in each EU member state. Since social justice is a central constitutive element of the legitimacy and stability of any political community, we look at the current state of affairs within the individual member states. As a cross-national survey, the Social Justice Index comprises 27 quantitative and eight qualitative indicators, each associated with one of the six dimensions of social justice:

- 1. Poverty prevention
- 2. Equitable education
- 3. Labor market access
- 4. Social cohesion and non-discrimination
- 5. Health
- 6. Intergenerational justice

The dimension of poverty is weighted most strongly, given triple weight in the overall ranking. The importance of access to education and labor market is emphasized by doubly weighting these dimensions. Social cohesion, health and intergenerational justice are factored into the index with a simple/ normal weight. For the purposes of comparison, in addition to the weighted Social Justice Index, a non-weighted ranking was created in which the six dimensions were treated equally. The Social Justice Index is based on quantitative and qualitative data collected by the Bertelsmann Stiftung

within the framework of its SGI project (www.sgi-network.org). The data for the quantitative SGI indicators used in the Social Justice Index are derived primarily from Eurostat and the European Union Statistics on Income and Living Conditions (EU-SILC). The qualitative indicators reflect the evaluations provided by more than 100 experts responding to the SGI's survey of the state of affairs in various policy areas throughout the OECD and EU. For these indicators, the rating scale ranges from 1 (worst) to 10 (best). In order to ensure compatibility between the quantitative and qualitative indicators, all raw values for the quantitative indicators undergo linear transformation to give them a range of 1 to 10 as well. Together with the ranking of the resulting reform values, the index values form the Social Inclusion Monitor dataset.

#### The six dimensions in detail:

1. Poverty Prevention: Under conditions of poverty, social participation and self- determined life are possible only with great difficulty. Poverty is the strongest determinant of social and economic exclusion of young people.

2. Equitable Education: Equal access to good- quality education is an essential factor in providing equitable capabilities and opportunities for advancement (vertical mobility). It is critical to ending hereditary social exclusion, supports integration and includes lifelong learning.

3. Labor-market access: Employment both provides an income and facilitates social participation. The degree of inclusiveness is essential since an individual's status is defined in large part by his or her participation in the workforce. Exclusion from the labor market substantially limits individual opportunities for self- realization, contributes to an increase in the risk of poverty, and can even lead to serious health stresses.

4. Health: The conditions in which people live and die are shaped by political, social and economic forces. Social and economic policies have a determining impact on whether a child can grow and develop to its full potential and live a flourishing life, or whether its life will be blighted. This is why access to healthcare ensures young people can be active in society.

5. Social cohesion and non- discrimination: This dimension enables the examination of the extent to which trends towards social polarization, exclusion and the discrimination of specific groups are successfully countered. Developing a community of shared values, shared challenges and equal opportunity is the aim.

6. Intergenerational justice: The issue at stake here is the need for contemporary generations to lead lives they value without compromising the ability of future generations at the same time. Sharing social burdens among young and old, with provision for future generations is the aspiration.

#### 4.13.1 bs ee Equitable Education

Equitable Education. Sub-components: Education Policy; Socioeconomic Background and Student Performance; Pre-Primary Education; Early School Leavers.

#### Bertelsmann Transformation Index

The Bertelsmann Stiftung's Transformation Index (BTI) analyzes and evaluates the quality of democracy, a market economy and political management in 129 developing and transition countries. It measures successes and setbacks on the path toward a democracy based on the rule of law and a socially responsible market economy.

In-depth country reports provide the basis for assessing the state of transformation and persistent challenges, and to evaluate the ability of policymakers to carry out consistent and targeted reforms. The BTI is the first cross-national comparative index that uses self-collected data to comprehensively measure the quality of governance during processes of transition.

#### 4.14.1 bti aar Associational/Assembly Rights

To what extent can individuals form and join independent political or civic groups? To what extent can these groups operate and assemble freely? 1-10.

Min. Year:2008 Max. Year: 2016 N: 28 n: 122  $\overline{N}$ : 14  $\overline{T}$ : 4

1. Association and assembly rights are denied. Independent civic groups do not exist or are prohibited.

4. Association and assembly rights are severely limited. Oppositional political groups with any relevance are prohibited or systematically disabled. Independent civic groups can operate and assemble if they support the regime or are not outspokenly critical of it.

7. Association and assembly rights are partially limited, but generally there are no outright prohibitions of independent political or civic groups.

10. Association and assembly rights are unrestricted for individuals and independent political or civic groups within the basic democratic order.

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.2 bti acp Anti-Corruption Policy

To what extent does the government successfully contain corruption? 1-10.

1. The government fails to contain corruption, and there are no integrity mechanisms in place.

4. The government is only partly willing and able to contain corruption, while the few integrity mechanisms implemented are mostly ineffective.

7. The government is often successful in containing corruption. Most integrity mechanisms are in place, but some are functioning only with limited effectiveness.

10. The government is successful in containing corruption, and all integrity mechanisms are in place and effective.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 880  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.3 bti aod Approval of Democracy

How strong is the citizens' approval of democratic norms and procedures? 1-10.

- 1. Approval of democratic norms and procedures is very low.
- 4. Approval of democratic norms and procedures is fairly low.
- 7. Approval of democratic norms and procedures is fairly high.
- 10. Approval of democratic norms and procedures is very high.

N: 76

Min. Year:2005 Max. Year: 2017 N: 80 n: 464  $\overline{N}$ : 36  $\overline{T}$ : 6

#### 4.14.4 bti ba Basic Administration

To what extent do basic administrative structures exist? 1-10.

1. The administrative structures of the state are limited to keeping the peace and maintaining law and order. Their territorial scope is very limited, and broad segments of the population are not covered.

4. The administrative structures of the state are extending beyond maintaining law and order, but their territorial scope and effectivity are limited.

7. The administrative structures of the state provide most basic public services throughout the country, but their operation is to some extent defi cient.

10. The state has a differentiated administrative structure throughout the country which provides all basic public services.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.5 bti cdi Commitment to Democratic Institutions

To what extent are democratic institutions accepted as legitimate by the relevant actors? 1-10.

1. There are no democratic institutions as such (authoritarian regime).

4. Only individual institutions are accepted, while influential actors hold vetoes. Acceptance remains unstable over time.

7. Most democratic institutions are accepted as legitimate by most relevant actors.

10. All democratic institutions are accepted as legitimate by all relevant actors.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.6 bti ci Conflict Intensity

How serious are social, ethnic and religious conflicts? 1-10.

1. There are no violent incidents based on social, ethnic or religious differences.

4. There are only few violent incidents. Radical political actors have limited success in mobilizing along existing cleavages. Society and the political elite, however, are divided along social, ethnic or religious lines.

7. There are violent incidents. Mobilized groups and protest movements dominate politics. Society and the political elite are deeply split into social classes, ethnic or religious communities.

10. There is civil war or a widespread violent conflict based on social, ethnic or religious differences.

#### 4.14.7 bti cps Currency and Price Stability

There are institutional or political precautions to control inflation sustainably, together with an appropriate monetary policy and fiscal policy. Including "To what extent do government and the central bank pursue a consistent inflation policy and an appropriate foreign exchange policy?" and "To what extent do the government's fiscal and debt policies support macroeconomic stability?".

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.8 bti cr Civil Rights

To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights? 1-10.

1. Civil rights are not guaranteed and frequently violated. There are no mechanisms and institutions to protect citizens against violations of their rights.

4. Civil rights are guaranteed only within limited enclaves or are violated over protracted periods of time. Some mechanisms and institutions to prosecute, punish and redress violations of civil rights are established formally, but do not function.

7. Civil rights are guaranteed, but are partially or temporarily violated or are not protected in some parts of the country. Mechanisms and institutions to prosecute, punish and redress violations of civil rights are in place, but often prove to be ineffective.

10. Civil rights are guaranteed by the constitution and respected by all state institutions. Infringements present an extreme exception. Citizens are effectively protected by mechanisms and institutions established to prosecute, punish and redress violations of their rights.

#### 4.14.9 bti\_csp Civil Society Participation

To what extent does the political leadership enable the participation of civil society in the political process? 1-10.

1. The political leadership obstructs civil society participation. It suppresses civil society organizations and excludes its representatives from the policy process.

4. The political leadership neglects civil society participation. It frequently ignores civil society actors

and formulates its policy autonomously.

7. The political leadership permits civil society participation. It takes into account and accommodates the interests of most civil society actors.

10. The political leadership actively enables civil society participation. It assigns an important role to civil society actors in deliberating and determining policies.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 880  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.10 bti cst Civil Society Traditions

To what extent are there traditions of civil society? 1-10.

- 1. Traditions of civil society are very strong.
- 4. Traditions of civil society are fairly strong.
- 7. Traditions of civil society are fairly weak.
- 10. Traditions of civil society are very weak.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.11 bti\_ds Democracy Status

Democracy Status: it groups the scores of stateness, political participation, rule of law, stability of the democratic institutions, and political and social integration 1-10.

**N**: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.12 bti eo Equal Opportunity

To what extent does equality of opportunity exist? 1-10.

1. Equality of opportunity is denied. Women and/or members of ethnic or religious groups have only very limited access to education, public office and employment. There are no legal provisions against discrimination.

4. Equality of opportunity is not achieved. Women and/or members of ethnic or religious groups have limited access to education, public office and employment. There are some legal provisions against discrimination, but their implementation is highly deficient.

7. Equality of opportunity is largely achieved. Women and members of ethnic or religious groups have near-equal access to education, public office and employment. There are a number of legal provisions

against discrimination, but their implementation is at times insufficient.

10. Equality of opportunity is achieved. Women and members of ethnic or religious groups have equal access to education, public office and employment. There is a comprehensive and effective legal and institutional framework for the protection against discrimination.

#### 4.14.13 bti\_eos Economic Output Strength

How does the economy, as measured in quantitative indicators, perform? 1-10.

1. The economic performance is very poor. Strongly negative macroeconomic data may include negative GDP growth rates, very high unemployment levels, high infl ation, large budget defi cits, unreasonably high debt and an increasingly unsustainable current account position.

4. The economic performance is poor. Continuing negative macroeconomic data may include stagnant GDP levels, relatively high unemployment levels, low price stability, an unbalanced budget, rising debt and a volatile current account position.

7. The economic performance is good. Moderately positive macroeconomic data may include low GDP growth rates, only moderate unemployment levels, relative price stability, a slightly unbalanced budget, a tendency toward debt and a manageable current account position.

10. The economic performance is very good. Positive macroeconomic data may include relatively high GDP growth rates, relatively high employment levels, price stability, balanced budget, reasonable debt and a sustainable current account position.

Min. Year:2015 Max. Year: 2015 N: 128

#### 4.14.14 bti\_ep Economic Performance

Economic Performance: The economy's performance points to solid development 1-10.

#### 4.14.15 bti epg Effective Power to Govern

To what extent do democratically elected political representatives have the effective power to govern, or to what extent are there veto powers and political enclaves? 1-10.

1. Political decision-makers are not democratically elected.

4. Democratically elected political representatives have limited power to govern. Strong veto groups are able to undermine fundamental elements of democratic procedures.

7. Democratically elected political representatives have considerable power to govern. However, individual power groups can set their own domains apart or enforce special-interest policies.

10. Democratically elected political representatives have the effective power to govern. No individual or group is holding any de facto veto power.

N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.16 bti\_ffe Free and Fair Elections

To what extent are political representatives determined by general, free and fair elections? 1-10.

1. There are no elections at the national level.

4. General elections are held, but serious irregularities during voting process and ballot count occur. The rights to vote, campaign and run for office are restricted, and elections have de facto only limited influence over who governs.

7. General, multi-party elections are held, conducted properly and accepted as the means of filling political posts. However, there are some constraints on the fairness of the elections with regard to registration, campaigning or media access.

10. There are no constraints on free and fair elections.

#### 4.14.17 bti foe Freedom of Expression

To what extent can citizens, organizations and the mass media express opinions freely? 1-10.

1. Freedom of expression is denied. Independent media do not exist or are prohibited.

4. Freedom of expression is severely limited. Public debate is vulnerable to distortion and manipulation through strong intervention.

7. Freedom of expression is partially limited, but generally there are no outright prohibitions on the press.

10. Freedom of expression is unrestricted for citizens, groups and the press within the basic democratic order.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.18 bti\_gi Governance Index

Governance Index: it groups the scores of the level of difficulty of management, the steering capacity, the resource efficiency, consensus building, and international cooperation 1-10.

**N**: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 880  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.19 bti\_gp Governance Performance

Governance Performance: it groups the scores of the steering capability, resource efficiency, consensus building and international cooperation 1-10.

Min. Year:2015 Max. Year: 2015 N: 128

#### 4.14.20 bti ic International Cooperation

The political leadership is willing and able to cooperate with external supporters and organizations. Including "To what extent does the political leadership use the support of international partners to implement a long-term strategy of development?", "To what extent does the government act as a credible and reliable partner in its relations with the international community?" and "To what extent is the political leadership willing and able to cooperate with neighboring countries?".

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 880  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.21 bti ig Interest Groups

To what extent is there a network of cooperative associations or interest groups to mediate between society and the political system? 1-10.

1. Interest groups are present only in isolated social segments, are on the whole poorly balanced and cooperate little. A large number of social interests remain unrepresented.

4. There is a narrow range of interest groups, in which important social interests are underrepresented. Only a few players dominate, and there is a risk of polarization.

7. There is an average range of interest groups, which refl ect most social interests. However, a few strong interests dominate, producing a latent risk of pooling conflicts.

10. There is a broad range of interest groups that reflect competing social interests, tend to balance one another and are cooperative.

#### 4.14.22 bti ij Independent Judiciary

To what extent does an independent judiciary exist? 1-10.

1. The judiciary is not independent and not institutionally differentiated.

4. The independence of the judiciary is heavily impaired by political authorities and high levels of corruption. It is to some extent institutionally differentiated, but severely restricted by functional deficits, insufficient territorial operability and scarce resources.

7. The judiciary is largely independent, even though occasionally its decisions are subordinated to political authorities or influenced by corruption. It is institutionally differentiated, but partially restricted by insufficient territorial or functional operability.

10. The judiciary is independent and free both from unconstitutional intervention by other institutions and from corruption. It is institutionally differentiated, and there are mechanisms for judicial review of legislative or executive acts.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.23 bti lod Level of Difficulty

Level of Difficulty in Management: it groups the scores of the structural constraints, the civil society traditions and the conflict intensity of a society 1-10.

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.24 bti mes Market Economy Status

Market Economy Status: it groups the scores of the level of socioeconomic development, the organization of the market and competition, currency and price stability, private property, the welfare regime, the economic performance, and sustainability 1-10.

#### 4.14.25 bti mo Organization of the Market and Competition

Organization of the Market and Competition: there are clear rules for stable, market-based competition 1-10.

#### 4.14.26 bti muf Monopoly on the use of Force

To what extent does the state's monopoly on the use of force cover the entire territory of the country? 1-10.

1. There is no state monopoly on the use of force.

4. The state's monopoly on the use of force is established only in key parts of the country. Large areas of the country are controlled by guerrillas, paramilitaries or clans.

7. The state's monopoly on the use of force is established nationwide in principle, but it is challenged by guerrillas, mafias or clans in territorial enclaves.

10. There is no competition with the state's monopoly on the use of force throughout the entire territory.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.27 bti\_nird No Interference of Religious Dogmas

To what extent are legal order and political institutions defined without interference by religious dogmas? 1-10.

1. The state is theocratic. Religious dogmas define legal order and political institutions.

4. Secular and religious norms are in conflict about the basic constitution of the state or are forming a hybrid system.

7. The state is largely secular. However, religious dogmas have considerable influence on legal order and political institutions.

10. The state is secular. Religious dogmas have no noteworthy influence on legal order or political institutions.

#### 4.14.28 bti pdi Performance of Democratic Institutions

Are democratic institutions capable of performing? 1-10.

1. There are no democratic institutions as such (authoritarian regime).

4. Democratic institutions exist, but they are unstable and ineffective.

7. Democratic institutions perform their functions in principle, but often are inefficient due to friction between institutions.

10. The ensemble of democratic institutions is effective and efficient. As a rule, political decisions are prepared, made, implemented and reviewed in legitimate procedures by the appropriate authorities.

#### 4.14.29 bti poa Prosecution of Office Abuse

To what extent are public officeholders who abuse their positions prosecuted or penalized? 1-10.

1. Office holders who break the law and engage in corruption can do so without fear of legal consequences or adverse publicity.

4. Office holders who break the law and engage in corruption are not prosecuted adequately under the law, but occasionally attract adverse publicity.

7. Officeholders who break the law and engage in corruption generally are pros ecuted under established laws and often attract adverse publicity, but occasionally slip through political, legal or procedural loopholes.

10. Officeholders who break the law and engage in corruption are prosecuted rigorously under established laws and always attract adverse publicity.

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.30 bti\_pp Political Participation

Political Participation: The populace decides who rules, and it has other political freedoms 1-10.

#### 4.14.31 bti\_prp Private Property

There are adequate conditions to support a functional private sector. Including "To what extent do government authorities ensure well-defined rights of private property and regulate the acquisition, benefits, use and sale of property?" and "To what extent are private companies permitted and protected? Are privatization processes conducted in a manner consistent with market principles?".

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.32 bti ps Party System

To what extent is there a stable and socially rooted party system able to articulate and aggregate societal interests? 1-10.

1. There is no party system to articulate and aggregate societal interest.

4. The party system is unstable with shallow roots in society: high fragmentation, high voter volatility and high polarization.

7. The party system is fairly stable and socially rooted: moderate fragmentation, moderate voter volatility and moderate polarization.

10. The party system is stable and socially rooted: it is able to articulate and aggregate societal interest with low fragmentation, low voter volatility and low polarization.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.33 bti\_psi Political and Social Integration

Political and Social Integration: Stable patterns of representation exist for mediating between society and the state; there is also a consolidated civic culture 1-10.

#### 4.14.34 bti\_rol Rule of Law

Rule of Law: State powers check and balance one another and ensure civil rights. Including "To what extent is there a working separation of powers (checks and balances)?", "To what extent does an independent judiciary exist?", "To what extent are public officeholders who abuse their positions prosecuted or penalized?" and "To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights?".

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.35 bti\_sc Social Capital

Social Capital: To what extent have social self-organization and the construction of social capital advanced? This question aims to assess the level of trust between citizens, which fosters cooperation and mutual support for purposes of self-help, rather than primarily to further political objectives.

1. There is a very low level of trust among the population, and civic self-organization is rudimentary. 4. There is a fairly low level of trust among the population. The small number of autonomous, self-organized groups, associations and organizations is unevenly distributed or spontaneous and temporary.

7. There is a fairly high level of trust among the population and a substantial number of autonomous, self-organized groups, associations and organizations.

10. There is a very high level of trust among the population and a large number of autonomous, self-organized groups, associations and organizations.

Min. Year:2015 Max. Year: 2015 N: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.36 bti sdi Stability of Democratic Institutions

Stability of Democratic Institutions: Democratic institutions are capable of performing, and they are adequately accepted 1-10.

#### 4.14.37 bti seb Socio-Economic Barriers

To what extent are significant parts of the population fundamentally excluded from society due to poverty and inequality? 1-10.

- 1. Poverty and inequality are extensive and structurally ingrained.
- 4. Poverty and inequality are pronounced and partly structurally ingrained.
- 7. Poverty and inequality are limited and barely structurally ingrained.

10. Poverty and inequality are minor and not structurally ingrained.

 115 Max. Year: 2015
 Min. Year: 2005 Max. Year: 2017

 N: 128
 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.38 bti sel Socio-Economic Level

Socio-Economic Level: In principle, the country's level of development permits adequate freedom of choice for all citizens 1-10.

**N**: 128

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.39 bti si State Identity

To what extent do all relevant groups in society agree about citizenship and accept the nation-state as legitimate? 1-10.

1. The legitimacy of the nation-state is questioned fundamentally. Different population groups compete for hegemony and deny citizenship to others.

4. The legitimacy of the nation-state is frequently challenged. Signifi cant aspects of citizenship are withheld from entire population groups.

7. The legitimacy of the nation-state is rarely questioned. Some groups are denied full citizenship rights.

10. The large majority of the population accepts the nation-state as legitimate. All individuals and groups enjoy the right to acquire citizenship without discrimination.

#### 4.14.40 bti sop Separation of Powers

To what extent is there a working separation of powers (checks and balances)? 1-10.

1. There is no separation of powers, neither de jure nor de facto.

4. One branch, generally the executive, has an ongoing and either informally or formally confirmed monopoly on power, which may include the colonization of other powers, even though they are institutionally differentiated.

7. The separation of powers generally is in place and functioning. Partial or temporary restrictions of checks and balances occur, but a restoration of balance is sought.

10. There is a clear separation of powers with mutual checks and balances.

#### 4.14.41 bti ssn Social Safety Nets

To what extent do social safety nets provide compensation for social risks? 1-10.

1. Social safety nets do not exist. Poverty is combated hardly at all, or only ad hoc.

4. Social safety nets are rudimentary and cover only few risks for a limited number of beneficiaries. The majority of the population is at risk of poverty.

7. Social safety nets are well developed, but do not cover all risks for all strata of the population. A significant part of the population is still at risk of poverty.

10. Social safety nets are comprehensive and compensate for social risks, especially nationwide health care and a well-focused prevention of poverty.

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.14.42 bti st Stateness

Stateness: There is clarity about the nation's existence as a state with a dequately established and differentiated power structures 1-10

#### 4.14.43 bti\_su Sustainability

Economic growth is balanced, environmentally sustainable and future-oriented. Including "To what extent are environmental concerns effectively taken into account in both macro- and microeconomic terms?" and "To what extent are there solid institutions for basic, secondary and tertiary education, as well as for research and development?".

Min. Year:2015 Max. Year: 2015 N: 128

#### 4.14.44 bti wr Welfare Regime

Welfare Regime: Assesses whether there are available arrangements to compensate for social risks 1-10.

Min. Year:2005 Max. Year: 2017 N: 129 n: 881  $\overline{N}$ : 68  $\overline{T}$ : 7

#### 4.15 Forman-Rabinovici and Sommer

https://people.socsci.tau.ac.il/mu/udis/the-comparative-abortion-index-project/ (Forman-Rabinovici & Sommer, 2018) (Data downloaded: 2019-01-24)

#### The Comparative Abortion Index Project

The comparative abortion index quantifies the permissiveness of abortion policies worldwide, accounting for a variety of considerations. It aims to provide researchers with a tool to assess trends in worldwide reproductive rights, and to study how these changes over time and space occur. It is unique in its breadth and its method. Not only does it include a scale that reflects the number of criteria accepted as grounds for abortion, but it includes a second scale which gives weighted scores to each criterion, based on how common it is. These data are relevant for anyone interested in tracking trends in women's rights, public health policy, and reproductive rights policy over time.

The dataset covers 192 countries from 1992-2013. The UN Department of Social and Economic

Affairs has published a global review of abortion policy since 1992. For this database, all reviews published between 1992 and 2013 were collected. The report offers seven criteria under which state law may allow access to abortion services; saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons and on request.

Each country-year is given a score based on the number of legal criteria accepted as grounds for abortion. In the first version of the index (CAI1), each criterion is given equal weight and the score is a direct reflection of the number of conditions the country accepts. Thus, a country that has no conditions under which a woman can receive an abortion gets a score of 0. A country, in which a woman may access an abortion under all conditions including on request, receives a score of 7.

For the purposes of robustness U and to fix a potential measurement flaw in the first index U we also offer a weighted index (CAI2). The first scale does not account for the different degrees of acceptance that each criterion represents. It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Accordingly, the weight of each criterion (Wi) will be determined based on the percentage (Pi) of countries that allow that condition. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request.

#### 4.15.1 cai cail Comparative Abortion Index 1 (0 to 7)

The scale quantifies grounds on which a country might grant legal access to abortion: saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons, and on request. 0 represents a country with a complete ban on abortions. 7 represents a country that allows abortions on request

**N**: 192

Min. Year:1992 Max. Year: 2013 N: 194 n: 4146  $\overline{N}$ : 188  $\overline{T}$ : 21

#### 4.15.2 cai cai2 Comparative Abortion Index 2 (0 to 1)

Using the 7 grounds for legal abortion, the weight of each grounds (Wi) will be determined based on the percentage (Pi) of countries that allow it. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request. The need for a weighted scale is as follows: It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Thus, the scale accounts for the different degrees of acceptance that each criterion represents.

Min. Year:1992 Max. Year: 2013 N: 194 n: 4146  $\overline{N}$ : 188  $\overline{T}$ : 21

#### 4.15.8 cai request Abortion is available on request

Binary variable that codes whether abortion is available on request. In other words, if there is complete legal access to abortion. 1 implies that there is complete access to abortion. 0 implies that there are limitations, and abortion services are not legally available upon request.

Min. Year:1992 Max. Year: 2013 N: 194 n: 4146  $\overline{N}$ : 188 $\overline{T}$ : 21

#### 4.15.9 cai\_social Social or economic reasons are accepted as grounds for a legal abortion

Binary variable that codes whether or not social or economic reasons are accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Min. Year:2013 Max. Year: 2013 N: 192

Min. Year:1992 Max. Year: 2013 N: 194 n: 4146  $\overline{N}$ : 188 $\overline{T}$ : 21

#### 4.16 Coppedge, Alvarez and Maldonado

http://www3.nd.edu/~mcoppedg/crd/datacrd.htm (Coppedge et al., 2008) (Data downloaded: 2018-07-19)

#### Contestation and Inclusiveness, 1950-2000

These are the two principal components of 13-15 indicators of democracy, including those compiled by Freedom House; Polity; Arthur Banks; Alvarez, Cheibub, Limongi, and Przeworski, as updated by Cheibub and Gandhi; Bollen; and Cingranelli and Richards. The dataset covers most countries in the world from 1950 through 2000. In an article in the Journal of Politics (July 2008), the authors argue that these principal components, which capture 75 percent of variation in the most commonly used democracy indicators, measure Robert Dahl's two dimensions of polyarchy: contestation and inclusiveness.

#### 4.16.1cam contest Contestation (standardized version)

Contestation standardized to be comparable across years.

#### 4.16.2cam inclusive Inclusiveness (standardized version)

Inclusiveness standardized to be comparable across years.

N: 205 n: 7391  $\overline{N}$ : 145  $\overline{T}$ : 36

#### 4.17The Comparative Constitutions Project

http://comparativeconstitutionsproject.org/ (Elkins et al., 2014) (Data downloaded: 2018-09-11)

#### **Characteristics of National Constitutions**

This dataset presents records of the characteristics of national constitutions written since 1789. Each constitutional text is coded twice by different coders working independently. To maximize the reliability of the final data, the discrepancies between these two codings are reconciled by a third individual - a reconciler. This is the second public release of data (version 2.0) on the content of constitutions. Authors rely on Ward and Gleditsch's list to identify which countries are independent in a given year.
There are utilized two concepts to categorize constitutional texts. A constitutional system encompasses the period in which a constitution is in force before it is replaced or suspended. A constitutional event is any change to a country's constitution, including adoption, amendment, suspension, or reinstatement. For years in which there are multiple events, the constitution is coded as it stood in force at the end of the year. For example, if a constitution was amended the same year as it was adopted, the content of the constitution is coded as amended rather than as originally adopted. In addition, since events are (often) in force for multiple years, authors interpolated the data associated each event across all country-years in which that event was in force. Note that this is an extremely conservative interpolation strategy because most constitutional amendments do not change many provisions. As a result, for most variables, one can safely interpolate across constitutional systems.

#### 4.17.1 ccp buildsoc Duty of the People is to Build Country in Constitution

Does the constitution refer to a duty of the people to take part in building society or to work for the development of the country?

#### 4.17.2 ccp cc Corruption Commission Present in Constitution

Does the constitution contain provisions for a counter corruption commission?

- Yes
   No

#### **Classification of Political Regimes**

Classification of political regimes as democracy and dictatorship. Classification of democracies as parliamentary, semi-presidential (mixed) and presidential. Classification of dictatorships as military, civilian and royal.

#### 4.18.1 chga demo Democracy

A regime is considered a democracy if the executive and the legislature is directly or indirectly elected by popular vote, multiple parties are allowed, there is de facto existence of multiple parties outside of regime front, there are multiple parties within the legislature, and there has been no consolidation of incumbent advantage (e.g. unconstitutional closing of the lower house or extension of incumbent's term by postponing of subsequent elections). Transition years are coded as the regime that emerges in that year.

0. No Democracy

1. Democracy

# Variable not included in Cross-Section Data

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.18.2 chga hinst Regime Institutions

Six-fold classification of political regimes:

- 0. Parliamentary Democracy.
- 1. Mixed (semi-presidential) democracy.
- 2. Presidential democracy.
- 3. Civilian dictatorship.
- 4. Military dictatorship.
- 5. Royal dictatorship.

#### 4.19 Cingranelli and Richards

http://www.humanrightsdata.com/ (Cingranelli et al., 2014) (Data downloaded: 2018-09-11)

#### The Cingranelli-Richards (CIRI) Human Rights Dataset

The CIRI Human Rights Dataset (version 2014.04.14) contains standards-based quantitative information on government respect for 15 internationally recognized human rights for 202 countries, annually from 1981-2011. It is designed for use by scholars and students who seek to test theories about the causes and consequences of human rights violations, as well as policy makers and analysts who seek to estimate the human rights effects of a wide variety of institutional changes and public policies including democratization, economic aid, military aid, structural adjustment, and humanitarian intervention.

Note: The three different missing codes -66 (country is occupied by foreign powers), -77 (complete collapse of central authority), -999 (missing) have all been coded as missing.

#### 4.19.1 ciri assn Freedom of Assembly and Association

It is an internationally recognized right of citizens to assemble freely and to associate with other persons in political parties, trade unions, cultural organizations, or other special-interest groups. This variable indicates the extent to which the freedoms of assembly and association are subject to actual governmental limitations or restrictions (as opposed to strictly legal protections).

0. Citizens' rights to freedom of assembly or association were severely restricted or denied completely to all citizens

1. These rights were limited for all citizens or severely restricted or denied for select groups

2. These rights were virtually unrestricted and freely enjoyed by practically all citizens

**Min. Year**:1981 **Max. Year**: 2011 **N**: 201 **n**: 4927  $\overline{N}$ : 159  $\overline{T}$ : 25

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.19.2 ciri\_disap Disappearance

Disappearances are cases in which people have disappeared, political motivation appears likely, and the victims have not been found. Knowledge of the whereabouts of the disappeared is, by definition, not public knowledge. However, while there is typically no way of knowing where victims are, it is typically known by whom they were taken and under what circumstances.

- 0. Disappearances have occurred frequently
- 1. Disappearances occasionally occurred
- 2. Disappearances did not occur

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011 N: 201 n: 4918  $\overline{N}$ : 159  $\overline{T}$ : 24

#### 4.19.3 ciri dommov Freedom of Domestic Movement

This variable indicates citizens' freedom to travel within their own country.

0. Freedom was severely restricted

- 1. Freedom was somewhat restricted
- 2. Freedom of foreign movement

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011 N: 201 n: 5507  $\overline{N}$ : 178  $\overline{T}$ : 27

#### 4.19.4 ciri\_elecsd Electoral Self-Determination

This variable indicates to what extent citizens enjoy freedom of political choice and the legal right and ability in practice to change the laws and officials that govern them through free and fair elections. This right is sometimes known as the right to selfdetermination.

0. The right to self-determination through free and fair elections did not exist in law or practice

1. While citizens had the legal right to self-determination, there were some limitations to the fulfillment of this right in practice. Therefore, in states receiving a 1, political participation was only moderately free and open.

2. Political participation was very free and open and citizens had the right to self-determination through free and fair elections in both law and practice

#### 4.19.9 ciri kill Extrajudicial Killing

Extrajudicial killings are killings by government officials without due process of law. They include murders by private groups if instigated by government. These killings may result from the deliberate, illegal, and excessive use of lethal force by the police, security forces, or other agents of the state whether against criminal suspects, detainees, prisoners, or others.

- 0. Extrajudicial killings were practiced frequently
- 1. Extrajudicial killings were practiced occasionally
- 2. Such killings did not occur

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011 N: 201 n: 4916  $\overline{N}$ : 159 $\overline{T}$ : 24

#### 4.19.10 ciri\_move\_old Freedom of Movement (Old)

This variable indicates citizens' freedom to travel within their own country and to leave and return to that country.

0. Domestic and foreign travel was restricted

1. Such travel was generally unrestricted.

Note: Starting with the 2007 coding, this variable was retired and became two separate variables, ciri dommov Freedom of Domestic Movement and ciri formov Freedom of International Movement.

N: N/A Min. Year: N/A Max. Year: N/A

**Nin. Year**: 1981 Max. Year: 20. **N**: 200 **n**: 3980  $\overline{N}$ : 133  $\overline{T}$ : 20

#### 4.19.11 ciri\_physint Physical Integrity Rights Index

This is an additive index constructed from the Torture, Extrajudicial Killing, Political Imprisonment, and Disappearance indicators. It ranges from 0 (no government respect for these four rights) to 8 (full government respect for these four rights).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011 N: 201 n: 4900  $\overline{N}$ : 158  $\overline{T}$ : 24

#### 4.19.12 ciri\_polpris Political Imprisonment

Political imprisonment refers to the incarceration of people by government officials because of: their speech; their non-violent opposition to government policies or leaders; their religious beliefs; their non-violent religious practices including proselytizing; or their membership in a group, including an ethnic or racial group.

0. There were many people imprisoned because of their religious, political, or other beliefs

- 1. A few people were imprisoned
- 2. No persons were imprisoned for any of the above reasons

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011 N: 201 n: 4923  $\overline{N}$ : 159  $\overline{T}$ : 24

#### 4.19.13 ciri\_relfre\_new Freedom of Religion (New)

This variable indicates the extent to which the freedom of citizens to exercise and practice their religious beliefs is subject to actual government restrictions. Citizens should be able to freely practice their religion and proselytize (attempt to convert) other citizens to their religion as long as such attempts are done in a non-coercive, peaceful manner.

- 0. The government restrictions on religious practices are severe and widespread
- 1. Such practices are moderate
- 2. Such practices are practically absent

### 4.19.14 ciri relfre old Freedom of Religion (Old)

This variable indicates the extent to which the freedom of citizens to exercise and practice their religious beliefs is subject to actual government restrictions. Citizens should be able to freely practice their religion and proselytize (attempt to convert) other citizens to their religion as long as such attempts are done in a non-coercive, peaceful manner.

0. The government restricted some religious practices,

1. The government placed no restrictions on religious practices.

Note: Starting with the 2007 coding, this variable was retired.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.19.15 ciri speech Freedom of Speech

This variable indicates the extent to which freedoms of speech and press are affected by government censorship, including ownership of media outlets. Censorship is any form of restriction that is placed on freedom of the press, speech or expression. Expression may be in the form of art or music.

- 0. Government censorship of the media was complete
- 1. There was some government censorship of the media
- 2. There was no government censorship of the media

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011 N: 201 n: 4932  $\overline{N}$ : 159  $\overline{T}$ : 25

#### 4.19.16 ciri\_tort Torture

Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, by government officials or by private individuals at the instigation of government officials. Torture includes the use of physical and other force by police and prison guards that is cruel, inhuman, or degrading. This also includes deaths in custody due to negligence by government officials.

- 0. Torture was practiced frequently
- 1. Torture was practiced occasionally
- 2. Torture did not occur

Min. Year:1981 Max. Year: 2011 N: 201 n: 4922  $\overline{N}$ : 159  $\overline{T}$ : 24

### $\mathbf{N}:$ N/A Min. Year: N/A Max. Year: N/A

#### 4.19.17 ciri\_wecon Women's Economic Rights

Women's economic rights include a number of internationally recognized rights. These rights include: Equal pay for equal work, Free choice of profession or employment without the need to obtain a husband or male relative's consent, The right to gainful employment without the need to obtain a husband or male relative's consent, Equality in hiring and promotion practices, Job security (maternity leave, unemployment benefits, no arbitrary firing or layoffs, etc...), Non-discrimination by employers, The right to be free from sexual harassment in the workplace, The right to work at night, The right to work in occupations classified as dangerous, The right to work in the military and the police force.

0. There were no economic rights for women in law and that systematic discrimination based on sex may have been built into law

1. Women had some economic rights under law, but these rights were not effectively enforced

2. Women had some economic rights under law, and the government effectively enforced these rights in practice while still allowing a low level of discrimination against women in economic matters

3. All or nearly all of women's economic rights were guaranteed by law and the government fully and vigorously enforces these laws in practice

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.19.18 ciri wopol Women's Political Rights

Women's political rights include a number of internationally recognized rights. These rights include: The right to vote, The right to run for political office, The right to hold elected and appointed government positions, The right to join political parties, The right to petition government officials.

- 0. Women's political rights were not guaranteed by law
- 1. Women's political rights were guaranteed in law, but severely prohibited in practice
- 2. Women's political rights were guaranteed in law, but were still moderately prohibited in practice
- 3. Women's political rights were guaranteed in both law and practice

Min. Year:1981 Max. Year: 2011 N: 201 n: 4915  $\overline{N}$ : 159  $\overline{T}$ : 24

#### **Comparative Political Data Set**

The Comparative Political Data Set 1960-2014 (CPDS) is a collection of political and institutional data which have been assembled in the context of the research projects "Die Hand-lungsspielräume des Nationalstaates" and "Critical junctures. An international comparison" directed by Klaus Armingeon and funded by the Swiss National Science Foundation. This data set consists of (mostly) annual data for 36 democratic OECD and/or EU-member countries for the period of 1960 to 2013. In all countries, political data were collected only for the democratic periods. The data set is suited for cross-national, longitudinal and pooled time-series analyses.

#### 4.20.1 cpds chg Number of changes in government per year

Number of changes in government per year [termination of government due to (a) elections, (b) voluntary resignation of the Prime Minister, (c) resignation of Prime Minister due to health reasons, (d) dissension within government (break up of the coalition), (e) lack of parliamentary support, (f) intervention by the head of state, or (g) broadening of the coalition (inclusion of new parties).

#### 4.20.28 cpds tg Type of Government

Type of government based on the following classification:

1. Single-party majority government: One party takes all governments seats and has a parliamentary majority.

2. Minimal winning coalition: All participating parties are necessary to form a majority government [>50.0%].

3. Surplus coalition: Coalition governments which exceed the minimal-winning criterion [>50.0%].

4. Single-party minority government: The party in government does not possess a majority in Parliament [<50.0%].

5. Multi-party minority government: The parties in government do not possess a majority in Parliament [<50.0%].

6. Caretaker government: Governments which should simply maintain the status quo.

7. Technocratic government: Led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo.

### 4.21 Comparative Study of Electoral Systems (CSES)

#### http://www.cses.org/

(The Comparative Study of Electoral Systems, 2015a) (The Comparative Study of Electoral Systems, 2015b) (The Comparative Study of Electoral Systems, 2015c) (The Comparative Study of Electoral Systems, 2017) (Deta dominant data 2018 00 12)

(Data downloaded: 2018-09-13)

#### **CSES** dataset

CSES is a collaborative program of research among election study teams from around the world. Participating countries include a common module of survey questions in their post-election studies. The resulting data are deposited along with voting, demographic, district and macro variables. The studies are then merged into a single, free, public dataset for use in comparative study and cross-level analysis. The research agenda, questionnaires, and study design are developed by an international committee of leading scholars of electoral politics and political science. The design is implemented in each country by their foremost social scientists.

Note: Portugal 2002 from the initial data Module 1 was exluded, as this module provide data until 2001, therefore these observations are coded incorrectly.

#### 4.21.1 cses\_pc Close to Political Party

Do you usually think of yourself as close to any particular party? Share of the population who answered Yes.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

Min. Year:1996 Max. Year: 2016 N: 53 n: 164  $\overline{N}$ : 8  $\overline{T}$ : 3

#### 4.21.2 cses sd Satisfaction with Democracy

On the whole, are you very satisfied, fairly satisfied, not very satisfied, or not at all satisfied with the way democracy works in [COUNTRY]?

- 1. Not at all satisfied.
- 2. Not very satisfied.
- 3. Fairly satisfied.
- 4. Very satisfied.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

Min. Year:1996 Max. Year: 2016 N: 52 n: 160  $\overline{N}$ : 8  $\overline{T}$ : 3

#### 4.22 Center of Systemic Peace

http://www.systemicpeace.org/inscrdata.html (Marshall & Elzinga-Marshall, 2017) (Data downloaded: 2018-11-09)

#### State Fragility Index and Matrix

The original data provides the State Fragility Indices and the eight component indicators.

#### 4.22.1 cspf sfi State Fragility Index

State fragility index. A country's fragility is closely associated with its state capacity to manage conflict; make and implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. = Effectiveness Score + Legitimacy Score (25 points possible).

Min. Year:2015 Max. Year: 2015 N: 166

Min. Year:1995 Max. Year: 2017 N: 168 n: 3783  $\overline{N}$ : 164  $\overline{T}$ : 23

#### 4.23 Vincenzo Emanuele

http://www.vincenzoemanuele.com/dataset-of-electoral-volatility.html (Emanuele, 2015) (Data downloaded: 2018-07-09)

#### Dataset of Electoral Volatility in Western Europe

This dataset provides data on electoral volatility and its internal components in parliamentary elections (lower house) in 20 countries of Western Europe for the period 1945-2015. It covers the entire universe of Western European elections held after World War II under democratic regimes. Data for Greece, Portugal and Spain have been collected after their democratizations in the 1970s. Altogether, a total of 347 elections (or, more precisely, electoral periods) are included. When several elections were held in a single year, the data for the last election is included in the QoG dataset.

#### 4.23.1 dev altv1 Electoral Volatility - Parties above 1%

Electoral volatility caused by vote switching between existing parties, namely parties receiving at least 1% of the national share in both elections under scrutiny.

#### 4.23.2 dev othv1 Electoral Volatility - Parties below 1%

Electoral volatility caused by vote switching between parties falling below 1% of the national share in both the elections at time t and t+1. It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1% and then comparing the overall sum at time t and t+1. Conversely, each party's volatility is counted separately - up to a specification of 0.1% - and then added to the calculation of dev\_othy. This choice has been made to avoid underestimation of Total Volatility but at the same time to maintain a distinction between parties above 1% and parties below 1% for the calculation of the two components of dev\_regy and dev\_alty.

#### 4.23.3 dev regv1 Electoral Volatility - Parties entering/exiting party system

Electoral volatility caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1% of the national share in election at time t+1 (while it received less than 1% in election at time t). Conversely, a party is considered as exiting the part system where it receives less than 1% in election at time t+1 (while it received less than 1% in election at time t+1 (while it received at least 1% in election at time t).

#### 4.23.4 dev tv1 Electoral Volatility - Total

Total electoral volatility in the party system, given by the sum of the previous measures.  $dev_regv + dev_altv + dev_othv = dev_tv$ .

Min. Year:2013 Max. Year: 2017 N: 20

#### 4.24 Andrew Williams

https://andrewwilliamsecon.wordpress.com/datasets/ (Williams, 2015) (Data downloaded: 2018-07-09)

#### Dataset for Information and Accountability Transparency (2014)

The article "A global index of information transparency and accountability" (Williams, 2014) uses a relatively new methodology, similar to Transparency International's Corruption Perceptions Index, to construct composite indicators of Informational Transparency, and Accountability. These new indicators use data from 29 sources, with scores being derived annually between 1980 and 2010 across more than 190 countries.

#### 4.24.1 diat\_ati Accountability Transparency

Accountability Transparency. Author has 16 separate indicators for the Accountability Transparency Index (six for the measurement of a free media, four for fiscal transparency, and six for political constraints). 1980 is considered to be the base year. The Accountability Transparency Index has 115 countries in 1980, but rising to up to 189 countries towards the end of the period.

Min. Year:1980 Max. Year: 2010 N: 191 n: 4935  $\overline{N}$ : 159  $\overline{T}$ : 26

#### 4.24.2 diat iti Information Transparency

N: N/A Min. Year: N/A Max. Year: N/A

Information Transparency. Sub-indicators are constructed to reflect the nuances of this type of transparency. Specifically, three sub-components are constructed: (1) the existence of a free and independent media; (2) fiscal (budgetary) transparency; (3) political constraints. Author has 13 separate indicators for the Information Transparency Index (six for the quantity of information, four for the processes that generate that information, and three for the infrastructure required to disseminate that information). 1980 is considered to be the base year. The Information Transparency Index (ITI) has scores for initially 153 countries in 1980, increasing over time to 191 by the year 2010.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1980 Max. Year: 2010 N: 191 n: 5343  $\overline{N}$ : 172  $\overline{T}$ : 28

#### 4.24.3 diat ti Transparency Index

Transparency Index. Combined index of Information Transparency Index and Accountability Transparency Index.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1980 Max. Year: 2010 N: 188 n: 4861  $\overline{N}$ : 157  $\overline{T}$ : 26

#### 4.25 Inter-American Development Bank

https://publications.iadb.org/handle/11319/8806 (Scartascini et al., 2018) (Data downloaded: 2018-08-13)

#### **Database of Political Institutions 2017**

The Database of Political Institutions (DPI) was compiled by the Development Research Group of the World Bank for research in comparative political economy and comparative political institutions. Please note that the missing codes (-999, -888) has been recoded to missing (.).

Corrections for this round cover 78 different countries and 27 different variables. This round of corrections continues work done on the party variables from the previous update (for example, an additional 50 changes were made to EXECAGE and 29 changes to the other party age variables). New to this round of corrections are 39 changes to the coding of LIEC for consistency, covering 24 countries.

#### 4.25.1 dpi author Government Authority over taxing, spending or legislating

Do the state/provinces have authority over taxing, spending, or legislating? If any of these categories gets a 1. Authority over "cultural affairs", or "planning" in Communist systems, does not qualify.

Min. Year:1975 Max. Year: 2017 N: 74 n: 2451  $\overline{N}$ : 57  $\overline{T}$ : 33

#### 4.25.2 dpi auton Autonomous Regions

Are there autonomous regions? Autonomous regions are not the same as states, provinces, etc. An autonomous region is recorded if a source explicitly mentions a region, area, or district that is autonomous or self-governing. Furthermore, they must be constitutionally designated as "autonomous" or "independent" or "special". Federal Districts or Capital Districts do not count as autonomous regions. Disputed autonomy is not recorded. Indian reservations are not counted as autonomous.

Note: This variable is deviating from convention, no information recorded as 0.

#### 4.25.3 dpi cemo Is Chief Executive a Military Officer?

Is Chief Executive a military officer? "1" if the source includes a rank in their title, "0" otherwise. If chief executives were described as officers with no indication of formal retirement when they assumed office, they are always listed as officers for the duration of their term. If chief executives were formally retired military officers upon taking office, then this variable gets a "0".

Min. Year:2015 Max. Year: 2016 N: 175

Min. Year:1975 Max. Year: 2017 N: 183 n: 7048  $\overline{N}$ : 164  $\overline{T}$ : 39

#### 4.25.4 dpi checks Checks and Balances

Checks and Balances. Equals one if LIEC OR EIEC is less than 6 (5 for CHECKS\_LAX)U.e., countries where legislatures are not competitively elected are considered countries where only the executive wields a check

Min. Year:1975 Max. Year: 2017 N: 183 n: 6882  $\overline{N}$ : 160  $\overline{T}$ : 38

#### 4.25.5 dpi cl Closed List

Are closed lists used? (1 if yes, 0 if no) When PR is "1", closed list gets a "1" if voters cannot express preferences for candidates within a party list, 0 if voters can. If PR is "NA" or 0, and Mean District Magnitude =1, Closed list is NA. If PR is "NA" or 0 and Mean District Magnitude is greater than one, the following rules apply: 1) If only one party takes seats, closed list is: "0" (open list), if the number of candidates is greater than the number of seats in an electoral district in a one-party state where other parties may or may not be illegal (LIEC is 4 or 5), "1" (closed list), if the number of candidates equals the number of seats in an electoral district in a one party state where other parties are illegal (LIEC is 3), blank ,if it is unclear whether there is more than one candidate for every seat in an electoral district in a one-party state where other parties are illegal (LIEC is 3.5). 2) If there are multiple parties taking seats, closed list is blank unless the system is explicitly stated as open or closed.

#### 4.25.6 dpi dhondt D'Hondt System

Is the D'Hondt system used? (1 if yes, 0 if no) Is the D'Hondt rule used to allocate seats in a PR system? NA if PR is 0 or NA. If PR is 1, and information is only available from IPU, just record data in 1995.

Min. Year:1975 Max. Year: 2017 N: 102 n: 2921  $\overline{N}$ : 68  $\overline{T}$ : 29

#### 4.25.7 dpi dmmo Is Defense Minister a Military Officer?

Is Defense Minister a Military Officer? Same as in dpi\_cemo If no one in the cabinet with such responsibility, or if there are no armed forces, then "NA". If there is no defense minister but the chief executive controls military directly, then same answer as in dpi\_cemo.

Min. Year:2013 Max. Year: 2016 N: 166

Min. Year:1975 Max. Year: 2017 N: 175 n: 6283  $\overline{N}$ : 146  $\overline{T}$ : 36

#### 4.25.8 dpi eage Age of Chief Executive Party

Time since formation under this name. NA if executive is not affiliated with a party. We record party age from the first year that the party was founded under its current name (which can be before a country achieves independence). For parties undergoing a name change or emerging from existing parties, the subsequent party is considered a new party except in the cases where the sources report that the change was superficial. We define a name change as "superficial" if the party leaders, platform, and constituency remained the same. In nearly all cases of a name change, the sources explicitly identify substantive differences in the new party compared to the old, ranging from a change in leadership to change in program. Mergers with other parties are not counted as changes unless name is changed. If several parties come together to form an alliance under a new name, this is counted as a new party.

#### 4.25.9 dpi eipc Executive Electoral Competitiveness

Uses same scale as Legislative IEC. Executives who are: 1) Elected directly by population, or 2) Elected by an electoral college that is elected by the people and has the sole purpose of electing the executive, are scored on the above scale. Executives elected by bodies other than these are given the same score that the electing body would get. Even if the electing body is not the actual "legislature" that is tracked in the LIEC (such as an appointed electoral college), the competitiveness of that body is used to score the executive. This means that competitively elected prime ministers get 6 or 7. The chief executives of Communist nations (the chairman of the Communist Party) is given a 3, because they are elected by the Party Congress, electing bodies which they do not appoint. Executives elected by small, appointed juntas or by appointed electoral colleges get 2. Rival chief executives in one country, particularly in the setting of armed conflicts, are counted as No executives, and thus score a 1. Referenda and votes by "popular acclamation" on unelected executives are scored as 3. If executives unilaterally extend their terms of office, they get a 2 starting in the year they should have held elections. Any executive elected for life, even by the people or an elected assembly, gets a 2. This elected-for-life rule is slightly different from that followed for legislatures that unilaterally extend their rule. If chief executive takes office through a coup and remains in office without an election, EIEC is 2 because the executive is unelected. If an elected president is impeached and the vice-president succeeds the presidency in a legal and proper way, EIEC remains as was. If EIEC was 7 under the old president, it remains 7 under the new president. For "Electoral Rules" variables: all get an NA if the LIEC is 1. If LIEC is 2, then legislature is unelected and we infer that district magnitude is NA. If LIEC is less than or equal to 4, then PR is also NA irrespective of district magnitude. If LIEC is less than or equal to 3.5, then both PR and Plurality are NA. In order to assess electoral rules we use the IPU website as well as the Europa Yearbook (and to a lesser extent Banks). IPU has the most recent information whereas Europa has information up to 1984, and from 1990 to 1994. If there are discrepancies between Europa (to 1984) and IPU (1998), we assume that changes have occurred, and only input the IPU information for 1995, leaving blanks from 1985 to 1994. If the IPU matched the Europa exactly, we assumed no changes took place, and filled in the intervening years. In the event that a system changed and then switched back, this introduces errors. Since this assumption was made only when institutions from 1984 matched those in 1998, these cases are limited to very stable democracies.

Min. Year:1975 Max. Year: 2017 N: 183 n: 7044  $\overline{N}$ : 164  $\overline{T}$ : 38

#### 4.25.10 dpi\_erlc Chief Executive Party Orientation

Party orientation with respect to economic policy, coded based on the description of the party in the sources, using the following criteria: Right: for parties that are defined as conservative, Christian democratic, or right-wing. Left: for parties that are defined as communist, socialist, social democratic, or left-wing. Center: for parties that are defined as centrist or when party position can best be described as centrist (e.g. party advocates strengthening private enterprise in a social-liberal context). Not described as centrist if competing factions "average out" to a centrist position (e.g. a party of "right-wing Muslims and Beijing-oriented Marxists"). 0: for all those cases which do not fit into

the above-mentioned category (i.e. party's platform does not focus on economic issues, or there are competing wings), or no information.

- 1. Right
- 2. Center
- 3. Left

Note: Missing (-999) and No Information (0) have been coded as missing (.).

Min. Year:1975 Max. Year: 2017 N: 143 n: 4126  $\overline{N}$ : 96  $\overline{T}$ : 29

#### 4.25.11 dpi\_exelec Presidential Election Held

"1" if there was an executive election in this year.

Min. Year:1975 Max. Year: 2017 N: 183 n: 7060  $\overline{N}$ : 164  $\overline{T}$ : 39

#### 4.25.12 dpi\_finter Finite Term in Office

Is there a finite term in office? (1 if yes, 0 if no) Is there a constitutional limit on the number of years the executive can serve before new elections must be called? Deviating from the convention, a 0 is recorded if a limit is not explicitly stated. This gets a 0 in the cases where the constitution with year limits is suspended or unenforced.

**N**: 173

Min. Year:1975 Max. Year: 2017 N: 182 n: 6952  $\overline{N}$ : 162  $\overline{T}$ : 38

#### 4.25.13 dpi fraud Vote Fraud

Were vote fraud or candidate intimidation serious enough to affect the outcome of elections? This variable captures extra-constitutional irregularities, which are recorded only if mentioned in sources. 0 reported for countries where, for example, opposition parties are officially and constitutionally banned or where irregularities are not mentioned (although may still exist); "1" when opposition is officially legal but suppressed anyway. If not an election year, or if elected government has been deposed, refers to most recent election (i.e. the only way to get rid of a "1" is to hold a fair election). Recording is irrespective of whether only opposition claims that fraudulent elections have occurred or whether allegations are backed by independent international observers. Recorded also are any forms of boycotts carried out by important parties before or after parliamentary elections. In the cases
where irregularities are mentioned in the text of the sources, they were recorded. However, there may have been instances of fraud/violence that were not reported, thus resulting in false negatives.

Min. Year:2015 Max. Year: 2015 N: 161

Min. Year:1975 Max. Year: 2017 N: 173 n: 5962  $\overline{N}$ : 139  $\overline{T}$ : 34

#### 4.25.14 dpi gf Government Fractionalization Index

The probability that two deputies picked at random from among the government parties will be of different parties. Equals NA if there is no parliament. If there are any government parties where seats are unknown (cell is blank), GOVFRAC is also blank. No parties in the legislature (0 in 1GOVSEAT) results in NA, just as in the Herfindahl.

Min. Year:2014 Max. Year: 2017 N: 174

#### 4.25.29 dpi hlio Party of Chief Executive Length of Time in Office

Party of chief executive has been how long in office. Same rules as dpi\_yio. NA if there are no parties, if the chief executive is an independent, or if the "party" is the army. In general, the counting restarts from 1 for a party if its name changes. However, in a few cases the sources indicated that party leadership, membership, and platform remained the same following the name change. In these cases, the name change was recorded but the year count did not restart. All of these cases are noted in the database.

#### 4.25.30 dpi housesys Electoral Rule House

Which electoral rule (proportional representation or plurality) governs the election of the majority of House seats? This is coded 1 if most seats are Plurality, zero if most seats are Proportional. In cases where the majority of legislators are appointed or indirectly elected, the variable is coded Indirect.

Min. Year:2015 Max. Year: 2015 N: 160

### 4.25.32 dpi\_lipc Legislative Electoral Competitiveness

- 1. No legislature
- 2. Unelected legislature
- 3. Elected, 1 candidate
- 4. 1 party, multiple candidates
- 5. Multiple parties are legal but only one party won seats
- 6. Multiple parties DID win seats but the largest party received more than 75% of the seats

7. Largest party got less than 75%. In the case of "Front" parties (as in many Communist nations), the same criteria as in the legislature is used to separate single from multiple parties.

Voting irregularities are picked up elsewhere, and are ignored here. If an elected legislature exists but parties are banned (i.e. a legislature made up of independents), the legislature gets a 4. Constituent assemblies, if convened for the sole purpose of drafting a constitution, are not counted as legislatures (i.e. system gets a 1 if there are no other assemblies). Appointed advisory councils (frequently used in the Middle East and North Africa) are given a 2, but only if they have legislative power. If it is unclear whether there is competition among elected legislators in a single-party system, a "3.5" is recorded. If multiple parties won seats but it is unclear how many the largest party got, a "6.5" is recorded. If it is not clear whether multiple parties ran and only one party won or multiple parties ran and won more than 75% of the seats, a "5.5" is recorded Assemblies that are elected with indefinite (or life-long) terms are scored based on their competitiveness, then marked down by one. Assemblies that are elected by other groups are scored based on the competitiveness of those groups. If an assembly is partly elected and party appointed, we score based on how the majority is decided. Assemblies operating under conditions of civil war or where there are power struggles within a country, with the result that its institutions do not control most of the territory or the most important parts of the territory, are scored as 1. This is irrespective of how competitively the assembly has been elected and its formal powers. Even if the right to vote or the right to run for office is restricted to a small sub-group of the population, we still score according to the normal system and make a note.

Min. Year:2014 Max. Year: 2015 N: 175

#### 4.25.33 dpi\_maj Margin of Majority

This is the fraction of seats held by the government. It is calculated by dividing the number of government seats (NUMGOV) by total (government plus opposition plus non-aligned) seats.

#### 4.25.34 dpi\_mdmh Mean District Magnitude House

Mean District Magnitude House. The weighted average of the number of representatives elected by each constituency size, if available. If not, we use the number of seats divided by the number of constituencies (if both are known). If the constituencies are the provincial or state divisions, we use the number of states or provinces to make this calculation for as long as we know this number and the number of seats. If the only information we have on the number of constituencies comes from the Inter Parliamentary Union (IPU), and the constituencies are not the states/provinces, then we use IPU's number to calculate the Mean District Magnitude for 1995, and leave all unknowns blank. If we have no positive data on district magnitude, we extrapolate backwards from the last year that we do have positive data until we run into a constitutional overhaul or an electoral law change that is either a) mentioned in both sources or b) explicitly says that MDMH changed, but doesn't tell us how it changed. If there is no information about district magnitude, MDMH is coded blank. MDMH is NA where there is no legislature and, if legislature is appointed or members are described as indirectly elected, district magnitude is coded as Indirect. Information about constitutional and electoral law changes were obtained through Europa and Political Handbook yearbooks, as well as online sources (ACE Project, 1upinfo.com, IPU Parline).

Min. Year:2015 Max. Year: 2015 N: 166

#### 4.25.36dpi mt Can Chief Executive Serve Multiple Terms

If there are formal restraints on an executive's term (NA if not), can s/he serve additional term(s) following the current one? If the executive's term is constitutionally limited (NA if not), can s/he be reelected? The word "additional" is new in 2004, but reflects only an effort to improve clarity, not a change coding rules. Deviating from the convention, a 1 is recorded if a term limit is not explicitly stated. Only limits on immediate reelection count. Prime ministers always get "1".

#### 4.25.37dpi muni Municipal Government

Are municipal governments locally elected?

- 0. Neither local executive nor local legislature are locally elected
- 1. The executive is appointed, but the legislature elected
- 2. They are both locally elected

No information, or no evidence of municipal governments, is recorded as blank. If one source has information on a specific period, and the other has no information on a different period, we do not extrapolate from one source to another - no information is always recorded as blank. If there are multiple levels of sub-national government, we consider the lowest level as the "municipal" level. This variable was extensively updated for this version, and as a result, the number of non-missing observations has increased from 42% to 61%.

- 2. Parliamentary

Min. Year:1975 Max. Year: 2017 N: 156 n: 5335  $\overline{N}$ : 124  $\overline{T}$ : 34

Systems with unelected executives get a 0. Systems with presidents who are elected directly or by an electoral college (whose only function is to elect the president), in cases where there is no prime minister, also receive a 0. In systems with both a prime minister and a president, we consider the following factors to categorize the system: a) Veto power: president can veto legislation and the parliament needs a supermajority to override the veto. b) Appoint prime minister: president can appoint and dismiss prime minister and / or other ministers. c) Dissolve parliament: president can dissolve parliament and call for new elections. d) Mentioning in sources: If the sources mention the president more often than the PM then this serves as an additional indicator to call the system presidential (Romania, Kyrgyzstan, Estonia, Yugoslavia). The system is presidential if (a) is true, or if (b) and (c) are true. If no information or ambiguous information on (a), (b), (c), then (d). Consult Appendix for specific country examples. Countries in which the legislature elects the chief executive are parliamentary (2), with the following exception: if that assembly or group cannot easily recall him (if they need a 2/3 vote to impeach, or must dissolve themselves while forcing him out) then the system gets a 1.

#### 4.25.69 dpi yct Years Left in Current Term

Years left in current term. Only full years are counted. Thus, a "0" is scored in an election year, and n-1 in the year after an election, where n is the length of the term. In countries where early elections can be called, the variable is set to the de jure term limit or schedule of elections, but resets in the case of early elections.

#### 4.25.70 dpi yio Chief Executive Years in Office

How many years has the chief executive been in office? Some decision rule is needed to deal with partial years. We use the following: years are counted in which the executive was in power as of January 1 or was elected but hadn't taken office as of January 1. Thus, a "1" is recorded in the year following his/her election. Example: Bush was president as of January 1, 1992, so although he lost the election in November 1992, this variable is recorded as a 4 in 1992, marking Bush's fourth year in office. Although Clinton was elected in November of 1992 and took office in January 1993, since he was president-elect on January 1 1993, this variable is recorded as "1" for 1993. If a country made a transition from colony to independence, we date a chief executive's tenure to the start of independence, not the granting of internal self-government (e.g., Timor-Leste for 2003). Republics of the Soviet Union do not fall into this category - they are tracked from full independence. The executive who formally (de jure) holds power is counted. However, the executive must actually be in the country to be counted. If an executive is deposed by a coup and returns to power within the same calendar year, the coup is counted as "failed" and the executive's rule is considered unbroken. On the other hand, if a parliamentary government resigns and then is re-appointed, this is counted as a new government. See Appendix for examples of ambiguous cases. In the case of Communist nations, we track the general secretary of the Communist party, regardless of who is president/premier. See documentation for original data source for ambiguous cases.

#### 4.26 ETH Zurich

http://globalization.kof.ethz.ch/ (Dreher, 2006) (Gygli et al., 2018) (Data downloaded: 2018-07-16)

#### **KOF** Index of Globalization

KOF Index of Globalization. All indexes below range between 0 and 100, where higher values indicate a higher degree of globalization.

The KOF Globalization Index measures the economic, social and political dimension to globalization. It is used in order to monitor changes in the level of globalization of different countries over extended periods of time. The current KOF Globalization Index is available for 185 countries and covers the period from 1970 until 2015. A distinction is drawn between de facto and de jure for the Index as a whole, as well as within the economic, social and political components.

The Index measures globalization on a scale of 1 to 100. The figures for the constituent variables are

expressed as percentiles. This means that outliers are smoothed and ensures that fluctuations over time are lower. Due to the new methodology, the current Index is only to a limited extent comparable to the old KOF Globalization Index.

#### 4.26.1 dr eg Economic Globalization

Economic globalisation (scale of 1 to 100) covers both trade flows as well as financial flows. De facto trade is determined with reference to the trade in goods and services. De jure trade covers customs duties, taxes and restrictions on trade.

Min. Year:1970 Max. Year: 2015 N: 182 n: 7340  $\overline{N}$ : 160  $\overline{T}$ : 40

#### 4.26.2 dr\_ig Index of Globalization

The overall index of globalization (scale of 1 to 100) is the weighted average of the following variables: economic globalization, social globalization and political globalization (dr\_eg, dr\_sg and dr\_pg). Most weight has been given to economic followed by social globalization.

Min. Year:2015 Max. Year: 2015 N: 184

Min. Year:1970 Max. Year: 2015 N: 189 n: 7536  $\overline{N}$ : 164  $\overline{T}$ : 40

#### 4.26.3 dr\_pg Political Globalization

Political globalisation (scale of 1 to 100) regards the de facto segment measured with reference to the number of embassies and international non-governmental organisations (NGOs), along with participation in UN peacekeeping missions. The de jure segment contains variables focussing on membership of international organisations and international treaties.

Min. Year:1970 Max. Year: 2015 N: 195 n: 7812  $\overline{N}$ : 170  $\overline{T}$ : 40

#### 4.26.4 dr sg Social Globalization

Social globalization (scale of 1 to 100) is comprised of three segments, each with its own de facto and de jure segment. Interpersonal contact is measured within the de facto segment with reference to international telephone connections, tourist numbers and migration. Within the de jure segment, it is measured with reference to telephone subscriptions, international airports and visa restrictions. Flows of information are determined within the de facto segment with reference to international patent applications, international students and trade in high technology goods. The de jure segment measures access to TV and the internet, freedom of the press and international internet connections. Cultural proximity is measured in the de facto segment from trade in cultural goods, international trade mark registrations and the number of McDonald's restaurants and IKEA stores. The de jure area focuses on civil rights (freedom of citizens), gender equality and public spending on school education.

# 4.27 Global Footprint Network

http://www.footprintnetwork.org/en/index.php/GFN/page/footprint\_data\_and\_results/ (Global Footprint Network, 2018) (Data downloaded: 2018-09-17)

#### **Global Footprint Data**

The National Footprint Accounts (NFAs) measure the ecological resource use and resource capacity of nations over time. Based on approximately 6,000 data points per country per year, the Accounts calculate the Footprints of 232 countries, territories, and regions from 1961 to the present, providing the core data needed for all Ecological Footprint analysis worldwide. This Data Package contains Ecological Footprint and biocapacity as well as Human Development and population data to give a first approximation of the biological resource situation of the featured countries.

# 4.27.1 ef\_bul Built-up land footprint- Ecological Footprint of Consumption(GHA per person)

Built-up Land - Ecological footprint in consumption. The built-up land Footprint is calculated based on the area of land covered by human infrastructure: transportation, housing, and industrial structures. Built-up land may occupy what would previously have been cropland. Measured in Global Hectares (GHA) per person.

Min. Year:2013 Max. Year: 2014 N: 163

Min. Year:1961 Max. Year: 2014 N: 171 n: 6134  $\overline{N}$ : 114  $\overline{T}$ : 36

#### 4.27.2 ef\_carb Carbon footprint - Ecological Footprint of Consumption(GHA per person)

Carbon - Ecological footprint in consumption. The carbon Footprint, which represents the carbon dioxide emissions from burning fossil fuels in addition to the embodied carbon in imported goods. The carbon Footprint component is represented by the area of forest land required to sequester these carbon emissions. Currently, the carbon Footprint is the largest portion of humanity's Footprint.

# 4.27.3 ef\_crop Cropland footprint - Ecological Footprint of Consumption(GHA per person)

Cropland - Ecological footprint in consumption. Cropland is the most bioproductive of all the landuse types and consists of areas used to produce food and fibre for human consumption, feed for livestock, oil crops, and rubber. The cropland Footprint includes crop products allocated to livestock and aquaculture feed mixes, and those used for fibres and materials. Due to lack of globally consistent data sets, current cropland Footprint calculations do not yet take into account the extent to which farming techniques or unsustainable agricultural practices may cause long-term degradation of soil.

Min. Year:2013 Max. Year: 2014 N: 163

Min. Year:1961 Max. Year: 2014 N: 171 n: 6134  $\overline{N}$ : 114  $\overline{T}$ : 36

#### 4.27.4 ef ef Total Ecological Footprint of Consumption(GHA per person)

Total - Ecological footprint in consumption. Measured in Global Hectares (GHA) per person.

#### 4.27.5 ef fg Fish footprint - Ecological Footprint of Consumption(GHA per person)

Fishing Ground - Ecological footprint in consumption. The fishing grounds Footprint is calculated based on estimates of the maximum sustainable catch for a variety of fish species. These sustainable catch estimates are converted into an equivalent mass of primary production based on the various species' trophic levels. This estimate of maximum harvestable primary production is then divided amongst the continental shelf areas of the world. Fish caught and used in aquaculture feed mixes are included. Measured in Global Hectares (GHA) per person.

Min. Year:1961 Max. Year: 2014 N: 171 n: 6134  $\overline{N}$ : 114  $\overline{T}$ : 36

# 4.27.6 ef\_for Forest product footprint - Ecological Footprint of Consumption(GHA per person)

Forest Production - Ecological footprint in consumption. The forest product Footprint, which is calculated based on the amount of lumber, pulp, timber products, and fuel wood consumed by a population on a yearly basis. Measured in Global Hectares (GHA) per person.

# 4.27.7 ef\_gl Grazing footprint - Ecological Footprint of Consumption(GHA per person)

Grazing - Ecological footprint in consumption. Grazing land is used to raise livestock for meat, dairy, hide, and wool products. The grazing land Footprint is calculated by comparing the amount of livestock feed available in a country with the amount of feed required for all livestock in that year, with the remainder of feed demand assumed to come from grazing land. Measured in Global Hectares (GHA) per person.

Min. Year:2013 Max. Year: 2014 N: 163

Min. Year:1961 Max. Year: 2014 N: 171 n: 6134  $\overline{N}$ : 114  $\overline{T}$ : 36

# 4.28 Encyclopaedia Metallum

https://www.metal-archives.com/ (Encyclopaedia Metallum, 2017) (Data downloaded: 2018-10-13)

#### The Metal Archives

The Encyclopedia Metallum (The Metal Archives) compiles information on the world's active metal bands per country and year.

### 4.28.1 em\_active Number of Active Metal Bands

Number of active metal bands.

Note: Bands from Åland has been recoded as Finland and bands from Svalbard has been recoded as Norway. Also, bands with a start date but missing end date are all considered to be active.

# 4.29 Ease of Doing Business Report

http://www.doingbusiness.org/en/doingbusiness (The World Bank Group, 2018) (Data downloaded: 2018-11-01)

### Ease of Doing Business - Historical Data

The Doing Business project provides objective measures of business regulations and their enforcement across 190 economies. This EOB 2019 report covers 11 indicator sets and 190 economies. Most indicator sets refer to a case scenario in the largest business city of each economy, except for 11 economies that have a population of more than 100 million as of 2013 (Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States) where Doing Business, also collected data for the second largest business city.

The ease of doing business score captures the gap between an economy's performance and a measure of best practice across the entire sample of 41 indicators for 10 Doing Business topics (the labor market regulation indicators are excluded). For starting a business, for example, New Zealand and Georgia have the lowest number of procedures required (1). New Zealand also holds the shortest time to start a business (0.5 days), while Slovenia has the lowest cost (0.0).

Calculating the ease of doing business score for each economy involves two main steps. In the first step individual component indicators are normalized to a common unit where each of the 41 component indicators y (except for the total tax and contribution rate) is rescaled using the linear transformation (worst - y)/(worst ? best). In this formulation, the highest score represents the best regulatory performance on the indicator across all economies since 2005 or the third year in which data for the indicator were collected.

Both the best regulatory performance and the worst regulatory performance are established every five years based on the Doing Business data for the year in which they are established and remain at that level for the five years regardless of any changes in data in interim years. Thus, an economy may establish the best regulatory performance for an indicator even though it may not have the highest score in a subsequent year. Conversely, an economy may score higher than the best regulatory performance if the economy reforms after the best regulatory performance is set. For example, the best regulatory performance for the time to get electricity is set at 18 days. In the Republic of Korea it now takes 13 days to get electricity while in the United Arab Emirates it takes just 10 days. Although the two economies have different times, both economies score 100 on the time to get electricity because they have exceeded the threshold of 18 days.

For scores such as those on the strength of legal rights index or the quality of land administration index, the best regulatory performance is set at the highest possible value (although no economy has yet reached that value in the case of the latter).

Due to the changes in methodologies, some variables are presented separately, given that they are not comparable given these said changes.

#### 4.29.1 eob bqci Score-Building quality control index (0-15) (DB16-19 methodology)

Score-Building quality control index (0-15) (DB16-19 methodology). The building quality control index is based on six indices - the quality of building regulations, quality control before, during, and after construction, liability and insurance regimes, and professional certifications indices.

**N**: 186

Min. Year:2014 Max. Year: 2018 N: 186 n: 929  $\overline{N}$ : 186  $\overline{T}$ : 5

#### 4.29.2 eob dcp06 Score-Dealing with construction permits (DB06-15 methodology)

Score-Dealing with construction permits (DB06-15 methodology). Differs from the DB16-19 because this version does not contain the variable Building Quality Control Index in its calculation.

4.29.3 eob dcp16 Score-Dealing with construction permits (DB16-19 methodology)

Score-Dealing with construction permits (DB16-19 methodology). Doing Business records all procedures required for a business in the construction industry to build a warehouse along with the time and cost to complete each procedure. In addition, Doing Business measures the building quality control index, evaluating the quality of building regulations, the strength of quality control and safety mechanisms, liability and insurance regimes, and professional certification requirements.

4.29.4 eob eapr Equal access to property rights index (-2-0) (DB17-19 methodology)

Equal access to property rights index (-2-0) (DB17-19 methodology). The equal access to property rights index has two components:

- Whether unmarried men and unmarried women have equal ownership rights to property. A score of -1 is assigned if there are unequal ownership rights to property; 0 if there is equality.

- Whether married men and married women have equal ownership rights to property. A score of -1 is assigned if there are unequal ownership rights to property; 0 if there is equality.

Ownership rights cover the ability to manage, control, administer, access, encumber, receive, dispose of and transfer property. Each restriction is considered if there is a differential treatyment for men and women in the law considering the default marital property regime. For customary land systems, equality is assumed unless there is a general legal provision stating a differential treatment. The index ranges from -2 to 0, with higher values indicating greater inclusiveness of property rights.

Timor-Leste was originally coded as "No Practice" which for this edition of the QoG databases was assigned with a missing value.

 $\mathbf{N}: 182$ 

Min. Year:2015 Max. Year: 2018 N: 182 n: 728  $\overline{N}$ : 182  $\overline{T}$ : 4

#### 4.29.5 eob ec04 Score-Enforcing contracts (DB04-15 methodology)

Score-Enforcing contracts (DB04-15 methodology). Differs from further versions because this version does not contain the variable Quality of Judicial Processes Index in its calculation.

### 4.29.6 eob\_ec16 Score-Enforcing contracts (DB16 methodology)

Score-Enforcing contracts (DB16 methodology). Differs from DB17-19 because this version does not contain the variable Quality of Judicial Processess Index expanded to cover weight of women's testimony in court in its calculation.

Min. Year:2015 Max. Year: 2015 N: 186

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

### 4.29.7 eob ec17 Score-Enforcing contract (DB17-19 methodology)

Score-Enforcing contract (DB17-19 methodology). Doing Business measures the time and cost for resolving a commercial dispute through a local first-instance court and the quality of judicial processes index, evaluating whether each economy has adopted a series of good practices that promote quality and efficiency in the court system. The data are collected through study of the codes of civil procedure and other court regulations as well as questionnaires completed by local litigation lawyers and judges. These scores are the simple average of the scores for each of the component indicators.

Ease of doing business score global (DB10-14 methodology). The ease of doing business score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best regulatory performance on each Doing Business indicator. When compared across years, the ease of doing business score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms.

**Min. Year**: 2009 **Max. Year**: 2013 **N**: 186 **n**: 865  $\overline{N}$ : 173  $\overline{T}$ : 5

# 4.29.9 eob\_eob15 Ease of doing business score global (DB15 methodology)

Ease of doing business score global (DB15 methodology). The ease of doing business score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best regulatory performance on each Doing Business indicator. When compared across years, the ease of doing business score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms.

Ease of doing business score global (DB16 methodology). The ease of doing business score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best regulatory performance on each Doing Business indicator. When compared across years, the ease of doing business score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms.

Min. Year:2015 Max. Year: 2015 N: 186

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

#### 4.29.11 eob eob17 Ease of doing business score global (DB17-19 methodology)

Ease of doing business score global (DB17-19 methodology). The ease of doing business score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best regulatory performance on each Doing Business indicator. When compared across years, the ease of doing business score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms. The ease of doing business score captures the gap between an economy's performance and a measure of best practice across the entire sample of 41 indicators for 10 Doing Business topics (the labor market regulation indicators are excluded).

#### 4.29.12 eob gc05 Score-Getting credit (DB05-14 methodology)

Score-Getting credit (DB05-14 methodology). Differs from DB15-19 because this version uses the older versions of the variables Strength of Legal Rights Index and Depth of Credit Information Index in its calculation.

Min. Year:2013 Max. Year: 2013 N: 185

Min. Year:2004 Max. Year: 2013 N: 186 n: 1663  $\overline{N}$ : 166  $\overline{T}$ : 9

# 4.29.13 eob\_gc15 Score-Getting credit (DB15-19 methodology)

Score-Getting credit (DB15-19 methodology). Doing Business measures the legal rights of borrowers and lenders with respect to secured transactions through one set of indicators and the reporting of credit information through another. The first measures whether certain features that facilitate lending exist within the applincable collateral and bankruptcy laws. The second measures the coverage, scope and accessibility of credit information available through credit reporting service providers such as credit bureaus or credit registries. These scores are the sum of the scores for the strength of legal rights index and the depth of credit information index.

#### 4.29.14 eob ge10 Score-Getting electricity (DB10-15 methodology)

Score-Getting electricity (DB10-15 methodology). Differs from the DB16-19 because this version does not contain the variable Reliability of supply and transparency of tariff Index in its calculation.

#### 4.29.15 eob ge16 Score-Getting electricity (DB16-19 methodology)

Score-Getting electricity (DB16-19 methodology). Doing Business records all procedures required for a business to obtain a permanent electricity connection and supply for a standardized warehouse. These procedures include applications and contracts with electricity utilities, all necessary inspections and clearances from the distribution utility as well as other agencies, and the external and final connection works. In addition, Doing Business measures the reliability of supply and transparency of tariffs index (included in the aggregate score and ranking on the ease of doing business).

N: 186

Min. Year:2014 Max. Year: 2018 N: 186 n: 929  $\overline{N}$ : 186  $\overline{T}$ : 5

#### 4.29.16 eob ldri Land dispute resolution index (0-8) (DB16-19 methodology)

Land dispute resolution index (0-8) (DB16-19 methodology). The land dispute resolution index assesses the legal framework for immovable property registration and the accessibility of dispute resolution mechanisms. The index has eight components:

- Whether the law requires that all property sale transactions be regisnered at the immovable property registry to make them opposable to third parties. A score of 1.5 is assigned if yes; 0 if no.

- Whether the formal system of immovable property registration is subject to a guarantee. A score of 0.5 is assigned if either a state or private guarantee over immovable property registration is required by law; 0 if no such guarantee is required.

- Whether there is a specific, out-of-court compensation mechanism to cover for losses incurred by parties who engaged in good faith in a propnerty transaction based on erroneous information certified by the immovnable property registry. A score of 0.5 is assigned if yes; 0 if no.

- Whether the legal system requires verification of the legal validity of the documents (such as the sales, transfer or conveyance deed) necessary for a property transaction. A score of 0.5 is assigned if there is a review of legal validity, either by the registrar or by a professional (such as a notary or a lawyer); 0 if there is no review.

- Whether the legal system requires verification of the identity of the parties to a property transaction. A score of 0.5 is assigned if there is verification of identity, either by the registrar or by a professional (such as a notary or a lawyer); 0 if there is no verification.

- Whether there is a national database to verify the accuracy of identity documents. A score of 1 is assigned if such a national database is available; 0 if not.

- How much time it takes to obtain a decision from a court of first instance (without an appeal) in a standard land dispute between two local businesses over tenure rights worth 50 times income per capita and located in the largest business city. A score of 3 is assigned if it takes less than one year; 2 if it takes between one and two years; 1 if it takes between two and three years; 0 if it takes more than three years.

- Whether there are publicly availyable statistics on the number of land disputes in the first instance. A score of 0.5 is assigned if statistics are published about land disputes in the economy in the past calendar year; 0 if no such statistics are made publicly available.

Timor-Leste was originally coded as "No Practice" which for this edition of the QoG databases was assigned with a missing value.

# 4.29.17 eob\_pmi06 Score-Protecting minority investors (DB06-14 methodology)

Score-Protecting minority investors (DB06-14 methodology). Differs from DB15-19 because this version does not contain the variable Extent of shareholder governance Index in its calculation.

Min. Year:2005 Max. Year: 2013 N: 186 n: 1523  $\overline{N}$ : 169  $\overline{T}$ : 8

# 4.29.18 eob pmi15 Score-Protecting minority investors (DB15-19 methodology)

Score-Protecting minority investors (DB15-19 methodology). Doing Business measures the protection of minority investors from conflicts of interest through one set of indicators and shareholders' rights in corporate governance through another. The data come from a questionnaire administered to corporate and securities lawyers and are based on securities regulations, company laws, civil procedure codes and court rules of evidence. These scores are the simple average of the scores for the extent of conflict of interest regulation index and the extent of shareholder governance index.

Min. Year:2015 Max. Year: 2015 N: 186

Min. Year:2013 Max. Year: 2018 N: 186 n: 1114  $\overline{N}$ : 186  $\overline{T}$ : 6

# 4.29.19 eob\_pt06 Score-Paying taxes (DB06-16 methodology)

Score-Paying taxes (DB06-16 methodology). Differs from DB17-19 because this version does not contain the variable Postfilling Index in its calculation.

Min. Year:2015 Max. Year: 2015 N: 186

Min. Year:2005 Max. Year: 2015 N: 187 n: 1894  $\overline{N}$ : 172  $\overline{T}$ : 10

#### 4.29.20 eob pt17 Score-Paying taxes (DB17-19 methodology)

Score-Paying taxes (DB17-19 methodology). Doing Business records the taxes and mandatory contributions that a medium- size company must pay in a given year as well as measures of the administrative burden of paying taxes and contributions and complying with postfiling procedures. Taxes and contributions measured include the pro?t or corporate income tax, social contributions and labor taxes paid by the employer, property taxes, property transfer taxes, dividend tax, capital gains tax, ?nancial transactions tax, waste collection taxes, vehicle and road taxes, and any other small taxes or fees. The scores are the simple average of the scores for each of the components.

# 4.29.21 eob\_qla Score-Quality of land administration index with Gender(0-30)(DB17-19 methodology

Score-Quality of land administration index with Gender(0-30)(DB17-19 methodology). The quality of land administration index is the sum of the scores on the reliability of infrastructure, transparency of informantion, geographic coverage, land dispute resolution and equal access to property indices. The index ranges from 0 to 30 with higher values indicating better quality of the land administration system.

If private sector entities were unable to register property transfers in an economy between June 2017 and May 2018, the economy receives a Sno practice  $\check{T}$  mark on the procedures, time and cost indicators. A Sno practice  $\check{T}$  economy receives a score of 0 on the quality of land administration index even if its legal framework includes provisions related to land administration.

Min. Year:2015 Max. Year: 2015 N: 186

Min. Year:2015 Max. Year: 2018 N: 186 n: 744  $\overline{N}$ : 186  $\overline{T}$ : 4

#### 4.29.22 eob ri04 Score-Resolving insolvency (DB04-14 methodology)

Score-Resolving insolvency (DB04-14 methodology). Differs from DB15-19 because this version does not contain the variable Strength of Insolvency Framework Index in its calculation.

#### 4.29.23 eob\_ri15 Score-Resolving insolvency (DB15-19 methodology)

Score-Resolving insolvency (DB15-19 methodology). Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic entities as well as the strength of the legal framework applicable to judicial liquidation and reorganization proceedings. The data for the resolving insolvency indicators are derived from questionnaire responses by local insolvency practitioners and verified through a study of laws and regulations as well as public information on insolyvency systems. These scores are the simple average of the scores for the recovery rate and the strength of insolyvency framework index.

Min. Year:2015 Max. Year: 2015 N: 186

Min. Year:2013 Max. Year: 2018 N: 186 n: 1114  $\overline{N}$ : 186  $\overline{T}$ : 6

# 4.29.24 eob\_roest Score-Reliability of supply and transparency of tariff index (0-8) (DB16-19 meth

Score-Reliability of supply and transparency of tariff index (0-8) (DB16-19 methodology). Doing Business uses the system average interruption duration index (SAIDI) and the system average interruption frequency index (SAIFI) to measure the duration and frequency of power outages in the largest business city of each economy (for 11 economies the data are also collected for the second largest business city). SAIDI is the average total duration of outages over the course of a year for each customer served, while SAIFI is the average number of service interruptions experienced by a customer in a year. Annual data (covering the calendar year) are collected from distribution utility companies and national regulators on SAIDI and SAIFI. Both SAIDI and SAIFI estimates should include planned and unplanned outages, as well as load shedding.

An economy is eligible to obtain a score on the reliability of supply and transparency of tariffs index if it satisfies two conditions. First, the utility must collect data on all types of outages (measuring the average total duration of outages per customer and the average number of outages per customer). Second, the SAIDI value must be below a threshold of 100 hours and the SAIFI value must be under 100 outages.

Min. Year:2015 Max. Year: 2015 N: 186

# 4.30 Environmental Performance Index

http://epi.yale.edu/downloads
(Wendling et al., 2018)
(Data downloaded: 2018-11-20)

# Environmental Performance Index Data

The Environmental Performance Index provides a ranking that shines light on how each country manages environmental issues. The Environmental Performance Index (EPI) ranks how well countries perform on high-priority environmental issues in two broad policy areas: protection of human health from environmental harm and protection of ecosystems. Within these two policy objectives the EPI scores country performance in nine issue areas comprised of 20 indicators. Indicators in the EPI measure how close countries are to meeting internationally established targets or, in the absence of agreed-upon targets, how they compare to the range of observed countries.

Note: In many cases the EPI variables lack actual observations and rely on imputation. Please refer to the original documentation on more information about this. Also, some values (usually the value 0) are very unlikely, please use your judgement whether to treat these as the value 0 or as "Data missing".

#### 4.30.1 epi\_access Access to Electricity

Percent of population with access to electricity. This indicator is not included in the calculation of the Environmental Performance Index.

4.30.18 epi\_pacovd Terrestrial Protected Areas (National Biome Weights)

Percentage of terrestrial biome area that is protected, weighted by domestic biome area

Min. Year:2015 Max. Year: 2015 N: 180

Min. Year:2007 Max. Year: 2015 N: 181 n: 1620  $\overline{N}$ : 180 $\overline{T}$ : 9

#### 4.30.19 epi pm25 Air Pollution - Average Exposure to PM2.5

Air Pollution - Average Exposure to PM2.5: Population weighted exposure to PM2.5 (three- year average).

Min. Year:2015 Max. Year: 2015 N: 180

Min. Year:2007 Max. Year: 2015 N: 181 n: 1620  $\overline{N}$ : 180  $\overline{T}$ : 9

# 4.30.20 epi\_pspu Species Protection (National)

The average area of species - bird, mammals, and amphibians - distributions in a country under protection.

Min. Year:2015 Max. Year: 2015 N: 180

Min. Year:2007 Max. Year: 2015 N: 181 n: 1620  $\overline{N}$ : 180  $\overline{T}$ : 9

#### 4.30.21 epi wastecxn Wastewater Treatment

Wastewater treatment level weighted by connection to wastewater treatment rate.

#### 4.30.22 epi watsup Access to Drinking Water

Population lacking access to drinking water

Min. Year:2015 Max. Year: 2015 N: 180

Min. Year:2007 Max. Year: 2015 N: 181 n: 1620  $\overline{N}$ : 180 $\overline{T}$ : 9

### 4.31 European Social Survey

http://www.europeansocialsurvey.org/data/round-index.html (NSD - Norwegian Centre for Research Data, 2016) (Data downloaded: 2018-12-05)

#### European Social Survey - Wave 1-7

The European Social Survey (ESS) is an academically-driven multi-country survey, which has been administered in over 30 countries to date. Its three aims are, firstly - to monitor and interpret changing public attitudes and values within Europe and to investigate how they interact with Europe's changing institutions, secondly - to advance and consolidate improved methods of cross-national survey measurement in Europe and beyond, and thirdly - to develop a series of European social indicators, including attitudinal indicators.

#### 4.31.1 ess happy Subjective Happiness

Taking all things together, how happy would you say you are?0. Extremely Unhappy1.

- 2. 3. 4. 5. 6. 7. 8. 9.
- 10. Extremely Happy

4.31.2 ess health Subjective Health

How is your health in general? Would you say it is: 1. Very Good

- 2. Good
- 3. Fair
- 4. Bad
- 5. Very Bad

#### 4.31.3 ess relig Religiosity

Regardless of whether you belong to a particular religion, how religious would you say you are? 0. Not at all Religious

Min. Year:2002 Max. Year: 2014 N: 32 n: 173  $\overline{N}$ : 13  $\overline{T}$ : 5

### 4.31.4 ess\_trlegal Trust in Legal System

N: 28

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Legal System.

4.31.5 ess trparl Trust in Parliament

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Parliament.

Min. Year:2002 Max. Year: 2014 N: 32 n: 173  $\overline{N}$ : 13  $\overline{T}$ : 5

#### 4.31.6 ess\_trpart Trust in Political Parties

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Political Parties.

#### 4.31.7 ess trpeople Trust in Other People

Generally speaking, would you say that most people can be trusted, or that you can't be too careful in dealing with people? Please tell me on a score of 0 to 10, where 0 means you can't be too careful and 10 means that most people can be trusted.

#### 4.31.8 ess troplice Trust in Police

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Police.

4.31.9 ess trpolit Trust in Politicians

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Politicians.

### 4.32 Eurostat

http://ec.europa.eu/eurostat/data/database (European Comission, 2017) (Data downloaded: 2019-01-08)

#### **Eurostat Datasets**

Eurostat is the statistical office of the European Union situated in Luxembourg. Its mission is to provide high quality statistics for Europe. Its key task is to provide the European Union with statistics at European level that enable comparisons between countries and regions. Eurostat offers a whole range of important and interesting data that governments, businesses, the education sector, journalists and the public can use for their work and daily life.

This database offers statistics on the following themes:

- General and regional statistics
- Economy and finance
- Population and social conditions
- Industry, trade and services
- Agriculture and fisheries
- International trade
- Transport
- Environment and energy
- Science, technology and digital society.

Please note that for this version of the QoG Datasets, we have selected some samples from each topic that relate with the overall topics of Quality of Government.

# Environmental Land Use Data

The FAOSTAT Land Use domain contains data on forty-seven categories of land use, irrigation and agricultural practices, relevant to monitor agriculture, forestry and fisheries activities at national, regional and global level.

Data are available by country and year, with global coverage and annual updates. Note: Micronesia has been dropped due to duplicate cases.

# 4.34 James D. Fearon

https://web.stanford.edu/group/ethnic/publicdata/publicdata.html (Fearon, 2003) (Data downloaded: 2018-07-17)

#### Ethnic and Cultural Diversity by Country

Used in the article Ethnic and Cultural Diversity by Country published in Journal of Economic Growth, containing data on 822 ethnic groups in 160 countries that made up at least 1 percent of the country population in the early 1990s.

### 4.34.1 fe cultdiv Cultural Diversity

This measure modifies fractionalization (fe\_etfra) so as to take some account of cultural distances between groups, measured as the structural distance between languages spoken by different groups in a country. If the groups in a country speak structurally unrelated languages, their cultural diversity index will be the same as their level of ethnic fractionalization (fe\_etfra). The more similar are the languages spoken by different ethnic groups, however, the more will this measure be reduced below the level of ethnic fractionalization for that country. The values are assumed to be constant for all years.

Min. Year:1946 Max. Year: 2018 N: 154 n: 11242  $\overline{N}$ : 154  $\overline{T}$ : 73

## 4.34.2 fe etfra Ethnic Fractionalization

Restricting attention to groups that had at least 1 percent of country population in the 1990s, Fearon identifies 822 ethnic and "ethnoreligious" groups in 160 countries. This variable reflects the probability that two randomly selected people from a given country will belong to different such groups. The variable thus ranges from 0 (perfectly homogeneous) to 1 (highly fragmented). The values are assumed to be constant for all years.

Min. Year:2015 Max. Year: 2015 N: 154

Min. Year:1946 Max. Year: 2018 N: 155 n: 11315  $\overline{N}$ : 155  $\overline{T}$ : 73

#### 4.34.3 fe lmin Largest Minority

Based on the same set of groups, this variable reflects the population share of the second largest group (largest minority). The values are assumed to be constant for all years.

Min. Year:2015 Max. Year: 2015 N: 145

**Min. Year**:1946 **Max. Year**: 2018 **N**: 146 **n**: 10658  $\overline{N}$ : 146  $\overline{T}$ : 73

# 4.34.4 fe\_plural Plurality Group

Based on the same set of groups, this variable reflects the population share of the largest group (plurality group) in the country. The values are assumed to be constant for all years.

Min. Year:2015 Max. Year: 2015 N: 153

Min. Year:1946 Max. Year: 2018 N: 154 n: 11242  $\overline{N}$ : 154  $\overline{T}$ : 73

# 4.35 Fund for Peace

http://ffp.statesindex.org/ (Haken et al., 2018) (Data downloaded: 2018-09-11)

# Fragile States Index

The Fragile States Index (Failed States Index), produced by The Fund for Peace, is a critical tool in highlighting not only the normal pressures that all states experience, but also in identifying when those pressures are pushing a state towards the brink of failure. By highlighting pertinent issues in weak and failing states, the FSI - and the social science framework and software application upon which it is built - makes political risk assessment and early warning of conflict accessible to policymakers and the public at large.

The strength of the FSI is its ability to distill millions of pieces of information into a form that is relevant as well as easily digestible and informative. Daily, The Fund for Peace collects thousands of reports and information from around the world, detailing the existing social, economic and political pressures faced by each of the 178 countries that we analyze.

The FSI is based on The Fund for Peace's proprietary Conflict Assessment Software Tool (CAST) analytical platform. Based on comprehensive social science methodology, data from three primary sources is triangulated and subjected to critical review to obtain final scores for the FSI. Millions of documents are analyzed every year. By applying highly specialized search parameters, scores are apportioned for every country based on twelve key political, social and economic indicators (which in turn include over 100 sub-indicators) that are the result of years of painstaking expert social science research. The Fund for Peace's software performs content analysis on this collected information.

Through sophisticated search parameters and algorithms, the CAST software separates the relevant data from the irrelevant. Guided by twelve primary social, economic and political indicators (each split into an average of 14 sub-indicators), the CAST software analyzes the collected information using specialized search terms that flag relevant items. Using various algorithms, this analysis is then converted into a score representing the significance of each of the various pressures for a given country. The content analysis is further triangulated with two other key aspects of the overall assessment process: quantitative analysis and qualitative inputs based on major events in the countries examined.

The scores produced by The Fund for Peace's software are then compared with a comprehensive set of vital statistics - as well as human analysis - to ensure that the software has not misinterpreted the raw data. Though the basic data underpinning the Failed States Index is already freely and widely available electronically, the strength of the analysis is in the methodological rigor and the systematic integration of a wide range of data sources.

Note: the principal of data timing was changed. Data from reports correspond to the situation from the previous year. The 2016 Fragile States Index, comprises data collected between January 1, 2015, and December 31, 2015. Therefore data from Report 2016 is recorded for 2015 and the same logic works for all other years.

# 4.35.1 ffp\_dp Demographic Pressure

Demographic Pressure - Pressures on the population such as disease and natural disasters make it difficult for the government to protect its citizens or demonstrate a lack of capacity or will. Includes pressures and measures related to natural disasters, disease, environment, pollution, food scarcity, malnutrition, water scarcity, population growth, youth bulge, mortality.

#### 4.35.2 ffp eco Economic Decline

Economic Decline Indicator - It considers factors related to economic decline within a country. For example, the Indicator looks at patterns of progressive economic decline of the society as a whole as measured by per capita income, Gross National Product, unemployment rates, inflation, productivity, debt, poverty levels, or business failures. It also takes into account sudden drops in commodity prices, trade revenue, or foreign investment, and any collapse or devaluation of the national currency. The Economic Decline Indicator further considers the responses to economic conditions and their consequences, such as extreme social hardship imposed by economic austerity programs, or perceived increasing group inequalities. The Economic Decline Indicator is focused on the formal economy - as well as illicit trade, including the drug and human trafficking, and capital flight, or levels of corruption and illicit transactions such as money laundering or embezzlement.

#### 4.35.3 ffp ext External Intervention

External Intervention - When the state fails to meet its international or domestic obligations, external actors may intervene to provide services or to manipulate internal affairs. Includes pressures and measures related to foreign assistance, presence of peacekeepers, presence of UN missions, foreign military intervention, sanctions, credit rating.

**Min. Year**:2005 **Max. Year**: 2017 **N**: 178 **n**: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

#### 4.35.4 ffp fe Factionalized Elites

Factionalized Elites - When local and national leaders engage in deadlock and brinkmanship for political gain, this undermines the social contract. Includes pressures and measures related to power struggles, defectors, flawed elections, political competition.

**N: 177 N: 177** 

Min. Year:2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

# 4.35.5 ffp\_fsi Fragile States Index

Fragile States Index (The Failed States Index) includes an examination of the pressures on states, their vulnerability to internal conflict and societal deterioration. The country ratings are based on the total scores of 12 indicators:

Social Indicators

1. Mounting Demographic Pressures

2. Massive Movement of Refugees or Internally Displaced Persons creating Complex Humanitarian Emergencies

3. Legacy of Vengeance-Seeking Group Grievance or Group Paranoia

4. Chronic and Sustained Human Flight.

Economic Indicators

- 5. Uneven Economic Development along Group Lines
- 6. Sharp and/or Severe Economic Decline

**Political Indicators** 

- 7. Criminalization and/or Delegitimization of the State
- 8. Progressive Deterioration of Public Services

9. Suspension or Arbitrary Application of the Rule of Law and Widespread Violation of Human Rights

10. Security Apparatus Operates as a "State Within a State"

- 11. Rise of Factionalized Elites
- 12. Intervention of Other States or External Politicl Actors.

For each indicator, the ratings are placed on a scale of 0 to 10, with 0 being the lowest intensity (most stable) and 10 being the highest intensity (least stable). The total score is the sum of the 12 indicators and is on a scale of 0-120.

Min. Year:2015 Max. Year: 2015 N: 177

Min. Year: 2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

# 4.35.6 ffp gg Group Grievance

Group Grievance - When tension and violence exists between groups, the state's ability to provide security is undermined and fear and further violence may ensue. Includes pressures and measures related to discrimination, powerlessness, ethnic violence, communal violence, sectarian violence, religious violence.

## 4.35.7 ffp hf Human Flight and Brain Drain

Human Flight and Brain Drain - When there is little opportunity, people migrate, leaving a vacuum of human capital. Those with resources also often leave before, or just as, conflicts erupts. Includes pressures and measures related to migration per capita, human capital, emigration of educated population.

Min. Year:2015 Max. Year: 2015 N: 177

Min. Year:2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

# 4.35.8 ffp hr Human Rights and Rule of Law

Human Rights and Rule of Law - When human rights are violated or unevenly protected, the state is failing in its ultimate responsibility. Includes pressures and measures related to press freedom, civil liberties, political freedoms, human trafficking, political prisoners, incarceration, religious persecution, torture, executions.

Min. Year:2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

#### 4.35.9 ffp ps Public Services

Public Services - The provision of health, education, and sanitation services, among others, are key roles of the state. Includes pressures and measures related to policing, criminality, education provision, literacy, water and sanitation, infrastructure, quality healthcare, telephony, internet access, energy reliability, roads.

Min. Year:2015 Max. Year: 2015 N: 177

Min. Year:2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

# $4.35.10 \quad {\rm ffp\_ref \ Refugees \ and \ IDPs}$

Refugees and IDPs - Pressures associated with population displacement. This strains public services and has the potential to pose a security threat. Includes pressures and measures related to displacement, refugee camps, IDP camps, disease related to displacement, refugees per capita, IDPs per capita, absorption capacity.

### 4.35.11 ffp sec Security Apparatus

Security Apparatus - The security apparatus should have monopoly on the use of legitimate force. The social contract is weakened where this is affected by competing groups. Includes pressures and measures related to internal conflict, small arms proliferation, riots and protests, fatalities from conflict, military coups, rebel activity, militancy, bombings, political prisoners.

# 4.35.12 ffp\_sl State Legitimacy

State Legitimacy - Corruption and lack of representativeness in the government directly undermine the social contract. Includes pressures and measures related to corruption, government effectiveness, political participation, electoral process, level of democracy, illicit economy, drug trade, protests and demonstrations, power struggles.

Min. Year:2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

#### 4.35.13 ffp ued Uneven Economic Development

Uneven Economic Development - When there are ethnic, religious, or regional disparities, the governed tend to be uneven in their commitment to the social contract. Includes pressures and measures related to GINI coefficient, income share of highest 10%, income share of lowest 10%, urban-rural service distribution, access to improved services, slum population.

Min. Year:2015 Max. Year: 2015 N: 177

Min. Year:2005 Max. Year: 2017 N: 178 n: 2263  $\overline{N}$ : 174  $\overline{T}$ : 13

# 4.36 Freedom House

https://freedomhouse.org/report-types/freedom-world (Freedom House, 2018) (Data downloaded: 2018-11-08)

# Freedom in the World

Freedom in the World is an annual comparative assessment of political rights and civil liberties that this year covers 195 countries and 14 related and disputed territories.

For the edition years 2006-2017, Freedom House released aggregate scores for political rights and civil liberties for each country in order to provide more nuanced information about country trends beyond the 7-point rating scales used previously. Starting with the 2018, Freedom House releases scores for all indicators.

In addition, in order to generate debate and discussions within countries as to areas that are most in need of reform, Freedom House releases the scores for the seven subcategories that fall under political rights and civil liberties. These subcategories, drawn from the Universal Declaration of Human Rights, represent the fundamental components of freedom, which include an individual's ability to:

- Vote freely in legitimate elections;
- Participate freely in the political process;
- Have representatives that are accountable to them;
- Exercise freedoms of expression and belief;
- Be able to freely assemble and associate;
- Have access to an established and equitable system of rule of law;

- Enjoy personal freedoms, including free movement, the right to hold private property, social freedoms, and equal access to economic opportunities.

Note: The 1982 edition of Freedom in the World covers the period Jan 1981- Aug 1982 (=1981 in our dataset). The 1983-84 edition covers the period Aug 1982 - Nov 1983 (=1983 in our dataset). This leaves 1982 empty. For 1972, South Africa was in the original data rated as "White" (fh\_cl: 3, fh\_pr: 2, fh\_status: Free) and "Black" (fh\_cl: 6, fh\_pr: 5, fh\_status: Not Free). We treat South Africa 1972 as missing.

# 4.36.1 fh\_aor Associational and Organizational Rights

Associational and Organizational Rights - The variable evaluates the freedom of assembly, demonstrations and open public discussion; the freedom for nongovernmental organization; and the freedom for trade unions, peasant organizations and other professional and private organizations. Countries are graded between 0 (worst) and 12 (best).

# 4.36.2 fh\_cl Civil Liberties

Civil Liberties - Civil liberties allow for the freedoms of expression and belief, associational and organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years. Countries are graded between 1 (most free) and 7 (least free).

Min. Year:2015 Max. Year: 2015 N: 194

Min. Year:1972 Max. Year: 2017 N: 207 n: 8002  $\overline{N}$ : 174  $\overline{T}$ : 39

#### 4.36.3 fh ep Electoral Process

Electoral Process - The variable measures to what extent the national legislative representatives and the national chief authority are elected through free and fair elections. Countries are graded between 0 (worst) and 12 (best).

Min. Year: 2005 Max. Year: 2017 N: 196 n: 2515  $\overline{N}$ : 193  $\overline{T}$ : 13

# 4.36.4 fh feb Freedom of Expression and Belief

Freedom of Expression and Belief - The variable measures the freedom and independence of the media and other cultural expressions; the freedom of religious groups to practice their faith and express themselves; the academic freedom and freedom from extensive political indoctrination in the educational system; and the ability of the people to engage in private (political) discussions without fear of harassment or arrest by the authorities. Countries are graded between 0 (worst) and 16 (best).

Min. Year:2015 Max. Year: 2015 N: 194

Min. Year: 2005 Max. Year: 2017 N: 196 n: 2515  $\overline{N}$ : 193  $\overline{T}$ : 13

# 4.36.5 fh\_fog Functioning of Government

Functioning of Government - The variable examines in what extent the freely elected head of government and a national legislative representative determine the policies of the government; if the government is free from pervasive corruption; and if the government is accountable to the electorate between elections and operates with openness and transparency. Countries are graded between 0 (worst) and 12 (best).

# 4.36.6 fh ipolity2 Level of Democracy (Freedom House/Imputed Polity)

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh\_pr and fh\_cl) is transformed to a scale 0-10 and Polity (p\_polity2) is transformed to a scale 0-10. These variables are averaged into fh\_polity2. The imputed version has imputed values for countries where data on Polity is missing by regressing Polity on the average Freedom House measure. Hadenius & Teorell (2005) show that this average index performs better both in terms of validity and reliability than its constituent parts.

## 4.36.7 fh\_pair Personal Autonomy and Individual Rights

Personal Autonomy and Individual Rights - The variable evaluates the extent of state control over travel, choice of residence, employment or institution of higher education; the right of citizens to own property and establish private businesses; the private business' freedom from unduly influence by government officials, security forces, political parties or organized crime; gender equality, freedom of choice of marriage partners and size of family; equality of opportunity and absence of economic exploitation. Countries are graded between 0 (worst) and 16 (best).

#### 4.36.8 fh polity2 Level of Democracy (Freedom House/Polity)

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh\_pr and fh\_cl) is transformed to a scale 0-10 and Polity (p\_polity2) is transformed to a scale 0-10. These variables are averaged into fh\_polity2.

## 4.36.9 fh ppp Political Pluralism and Participation

Political Pluralism and Participation - This variable encompasses an examination of the right of the people to freely organize in political parties; the existence of an opposition with a realistic possibility to increase its support; the ability of the people to make political choices free from domination by the military, totalitarian parties or other powerful groups; and the existence of full political rights for all minorities. Countries are graded between 0 (worst) and 16 (best).

Min. Year: 2005 Max. Year: 2017 N: 196 n: 2515  $\overline{N}$ : 193  $\overline{T}$ : 13

# 4.36.10 fh\_pr Political Rights

Political Rights - Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years. Countries are graded between 1 (most free) and 7 (least free).

Min. Year:2015 Max. Year: 2015 N: 194

Min. Year:1972 Max. Year: 2017 N: 207 n: 8002  $\overline{N}$ : 174  $\overline{T}$ : 39

#### 4.36.11 fh rol Rule of Law

Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

Min. Year: 2005 Max. Year: 2017 N: 196 n: 2515  $\overline{N}$ : 193  $\overline{T}$ : 13

#### 4.36.12 fh\_status Freedom Status

- 1. Free
- 2. Partly Free
- 3. Not Free

Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated "Free"; between 3.0 and 5.5 "Partly Free", and between 5.5 and 7.0 "Not Free". Since then, countries whose ratings average 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free".

Min. Year:2015 Max. Year: 2015 N: 194

Min. Year:1972 Max. Year: 2017 N: 207 n: 8002  $\overline{N}$ : 174  $\overline{T}$ : 39

# 4.37 Freedom House

https://freedomhouse.org/report/freedom-net/freedom-net-2017 (Freedom House, 2017b) (Data downloaded: 2018-11-13)

#### Freedom on the Net

Freedom on the Net is a Freedom House project consisting of cutting-edge analysis, fact-based advocacy, and on-the-ground capacity building. It features a ranked, country-by-country assessment of online freedom, a global overview of the latest developments, as well as in depth country reports. Freedom on the Net measures the subtle and not-so-subtle ways that governments and non-state actors around the world restrict our intrinsic rights online. Each country assessment includes a detailed narrative report and numerical score, based on methodology developed in consultation with international experts. This methodology includes three categories:

1. Obstacles to Access details infrastructural and economic barriers to access, legal and ownership control over internet service providers , and independence of regulatory bodies;

2. Limits on Content analyzes legal regulations on content, technical filtering and blocking of websites, self-censorship, the vibrancy/diversity of online news media, and the use of digital tools for civic mobilization;

3. Violations of User Rights tackles surveillance, privacy, and repercussions for online speech and activities, such as imprisonment, extralegal harassment, or cyberattacks.

Freedom on the Net is a collaborative effort between a small team of Freedom House staff and an extensive network of local researchers and advisors in 65 countries.

#### 4.37.1 fhn\_fotnloc Freedom on the Net: Limits on content

Limits on Content: analyzes legal regulations on content, technical filtering and blocking of websites, self-censorship, the vibrancy/diversity of online news media, and the use of digital tools for civic mobilization. The score goes from 0 to 100, where 100 represents worst outcomes.

4.37.2 fhn fotnota Freedom on the Net: Obstacles to Access

Obstacles to Access: details infrastructural and economic barriers to access, legal and ownership control over internet service providers , and independence of regulatory bodies. The score goes from 0 to 100, where 100 represents worst outcomes.

N: 65

Min. Year:2010 Max. Year: 2017 N: 65 n: 469  $\overline{N}$ : 59  $\overline{T}$ : 7

# 4.37.3 fhn fotnsc Freedom on the Net: Score

Freedom on the Net, Score: Measures the subtle and not-so-subtle ways that governments and nonstate actors around the world restrict our intrinsic rights online by looking at Obstacles to Access, Limits on Content and Violations of User Rights. The scores are based on a scale of 0 to 100 with 0 representing the best level of freedom on the net progress and 100 the worst.

### 4.37.5 fhn fotnvur Freedom on the Net: Violation of Users' rights

Violations of User Rights: tackles surveillance, privacy, and repercussions for online speech and activities, such as imprisonment, extralegal harassment, or cyberattacks. The score goes from 0 to 100, where 100 represents worst outcomes.

Min. Year:2010 Max. Year: 2017 N: 65 n: 469  $\overline{N}$ : 59  $\overline{T}$ : 7

# 4.38 Freedom House

https://freedomhouse.org/report-types/freedom-press (Freedom House, 2017a) (Data downloaded: 2018-11-09)

# Freedom of the Press

Freedom of the Press assesses the degree of print, broadcast, and digital media freedom in 199 countries and territories. Published since 1980, it provides numerical scores and country narratives evaluating the legal environment for the media, political pressures that influence reporting, and economic factors that affect access to news and information. Freedom of the Press is the most comprehensive data set available on global media freedom and serves as a key resource for policymakers, international institutions, journalists, activists, and scholars worldwide.

Note: The number in the variable names indicate what time period they refer to.

- 1: 1979-1987
- 2: 1988-1992
- 3: 1993-1995
- 4: 1996-2000
- $5:\ 2001-2016$

#### 4.38.1 fhp mcei5 Economic influences over media content (2001-2016)

Economic Influences over Media Content (2001-2016).

# 4.39 Fraser Institute

https://www.fraserinstitute.org/economic-freedom/dataset (Gwartney et al., 2016) (Data downloaded: 2018-09-10)

#### Economic Freedom of the World Dataset

The index published in Economic Freedom of the World measures the degree to which the policies and institutions of countries are supportive of economic freedom. The cornerstones of economic freedom are personal choice, voluntary exchange, freedom to enter markets and compete, and security of the person and privately owned property. The EFW index now ranks 159 countries and territories. Data are available for approximately 100 nations and territories back to 1980, and many back to 1970. This data set makes it possible for scholars to analyze the impact of both cross-country differences in economic freedom and changes in that freedom across a time frame of three and a half decades.

For a consistent time-series for a particular country and/or longitudinal data for a panel of countries, the Fraser Institute previously developed and reported a chain-linked version of the index. One of the problems with the chain-linked index was that it was limited to just the 123 countries that were available in the chain-link's "base year" of 2000. With this year's report, the Institute is replacing the chain-linked index with the EFW Panel Dataset, which reports area and summary ratings for all countries for which we have a regular EFW index score in any given year.

The EFW Panel Dataset adjusts the regular EFW index in two ways. (1) From the most-recent year annually back to 2000, whenever possible, any missing data is estimated by autoregressively "backcasting" the data, meaning the actual values are used in later years to estimate the missing values for earlier years. For example, if a country is missing a data value for a particular component from 2000-2004, this method estimates the missing 2000-2004 values based on data available in 2005 and thereafter. This approach allows to have area and summary ratings for up to the entire 159 countries in the EFW index. (2) For 1970, 1975, 1980, 1985, 1990, and 1995, the index is chain-linked as described in previous editions. That is, using 2000 as the base year, changes in a country's scores backward in time are based only on changes in components that were present in adjoining years. It should be noted that the EFW Panel Dataset contains area and summary ratings only for those years in which the country received a regular EFW index rating.

#### 4.39.1 fi ftradeint Freedom to Trade Internationally (current)

The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate International capital market controls.

4.39.2 fi ftradeint pd Freedom to Trade Internationally (panel data)

The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate International capital market controls. Panel-data adjusted.

4.39.3 fi index Economic Freedom of the World Index (current)

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index comprises 21 components designed to identify the consistency of institutional arrangements and policies with economic freedom in five major areas: size of government (fi\_sog), legal structure and security of property rights (fi\_legprop), access to sound money (fi\_sm), freedom to trade internationally (fi\_ftradeint), regulation of credit, labor and business (fi\_reg). The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". This is the version of the index published at the current year of measurement, without taking methodological changes over time into account.

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". Panel-data adjusted.

4.39.5 fi legprop Legal Structure and Security of Property Rights (current)

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system.

# 4.39.6 fi legprop pd Legal Structure and Security of Property Rights (panel data)

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system. Panel-data adjusted.

# 4.39.7 fi\_reg Regulation of Credit, Labor and Business (current)

The index ranges from 0-10 where 0 corresponds to "low percentage of deposits held in privately owned banks", "high foreign bank license denial rate", "private sector"s share of credit is close to the base-year-minimum", "deposit and lending rates is fixed by the government and real rates is persistently negative", "high impact of minimum wage", "widespread use of price controls throughout various sectors of the economy", and "starting a new business is generally complicated" and 10 corresponds to "high percentage of deposits held in privately owned banks", "low foreign bank license denial rate", "

"private sector"s share of credit is close to the base-year-maximum", "interest rates is determined primarily by market forces and the real rates is positive", "low impact of minimum wage", "no price controls or marketing boards", and "starting a new business is generally easy". The index consists of the following indicators: Credit Market Regulations, Labor Market Regulations, Business Regulations.

Min. Year:1970 Max. Year: 2015 N: 160 n: 2802  $\overline{N}$ : 61  $\overline{T}$ : 18

# 4.39.8 fi\_reg\_pd Regulation of Credit, Labor and Business (panel data)

# State Capacity, Minority Shareholder Protections, and Stock Market Development

A longitudinal dataset on the adoption of minority shareholders' legal protections and the development of the stock market in 78 countries between 1970 and 2011.

# 4.40.1 gc shr Minority Shareholder Rights

The ten key legal provisions identified as most relevant to the protection of minority shareholder rights are coded by a team of legal scholars coded between 0 and 1. The measures are not dichotomous because intermediate scores between 0 and 1 are possible. The sum of the scores for each of the ten legal provisions are the value of the variable, ranging from 0 to 10.

The ten legal provisions protecting the rights of minority shareholders:

- 1. Powers of the general meeting for de facto changes
- 2. Agenda-setting power
- 3. Anticipation of shareholder decision facilitated
- 4. Prohibition f multiple voting rights (super voting rights)
- 5. Independent board members
- 6. Feasibility of directors' dismissal
- 7. Private enforcement of directors' duties (derivative suit)
- 8. Shareholder action against resolutions of the general meeting
- 9. Mandatory bid
- 10. Disclosure of major share ownership

# **Global Corruption Barometer**

The Global Corruption Barometer is the only world wide public opinion survey about the views and experiences of corruption.

The Global Corruption Barometer asks for people's views on corruption in their country generally, how the level of corruption has changed and in which institution's the problem of corruption is most severe. It also provides a measure of people's experience of bribery in the past year across six different services. The survey asks people how well or badly they think their government has done at stopping corruption.

For the 2015-2017 version all the values have been assigned the year 2016.

Note: Only valid answers are used when calculating the averages, "Unknown", "Don't know" etc. are excluded

For the 2003-2013 version, the data for a country is marked as missing if there are less than 100 respondents per year, if there are 100 or more, the value corresponds to the mean of all answers.

#### 4.42 Gibney, Cornett and Wood

http://www.politicalterrorscale.org/Data/Download.html (Gibney et al., 2018) (Data downloaded: 2019-01-11)

#### The Political Terror Scale

The PTS was first developed in the early 1980s, well before "terrorism" took on much of its present meaning. The "terror" in the PTS refers to state-sanctioned killings, torture, disappearances and political imprisonment that the Political Terror Scale measures. The PTS is computed annually by Mark Gibney, Reed Wood and a group of volunteers well versed in human rights practices. The "data" for the PTS is provided by the annual reports on human rights practices that are published by Amnesty International (A) and the U.S. State Department (S).

#### 4.42.1 gd ptsa Political Terror Scale - Amnesty International

Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.

2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.

3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, forpolitical views is accepted.

4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.

5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

#### 4.42.2 gd ptsh Political Terror Scale - Human Rights Watch

Political Terror Scale Levels from the Human Rights Watch's World Reports:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.

2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.

3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, forpolitical views is accepted.

4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.

5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

### 4.43 Institute for Health Metrics and Evaluation

http://ghdx.healthdata.org/record/global-educational-attainment-1970-2015 (Institute for Health Metrics and Evaluation (IHME), 2015) (Data downloaded: 2018-11-16)

#### Global Educational Attainment 1970-2015

These are IHME results data from a global analysis of educational attainment spanning the last 50 years. These data are an update to earlier estimates (Educational Attainment and Child Mortality Estimates by Country 1970-2009) and inform the IHME policy report "A Hand Up: Global Progress Towards Universal Education," as well as the Social Determinants of Health Visualization, which is supported by the Center for Health Trends and Forecasts at IHME.

This data file provides estimates of average years of educational attainment per capita for people over the age of 15 for the years 1970-2015 by year, sex, and age group for 188 countries, 21 GBD regions, 7 GBD super regions, and the global aggregate. Age-standardized and population-weighted estimates are included for females 15-44 and for both sexes for the age group 25+

#### 4.44 United Nations Development Programme

http://hdr.undp.org/en/data (United Nations Development Program, 2018a) (Data downloaded: 2018-12-04)

#### The Gender Inequality Index

The Gender Inequality Index (GII) reflects gender-based disadvantage in three dimensions - reproductive health, empowerment and the labour market - for as many countries as data of reasonable quality allow. It shows the loss in potential human development due to inequality between female and male achievements in these dimensions. It ranges from 0, where women and men fare equally, to 1, where one gender fares as poorly as possible in all measured dimensions.

#### 4.44.1 gii gii Gender Inequality Index

The GII is an inequality index. It measures gender inequalities in three important aspects of human development Ureproductive health, measured by maternal mortality ratio and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same framework as the IHDIUto better expose differences in the distribution of achievements between women and men. It measures the human development costs of gender inequality. Thus the higher the GII value the more disparities between females and males and the more loss to human development.

### 4.45 Global Integrity

http://www.globalintegrity.org (Global Integrity, 2013) (Data downloaded: 2018-10-23)

#### Global Integrity Report - Data

The Global Integrity Report is an essential guide to anti-corruption institutions and mechanisms around the world, intended to help policymakers, advocates, journalists and citizens identify and anticipate the areas where corruption is more likely to occur within the public sector. The Report evaluates both anticorruption legal frameworks and the practical implementation and enforcement of those frameworks, and takes a close look at whether citizen can effectively access and use anticorruption safeguards. Each country assessment contained in the Global Integrity Report comprises two core elements: a qualitative Reporter's Notebook and a quantitative Integrity Indicators scorecard. An Integrity Indicators scorecard assesses the existence, effectiveness, and citizen access to key governance and anti-corruption mechanisms through more than 300 actionable indicators. They are scored by a lead in-country researcher and blindly reviewed by a panel of peer reviewers, a mix of other in-country experts as well as outside experts. Reporter's Notebooks are reported and written by in-country journalists and blindly reviewed by the same peer review panel.

The dataset has been discontinued since 2011 with data for some countries in 2012 and 2013.

#### 4.45.1 gir acrl Anti-Corruption and Rule of Law

This category examines a country's anti-corruption laws, the country's anti-corruption agency (or equivalent mechanism), citizen access to justice, and law enforcement accountability.

 $\mathbf{N}:\,\mathrm{N/A}$  Min. Year:  $\mathrm{N/A}$  Max. Year:  $\mathrm{N/A}$ 

#### 4.45.2 gir acs Administration and Civil Service

This category examines administration and civil service regulations, whistleblower protections, and transparency around government procurement and privatization.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.45.3 gir\_csmai Civil Society, Media, Access to Information

This category examines civil society organizations working on anti-corruption issues, the media's effectiveness in reporting on corruption (including licensing requirements), and public access to information.

N: N/A Min. Year: N/A Max. Year: N/A

#### gir e Elections 4.45.4

This category assesses voting and elections integrity as well as regulations governing the financing of political parties and candidates.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 2004 Max. Year: 2011 **N**: 94 **n**: 251  $\overline{N}$ : 31  $\overline{T}$ : 3

#### 4.45.5gir ga Government Accountability

This category explores the existence and effectiveness of conflicts of interest regulations, "cooling off" periods for former government officials, and asset disclosure requirements in the executive, legislative, and judicial branches. Budget transparency is also assessed.

#### 4.45.6 gir gii Global Integrity Index

The Global Integrity Index assesses the existence, effectiveness, and citizen access to key anticorruption mechanisms at the national level in a country. It does not measure corruption per se or perceptions of corruption. Nor does it measure governance "outputs". Instead, the index quantitatively assesses the opposite of corruption, that is, the access that citizens and businesses have to a country's government, their ability to monitor its behavior, and their ability to seek redress and advocate for improved governance. In-country teams of social scientists and journalists report on the de jure as well as de facto reality of corruption and anticorruption mechanisms. The index grades countries on a 0 to 100 scale, with 0 being the worst score and 100 the best. The overall index is the average of the following six variables (which in turn are built on more than 300 indicators): Civil Society, Media, Access to Information, Elections, Government Accountability, Administration and Civil Service, Oversight and Regulation, Anti-Corruption and Rule of Law.

Note: The original source use a different scale for the year 2004. We have rescaled the data for this year to the same scale as the following years (0-100).

Min. Year: 2004 Max. Year: 2011 N: 94 n: 251  $\overline{N}$ : 31  $\overline{T}$ : 3

### 4.47 Bormann and Golder

https://dataverse.harvard.edu/dataset.xhtml?persistentId=hdl:1902.1/10479 (Bormann & Golder, 2013) (Data downloaded: 2018-07-17)

#### Democratic Electoral Systems Around the World 1946-2016

The data focus on national-level (lower house) legislative and presidential elections in democratic regimes. A regime is classified as a democracy at the time of an election if (i) the chief executive is elected, (ii) the legislature is elected, (iii) there is more than one party competing in elections, and (iv) an alternation under identical electoral rules has taken place. A regime is classified as a dictatorship at the time of an election if any of these four conditions do not hold (Przeworski et al., 2000; Cheibub, Gandhi and Vreeland, 2010).

Note: The original values of -99 (the information is missing but should theoretically be available) and -88 (there is no single value for this particular variable) have been recoded to . (missing).

### 4.47.1 gol\_adm Average District Magnitude

Average district magnitude in an electoral tier. This is calculated as the total number of seats allocated in an electoral tier divided by the total number of districts in that tier.

Min. Year:1946 Max. Year: 2018 N: 133 n: 5725  $\overline{N}$ : 78  $\overline{T}$ : 43

#### 4.47.2 gol\_dist Districts

This is the number of electoral districts or constituencies in an electoral tier.

Min. Year:1946 Max. Year: 2018 N: 133 n: 5752  $\overline{N}$ : 79  $\overline{T}$ : 43

Effective Number of Electoral Parties.

Min. Year:2015 Max. Year: 2016 N: 120

Min. Year:1946 Max. Year: 2018 N: 124 n: 5341  $\overline{N}$ : 73  $\overline{T}$ : 43

#### 4.47.4 gol enep1 Effective Number of Electoral Parties 1

The effective number of electoral parties once the "other" category has been "corrected" by using the least component method of bounds.

Min. Year:1946 Max. Year: 2018 N: 124 n: 5327  $\overline{N}$ : 73  $\overline{T}$ : 43

#### 4.47.5 gol enepo Effective Number of Electoral Parties (Others)

The percentage of the vote going to parties that are collectively known as "others" in official election results.

**4.47.6** gol\_enpp Effective Number of Parliamentary or Legislative Parties The effective number of parliamentary (legislative) parties.

4.47.7 gol enpp1 Effective Number of Parliamentary or Legislative Parties 1

This is the effective number of parliamentary (legislative) parties once the "other" category has been "corrected" by using the least component method of bounds.

Min. Year:1946 Max. Year: 2018 N: 129 n: 5559  $\overline{N}$ : 76  $\overline{T}$ : 43

#### 4.47.8 gol\_enppo Effective Number of Parliamentary or Legislative Parties (Others)

The percentage of seats won by parties that are collectively known as "others" in official election results.

Min. Year:2015 Max. Year: 2016 N: 124

Min. Year:1946 Max. Year: 2018 N: 129 n: 5559  $\overline{N}$ : 76  $\overline{T}$ : 43

#### 4.47.9 gol\_enpres Effective Number of Presidential Candidates

The effective number of presidential candidates.

#### 4.47.10 gol est Electoral System Type-3 classes

This is a categorical variable that takes on one of three values indicating the basic type of electoral system used in the elections.

- 1. Majoritarian
- 2. Proportional
- 3. Mixed

4.47.11 gol est spec Electoral System Type-11 classes

This is a categorical variable that provides a more detailed indication of the type of electoral system used in the election.

- 1. Single-Member-District-Plurality (SMDP)
- 2. Two-Round System (TRS)
- 3. Alternative Vote (AV)
- 4. Borda Count (BC)
- 5. Block Vote (BV)
- 6. Party Block Vote (PBV)
- 7. Limited Vote (LV)
- 8. Single Nontransferable Vote (SNTV)
- 9. List Proportional Representation (List PR)
- 10. Single Transferable Vote (STV)
- 11. Mixed Dependent (or Mixed Member Proportional)
- 12. Mixed Independent (or Mixed Parallel)

Min. Year:2015 Max. Year: 2015 N: 129

Min. Year:1946 Max. Year: 2018 N: 134 n: 5879  $\overline{N}$ : 81  $\overline{T}$ : 44

#### 4.47.12 gol inst Institution

This is a categorical variable indicating a country's regime type at the end of the given year. The data for this variable come from Cheibub, Gandhi and Vreeland (2010), which we updated through 2011.

- 0. Parliamentary democracy
- 1. Semi-presidential democracy
- 2. Presidential democracy
- 3. Civilian dictatorship
- 4. Military dictatorship
- 5. Royal dictatorship

Not all elections that occur when a regime is classified as a dictatorship (regime= 4-6) are dictatorial. This apparent anomaly has to do with the fact that a country's regime type is coded based on its status at the end of a given year. Elections like those in Argentina 1962, Nicaragua 1983, Philippines 1965, and Thailand 1976 all preceded a democratic collapse in the same year. Although these countries are considered dictatorial at the end of these years, we code these particular elections as democratic and therefore include them in our data set. We should note that we code the 1997 elections in Kenya, the 1999 elections in Guinea Bissau, the 2005 elections in Liberia, the 2006 elections in Mauritania, and the 2008 elections in Bangladesh as democratic even though Cheibub, Gandhi and Vreeland (2010) do not code these countries as democratic until the following year. The reason for this is that these elections are the primary reason cited by Cheibub, Gandhi and Vreeland (2010) for their eventual recoding of these countries as democratic. As an example, Cheibub, Gandhi and Vreeland (2010) do not code Liberia as democratic until 2006 despite the fact that presidential elections took place in October 2005, because the winner of these elections, Ellen Johnson-Sirleaf, did not officially take office until January 2006. The bottom line is that there are a few observations in our data set of democratic elections where regime indicates that the country was a dictatorship by the end of the year.

#### 4.47.13 gol mix Mixed Type

This is a categorical variable that indicates the precise type of mixed electoral system that is being used.

- 1. Coexistence
- 2. Superposition
- 3. Fusion
- 4. Correction
- 5. Conditional

Min. Year:2015 Max. Year: 2015 N: 33

Min. Year:1946 Max. Year: 2018 N: 35 n: 1034  $\overline{N}$ : 14  $\overline{T}$ : 30

## 4.47.14 gol\_mt Multi-Tier Type

This is a dichotomous variable that indicates whether different electoral tiers are linked (1) or not (0). Electoral tiers are linked if the unused votes from one electoral tier are used to allocate seats in another electoral tier, or if the allocation of seats in one electoral tier is conditional on the seats received in a different electoral tier.

Min. Year:1946 Max. Year: 2018 N: 134 n: 5879  $\overline{N}$ : 81  $\overline{T}$ : 44

#### 4.47.15 gol nos Number of Seats

This indicates the total number of seats in the lower house of the national legislature.

4.47.16 gol pest Presidential Electoral System Type

This is a categorical variable that indicates the electoral formula used in the presidential election.

- 1. Plurality
- 2. Absolute Majority
- 3. Qualified Majority
- 4. Electoral College
- 5. Alternative Vote

Min. Year:2015 Max. Year: 2015 N: 69

Min. Year:1946 Max. Year: 2018 N: 70 n: 2677  $\overline{N}$ : 37  $\overline{T}$ : 38

#### 4.47.17 gol pr PR Type

This is a categorical variable that indicates the precise electoral formula used in an electoral tier.

- 1. Single-Member-District-Plurality (SMDP)
- 2. Two Round Majority-Plurality
- 3. Two Round Qualified Majority
- 4. Two Round Majority Runoff
- 5. Alternative Vote (AV)
- 6. Borda Count (BC)
- 7. Modified Borda Count (mBC)
- 8. Block Vote (BV)
- 9. Party Block Vote (PBV)
- 10. Limited Vote (LV)
- 11. Single Nontransferable Vote (SNTV)
- 12. Hare quota
- 13. Hare quota with largest remainders
- 14. Hare quota with highest average remainders
- 15. Hagenbach-Bischoff quota
- 16. Hagenbach-Bischoff quota with largest remainders
- 17. Hagenbach-Bischoff quota with highest average remainders
- 18. Droop quota
- 19. Droop quota with largest remainders
- 20. Droop quota with highest average remainders
- 21. Imperiali quota
- 22. Imperiali quota with largest remainders
- 23. Imperiali quota with highest average remainders
- 24. Reinforced Imperiali quota
- 25. D'Hondt
- 26. Sainte-Laguë
- 27. Modified Sainte-Laguë

28. Single Transferable Vote.

Note: a detailed description of the difference between types you can find in the original codebook.

Min. Year:2015 Max. Year: 2015 N: 129

Min. Year:1946 Max. Year: 2018 N: 134 n: 5854  $\overline{N}$ : 80  $\overline{T}$ : 44

#### 4.47.18 gol preel Presidential Election

This is a dichotomous variable that takes on the value 1 if the election is presidential and 0 if the election is legislative.

Min. Year:1946 Max. Year: 2018 N: 134 n: 5916  $\overline{N}$ : 81  $\overline{T}$ : 44

#### 4.47.19 gol upseat Upper Seats

This indicates the number of legislative seats allocated in electoral districts above the lowest electoral tier.

**N**: 127

Min. Year:1946 Max. Year: 2018 N: 132 n: 5664  $\overline{N}$ : 78  $\overline{T}$ : 43

This indicates the percentage of all legislative seats allocated in electoral districts above the lowest electoral tier.

Min. Year:2015 Max. Year: 2016 N: 127

Min. Year:1946 Max. Year: 2018 N: 132 n: 5664  $\overline{N}$ : 78  $\overline{T}$ : 43

#### 4.48 Gerring, Thacker and Moreno

http://www.bu.edu/sthacker/research/articles-and-data/ (Gerring et al., 2005) (Data downloaded: 2018-07-17)

#### **Centripetal Democratic Governance**

Data used in the book A Centripetal Theory of Democratic Governance (Gerring, John and Thacker, Strom C, 2008).

#### 4.48.1 gtm parl Parliamentarism

The parliamentary/presidential distinction is conceptualized as a continuum with two dimensions: (a) the degree of separation (independence) between president and parliament (unity = parliamentary, separation = presidential) and, if there is any separation at all, (b) the relative power of the two players (the more power the president possesses, the more presidential is the resulting system). This complex reality is captured with a three-part coding scheme:

- 0. Presidential
- 1. Semi-presidential
- 2. Parliamentary

 $\mathbf{N}:\,\mathrm{N/A}$  Min. Year:  $\mathrm{N/A}$  Max. Year:  $\mathrm{N/A}$ 

Min. Year:1946 Max. Year: 2002 N: 167 n: 4428  $\overline{N}$ : 78  $\overline{T}$ : 27

#### 4.48.2 gtm pr Proportional Representation

The centripetal theory of democratic governance emphasizes the following three features of an electoral system: (a) district magnitude (M), (b) seat allocation rules (majoritarian or proportional), and (c) candidate selection rules. The centripetal ideal type is defined by M>1, proportional seat allocation rules, and party-controlled candidate selection. This is the closed-list-PR electoral system. Other systems are ranked lower in this coding according to their deviation from this ideal type. Thus, the coding for the list-PR variable is as follows:

- 0. Majoritarian or Preferential-vote
- 1. Mixed-member majority or Block vote.
- 2. Closed-list-PR

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2002 N: 168 n: 4431  $\overline{N}$ : 78  $\overline{T}$ : 26

4.48.3 gtm\_unit Unitarism

Average of Nonfederalism and Nonbicameralism: Nonfederalism is coded as 0 = federal (elective regional legislatures plus conditional recognition of subnational authority), 1 = semifederal (where there are elective legislatures at the regional level but in which constitutional sovereignty is reserved

to the national government), or 2 = non-federal. Nonbicameralism is coded as 0 = strong bicameral (upper house has some effective veto power; the two houses are incongruent), 1 = weak bicameral (upper house has some effective veto power, though not necessarily a formal veto; the two houses are congruent), or 2 = unicameral (no upper house or weak upper house).

N: N/A Min. Year: N/A Max. Year: N/A

**Nin. Year**: 1946 **Max. Year**: 2002 **N**: 167 **n**: 4428  $\overline{N}$ : 78  $\overline{T}$ : 27

#### 4.49 Geddes, Wright and Frantz

http://sites.psu.edu/dictators/ (Geddes et al., 2014a) (Data downloaded: 2018-07-17)

#### Autocratic Regime Data: Autocratic Regimes

When the leader of an autocratic regime loses power, one of three things happens. The incumbent leadership group is replaced by democratically elected leaders. Someone from the incumbent leadership group replaces him, and the regime persists. Or the incumbent leadership group loses control to a different group that replaces it with a new autocracy. The data set that facilitates the investigation of all three kinds of transition. The data identify how regimes exit power, how much violence occurs during transitions, and whether the regimes that precede and succeed them are autocratic. The data identify autocratic regime breakdowns regardless of whether the country democratizes, which makes possible the investigation of why the ouster of dictators sometimes leads to democracy but often does not, and many other questions.

#### 4.49.1 gwf\_duration Duration of Autocratic Regime

Time-varying duration of autocratic regime up to time t.

# Variable not included in Cross-Section Data

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010 N: 123 n: 4554  $\overline{N}$ : 70  $\overline{T}$ : 37

https://mgmt.wharton.upenn.edu/profile/1327 (Henisz, 2017) (Data downloaded: 2018-07-16)

#### The Political Constraints Data

The measure of political constraints employed estimates the feasibility of policy change (the extent to which a change in the preferences of any one actor may lead to a change in government policy) using the following methodology. First, extracting data from political science databases, it identifies the number of independent branches of government (executive, lower and upper legislative chambers) with veto power over policy change. The preferences of each of these branches and the status quo policy are then assumed to be independently and identically drawn from a uniform, unidimensional policy space. This assumption allows for the derivation of a quantitative measure of institutional hazards using a simple spatial model of political interaction.

#### 4.50.1 h align11 Alignment Executive/Legislative Chamber (lower)

Dummy variable indicating alignment between the executive and the lower legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the lower legislative chamber or is a member of a ruling coalition in that chamber.

4.50.2 h align1112 Alignment Lower/Upper Legislative Chamber

Dummy variable indicating alignment between the legislative chambers, coded 1 when the same party or a coalition of parties (when available) control a majority in both legislative chambers.

Min. Year:1946 Max. Year: 2016 N: 66 n: 1825  $\overline{N}$ : 26  $\overline{T}$ : 28

#### 4.50.3 h align12 Alignment Executive/Legislative Chamber (upper)

Dummy variable indicating alignment between the executive and the upper legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the upper legislative chamber or is a member of a ruling coalition in that chamber.

Min. Year:1946 Max. Year: 2016 N: 66 n: 1825 N: 26 T: 28

#### 4.50.4 h f Independent Sub-Federal Unit

Dummy variable coded 1 if there are independent sub-federal units (states, provinces, regions etc.) that impose substantive constraints on national fiscal policy.

Min. Year:1946 Max. Year: 2016 N: 200 n: 9196  $\overline{N}$ : 130  $\overline{T}$ : 46

#### 4.50.5 h\_j Independent Judiciary

Dummy variable coded 1 if there is an independent judiciary (based on information from Polity's Executive Constraints, p xconst) and - where available - on ICRG's index of Law & Order.

4.50.6 h l1 Legislative Chamber

Dummy variable coded 1 if there is an effective legislative chamber (based on information from Polity's Executive Constraints, p\_xconst).

Min. Year:1946 Max. Year: 2016 N: 200 n: 10282  $\overline{N}$ : 145  $\overline{T}$ : 51

#### 4.50.7 h\_l2 2nd Legislative Chamber

Dummy variable coded 1 if there is an effective second legislative chamber, namely, where  $h_{11=1}$  and records on the composition of a second chamber exist - where that chamber is elected under a distinct electoral system and has a substantive (not merely delaying) role in the implementation of fiscal policy.

N: 184

Min. Year:1946 Max. Year: 2016 N: 200 n: 10282  $\overline{N}$ : 145  $\overline{T}$ : 51

#### 4.50.8 h lflo Legislative Fractionalization (lower)

Legislative fractionalization is approximately the probability that two random draws from the lower legislative chamber will be from different parties.

Min. Year:1946 Max. Year: 2016 N: 195 n: 8323  $\overline{N}$ : 117  $\overline{T}$ : 43

#### 4.50.9 h lfup Legislative Fractionalization (upper)

Legislative fractionalization is approximately the probability that two random draws from the upper legislative chamber will be from different parties.

#### 4.50.10 h polcon3 Political Constraints Index III

This index measures the feasibility of policy change, i.e. the extent to which a change in the preferences of any one political actor may lead to a change in government policy. The index is composed from the following information: the number of independent branches of government with veto power over policy change, counting the executive and the presence of an effective lower and upper house in the legislature (more branches leading to more constraint); the extent of party alignment across branches of government, measured as the extent to which the same party or coalition of parties control each branch (decreasing the level of constraint); and the extent of preference heterogeneity within each legislative branch, measured as legislative fractionalization in the relevant house (increasing constraint for aligned executives, decreasing it for opposed executives). The index scores are derived from a simple spatial model and theoretically ranges from 0 to 1, with higher scores indicating more political constraint and thus less feasibility of policy change. Note that the coding reflects information as of January 1 in any given year. Henisz (2002) uses this index to demonstrate that political environments that limit the feasibility of policy change are an important determinant of investment in infrastructure.

Min. Year:1946 Max. Year: 2016 N: 201 n: 10325  $\overline{N}$ : 145  $\overline{T}$ : 51

#### 4.50.11 h\_polcon5 Political Constraints Index V

This index follows the same logic as Political Constraints Index III (h\_polcon3) but also includes two additional veto points: the judiciary and sub-federal entities. Note that the coding reflects information as of January 1 in any given year. Henisz (2000) uses this index to measure the impact on cross-national growth rates of a government's ability to provide credible commitment.

Min. Year:1960 Max. Year: 2016 N: 183 n: 8352  $\overline{N}$ : 147  $\overline{T}$ : 46

#### 4.51 Heritage Foundation

http://www.heritage.org/index/explore (Miller et al., 2018) (Data downloaded: 2018-07-17)

#### Index of Economic Freedom

The Index of Economic Freedom covers 10 freedoms - from property rights to entrepreneurship - in 186 countries.

Note: For the 2015, most data covers the second half of 2013 through the first half of 2014. To the extent possible, the information considered for each factor was current as of June 30, 2014. It is important to understand that some factors are based on historical information. For example, the monetary policy factor is a 3-year weighted average rate of inflation from January 1, 2011, to December 31, 2013.

#### 4.51.1 hf business Business Freedom

The business freedom score encompasses 10 components, all weighted equally, based on objective data from the World Bank's Doing Business study (in 2005-2006; previously other data sources were being used):

- Starting a business procedures (number)
- Starting a business time (days)
- Starting a business cost (% of income per capita)
- Starting a business minimum capital (% of income per capita)
- Obtaining a license procedures (number)
- Obtaining a license time (days)
- Obtaining a license cost (% of income per capita)
- Closing a business time (years)
- Closing a business cost (% of estate)
- Closing a business recovery rate (cents on the dollar)

Each of these raw components is converted into a scale graded from 0 to 100, where 100 represents the maximum degree of business freedom.

Min. Year:2015 Max. Year: 2017 N: 183

Min. Year:1995 Max. Year: 2018 N: 184 n: 3892  $\overline{N}$ : 162  $\overline{T}$ : 21

#### 4.51.2 hf\_efiscore Economic Freedom Index

The Economic Freedom index uses 10 specific freedoms, some as composites of even further detailed and quantifiable components:

- Business freedom (hf\_business)
- Trade freedom (hf trade)
- Fiscal freedom (hf\_fiscal)
- Freedom from government (hf govt)
- Monetary freedom (hf monetary)
- Investment freedom (hf\_invest)
- Financial freedom (hf financ)
- Property rights (hf prights)
- Freedom from corruption (hf corrupt)
- Labor freedom (hf labor).

Each of these freedoms is weighted equally and turned into an index ranging from 0 to 100, where 100 represents the maximum economic freedom. Although changes in methodology have been undertaken throughout the measurement period, continuous backtracking has been used to maximize comparability over time.

#### 4.51.3 hf\_financ Financial Freedom

The financial freedom factor measures the relative openness of each country's banking and financial system by determining: the extent of government regulation of financial services; the extent of state intervention in banks and other financial services; the difficulty of opening and operating financial services firms (for both domestic and foreign individuals); and government influence on the allocation of credit. The country's financial climate is measured as an overall score between 0 and 100, where 100 represent the maximum degree of financial freedom.

#### 4.51.4 hf\_govint Government Integrity

Scale from 0 to 100, where 100 indicates very little corruption.

Corruption erodes economic freedom by introducing insecurity and uncertainty into economic relationships. The score for this component is derived primarily from Transparency International's Corruption Perceptions Index (CPI) for 2011, which measures the level of corruption in 183 countries.

2 2 2 2 1 1950 1978 1980 1998 2000 2010

Year:2015 Max. Year: 2015 N: 182

#### 4.51.5 hf govt Freedom from Government

Scoring of the freedom from government factor is based on two components: Government expenditure as a percentage of GDP, Revenues generated by state-owned enterprises (SOEs) and property as a percentage of total government revenue. Government expenditure as a percentage of GDP is weighted as two-thirds of the freedom from government factor score, and revenue from SOEs is weighted as one-third. In cases where SOE data does not exist, the data is excluded from the factor score. The country's freedom from government ranges between 0 and 100, where 100 represents the maximum degree of freedom from government.

### 4.51.6 hf invest Investment Freedom

This factor scrutinizes each country's policies toward foreign investment, as well as its policies toward capital flows internally, in order to determine its overall investment climate. The country's investment freedom ranges between 0 and 100, where 100 represent the maximum degree of investment freedom.

Min. Year:2015 Max. Year: 2015 N: 181

Min. Year:1995 Max. Year: 2018 N: 183 n: 3885  $\overline{N}$ : 162  $\overline{T}$ : 21

### 4.51.7 hf labor Labor Freedom

The new labor freedom factor is a quantitative factor based on objective data from the World Bank's Doing Business study. It provides reliable cross-country data on regulations concerning minimum wages, laws inhibiting layoffs, severance requirements, and measurable regulatory burdens on hiring, hours, and so on. Specifically, four quantitative components are equally weighted as 25 percent of the labor freedom factor: Minimum wage, Rigidity of hours, Difficulty of firing redundant employees. The country's labor freedom score ranges from 0 to 100, where 100 represent the maximum degree of labor freedom.

### 4.51.8 hf monetary Monetary Freedom

The score for the monetary freedom factor is based on two components: The weighted average inflation rate for the three most recent years, Price controls. The weighted average inflation (WAI) rate for the three most recent years serves as the primary input into an equation that generates the base score for monetary freedom (MF). The extent of price controls is then assessed as a penalty of up to 20 percent subtracted from the base score. The country's monetary freedom ranges between 0 and 100, where 100 represents the maximum degree of monetary freedom.

### 4.51.9 hf\_prights Property Rights

This factor scores the degree to which a country's laws protect private property rights and the degree to which its government enforces those laws. It also accounts for the possibility that private property will be expropriated. In addition, it analyzes the independence of the judiciary, the existence of corruption within the judiciary, and the ability of individuals and businesses to enforce contracts. The less certain the legal protection of property is and the greater the chances of government expropriation of property are, the higher a country's score is. The country's property rights score ranges from 0 and 100, where 100 represents the maximum degree of protection of property rights.

### 4.51.10 hf taxbur Tax Burden

Tax burden is a composite measure that reflects marginal tax rates on both personal and corporate income and the overall level of taxation (including direct and indirect taxes imposed by all levels of government) as a percentage of gross domestic product (GDP).

With an equal weighting system, it allows a country to achieve a score as high as 67 percent based on two of the components even if it receives a score of 0 percent on the third. The country's fiscal freedom ranges between 0 and 100, where 100 represent the maximum degree of fiscal freedom.

Min. Year:2013 Max. Year: 2017 N: 182

Min. Year:1995 Max. Year: 2018 N: 183 n: 3875  $\overline{N}$ : 161  $\overline{T}$ : 21

### 4.51.11 hf trade Trade Freedom

The trade freedom score is based on two inputs: The trade-weighted average tariff rate, Non-tariff barriers (NTBs). Weighted average tariffs is a purely quantitative measure and accounts for the basic calculation of the score. The presence of NTBs in a country affects its trade freedom score by incurring a penalty of up to 20 percentage points, or one-fifth of the maximum score. The country's trade freedom ranges between 0 and 100, where 100 represents the maximum degree of trade freedom.

Min. Year:2015 Max. Year: 2017 N: 181

Min. Year:1995 Max. Year: 2018 N: 183 n: 3878  $\overline{N}$ : 162  $\overline{T}$ : 21

### 4.52 Hollyer, Rosendorff and Vreeland

http://hrvtransparency.org/ (Hollyer et al., 2014) (Data downloaded: 2018-08-17)

### HRV Transparency Project

The HRV Transparency project examines the causes and consequences of government transparency both through theoretical and empirical approaches with the measure of government transparency or HRV Index. The HRV index contrasts with other measurements because it relies on a precise and narrow conception of transparency: the disclosure of policy-relevant information by the government to the public.

The HRV Index focuses on the availability of credible aggregate economic data. It does so by examining patterns of missing data and treating transparency as the latent term which best reflects the tendency to disclose. This measure provides observations for 125 countries from 1980-2010 and can be used to measure relationships between transparency and other issues such as democracy, accountability, or political instability. Transparency encompasses many dimensions. The HRV index measures a specific aspect of government transparency: reporting national data to international organizations. Rather than rely on expert but subjective judgments, the measure is based on objective criteria. The HRV team uses "Item Response Theory" a highly sophisticated and computationally intense method to estimate transparency. This method assigns different weights for reporting distinct measures of the economy, based on how many other countries actually reported data on the measure, and how much a country distinguishes itself from other countries by reporting data on a given measure. (Technically, the model estimates "difficulty" and "discrimination" parameters for each economic variable.)

The model analyzes 240 measures of the economy consistently collected by the World Bank's World Development Indicators. Since the World Bank obtains its data from other international agencies that, in turn, obtain their data from national statistical offices, the HRV measure is a valid indicator of governments' efforts to collect and disseminate economically relevant information. Moreover, because the World Bank omits data considered "questionable," this index reflects the collection and dissemination of generally credible information about a country's national economy.

### 4.52.1 hrv index HRV Index

The point estimate of the HRV index.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

### 4.53 Hadenius and Teorell

https://sites.google.com/site/authoritarianregimedataset/data (Wahman et al., 2013) (Hadenius & Teorell, 2007) (Data downloaded: 2018-07-17)

### The Authoritarian Regime Dataset

The Authoritarian Regimes Dataset version 6.0 covers the time period 1972-2014 and includes all 192 nations recognized as members of the UN except the four Şmicro statesŤ of Europe (Andorra, Liechtenstein, Monaco and San Marino) and two Şmicro statesŤ in the Pacific that are not members of the World Bank (Nauru and Tuvalu).

### 4.53.1 ht\_colonial Colonial Origin

This is a tenfold classification of the former colonial ruler of the country. Following Bernard et al (2004), we have excluded the British settler colonies (the US, Canada, Australia, Israel and New

Zeeland), and exclusively focused on "Western overseas" colonialism. This implies that only Western colonizers (e.g. excluding Japanese colonialism), and only countries located in the non-Western hemisphere "overseas" (e.g. excluding Ireland & Malta), have been coded. Each country that has been colonized since 1700 is coded. In cases of several colonial powers, the last one is counted, if it lasted for 10 years or longer. The categories are the following:

- 0. Never colonized by a Western overseas colonial power
- 1. Dutch
- 2. Spanish
- 3. Italian
- $4.~\mathrm{US}$
- 5. British
- 6. French
- 7. Portuguese
- 8. Belgian
- 9. British-French
- 10. Australian.

Min. Year:2015 Max. Year: 2015 N: 194

Min. Year:1946 Max. Year: 2018 N: 211 n: 11761  $\overline{N}$ : 161  $\overline{T}$ : 56

### 4.53.2 ht partsz Size of Largest Party in Legislature (in Fractions)

Counts the largest parties' number of seats divided by the legislative assemblies' total number of seats expressed in fractions. In countries with a two-chamber parliament the lower house is counted.

**N**: 172

Min. Year:1974 Max. Year: 2013 N: 184 n: 5590  $\overline{N}$ : 140  $\overline{T}$ : 30

### 4.53.3 ht region The Region of the Country

This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with the partial exception of category 5 below) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:

- 1. Eastern Europe and post Soviet Union (including Central Asia)
- 2. Latin America (including Cuba, Haiti & the Dominican Republic)
- 3. North Africa & the Middle East (including Israel, Turkey & Cyprus)
- 4. Sub-Saharan Africa
- 5. Western Europe and North America (including Australia &New Zeeland)
- 6. East Asia (including Japan & Mongolia)
- 7. South-East Asia
- 8. South Asia
- 9. The Pacific (excluding Australia & New Zeeland)

10. The Caribbean (including Belize, Guyana & Suriname, but excluding Cuba, Haiti & the Dominican Republic)

### 4.53.4 ht\_regtype Regime Type

This typology of authoritarian regimes is based on a distinction between three modes of political power maintenance (probably the three most widely used throughout history): hereditary succession (lineage), corresponding to monarchies; the actual or threatened use of military force, corresponding to military regimes; and popular elections, designating electoral regimes. Among the latter we distinguish among no-party regimes (where all parties are prohibited), one-party regimes (where all but one party is prohibited), and limited multiparty regimes (where multiple parties are allowed but the system still does not pass as democratic); a subtype of these regimes where no parties are present, although not being prohibited, are coded as "partyless" regimes. A subtype of military regimes are coded "rebel regimes", where a rebel movement has taken power by military means. We also code hybrids (or amalgams) combining elements from more than one regime type, as well as several minor types of regimes: "theocracies", "transitional" regimes, "civil war", foreign "occupation", and a residual "other" category. Using the mean of the Freedom House and Polity scales (fh ipolity2), the line between democracies and autocracies is drawn at 7.5. This threshold value was chosen by estimating the mean cutoff point separating democracy from autocracy in five well-known categorical measures of democracy: those of Przeworski et al. (2000), Mainwaring et al. (2001), and Reich (2002), together with Freedom House's and Polity's own categorical thresholds for democracy.

- 1. Limited Multiparty
- 2. Partyless
- 3. No-Party
- 4. Military
- 5. Military No-Party
- 6. Military Multiparty
- 7. Military One-party
- 8. One-Party
- 9. Other
- 16. One-Party Monarchy
- 17. Monarchy
- 18. Rebel Regime
- 19. Civil War
- 20. Occupation
- 21. Theocracy
- 22. Transitional Regime
- 23. No-Party Monarchy
- 24. Multiparty Monarchy
- 25.Multiparty-Occupied
- 100. Democracy

### Human Understanding Measured Across National (HUMAN) Surveys

Human Understanding Measured Across National (HUMAN) Surveys combines multiple sources of public opinion data and creates commonly formatted variables. This dataset provides country-survey level data. This means each observation is an aggregated score representing all respondents within a country for a survey round. The data is structured to facilitate analysing multiple sources of survey data over time. Some sources survey the same country in the same year, which creates overlapping county-year observations. Some surveys also span multiple years, creating more overlaps between surveys and sources. A country-year variable therefore does not specify unique observations, which is problematic when trying to merge other country-year datasets. The HUMAN Surveys: Country-Year Data combines overlapping cases to ensure unique country-year observations, making it ideal for merging with other country-year datasets.

### 4.54.1 hum pei Perceived electoral integrity index

These index scores represent an average of all country-survey scores available within each country-year observation. Overlapping country-survey are averaged to create unique country-year observations. Scores range from 0 representing the lowest possible level of integrity to 100 representing the highest possible level.

### 4.54.2 hum satdem Satisfaction with democracy index

These index scores represent an average of all country-survey scores available within each country-year observation. Overlapping country-survey are averaged to create unique country-year observations. Scores range from 0 representing the lowest possible level of satisfaction to 100 representing the highest possible level.

Min. Year:2012 Max. Year: 2016 N: 106

### 4.55 Institutions and Elections Project

https://havardhegre.net/iaep/ (Wig et al., 2015) (Data downloaded: 2018-10-30)

### Institutions and Elections Project Data

Institutions and Elections Project Data (version 2.0). The objective of the data from the Institutions and Elections Project (IAEP) is to describe the formal institutions that are in place, even if practice does not comport with those formal rules. The data refers to the situation January 1st each year. Note: According to the documentation of the data many of the cases "have more than one executive; [...] the executive referred to may be any one of the executives established in a country." We urge users to refer to the documentation at the IAEP web site for information about which executive each particular case refers to.

Note: Changes from the original version: The dataset has two types of missing values, logical missing values and actual missing values. In the QoG data, logical missing values were recoded to actual missing values. To access data with logical missing values please use original dataset.

### 4.55.18 iaep\_eml Executive is Member of Legislature

Is there an executive who is also a member of the legislature (like a prime minister, for example)? We consider membership in the legislature if either an explicit rule exists which requires an executive to maintain a seat in the legislature, or if practice and/or convention determines membership.

0. No

1. Yes

### 4.55.19 iaep enlc Executive Nomination of Legislature Candidates

Does executive nomination establish how the field of candidates who stand for legislative elections is determined?

0. No

1. Yes

Source: IAEP (Wig et al, 2015)

### 4.55.20 iaep\_epmf Executive Power over Military Force

Does an executive have the power to use military force abroad without legislative approval?

0. No

1. Yes

Source: IAEP (Wig et al, 2015)

Min. Year:2012 Max. Year: 2012 N: 146

Min. Year:1960 Max. Year: 2012 N: 174 n: 6397  $\overline{N}$ : 121  $\overline{T}$ : 37

### 4.55.21 iaep es Electoral System

What is the type of electoral system for legislative elections?

- 1. Plurality (First past the post)
- 2. Majority
- 3. Proportional representation

4. Mixed systems (combination of PR and either plurality or majority). This option includes situations in which a single chamber contains seats selected by different methods, or situations in which all of the seats in a chamber are chosen with the same method, but each chamber is selected through different methods.

### 4.55.22 iaep ese Electoral System for the Executive

Election rules governing the determination of electoral outcomes for the executive: we record data on the electoral requirements for winning executive elections, specifically, the sorts of vote thresholds required for winners. If the executive is appointed or otherwise comes to power via non-electoral processes, we code this as missing.

1. Majority rule (50% + 1) Where run-offs are held, "majority rule" is selected, as the intention of a run-off election is to have one candidate receive a majority of the votes.

2. Plurality

3. No official, explicit, rule governing the outcome

 $4. \ {\rm Party \ leader \ of \ majority \ party/coalition \ in \ legislature \ automatically \ selected \ without \ additional \ process }$

https://www.internationalbudget.org/opening-budgets/open-budget-initiative/open-budget -survey/

(International Budget Partnership, 2017) (Data downloaded: 2018-11-14)

### **Open Budget Survey Data**

The Open Budget Survey is a comprehensive analysis and survey that evaluates whether governments give the public access to budget information and opportunities to participate in the budget process at the national level. The Survey also assess the capacity and independence of formal oversight institutions. The IBP works with civil society partners in 100 countries to collect the data for the survey.

"These materials were developed by the International Budget Partnership. IBP has given us permission to use the materials solely for noncommercial, educational purposes."

### 4.56.1 ibp obi Open Budget Index

The Open Budget Index (OBI) is a comparative measure of central government budget transparency. The OBI assigns countries covered by the Open Budget Survey a transparency score on a 100-point scale using 109 of the 140 questions on the Survey. These questions focus specifically on whether the government provides the public with timely access to comprehensive information contained in eight key budget documents in accordance with international good practice standards.

### 4.57 International Country Risk Guide - The PRS Group

https://www.prsgroup.com/about-us/our-two-methodologies/icrg (PRS Group et al., 2019) (Data downloaded: 2019-01-28)

### ICRG Indicator of Quality of Government

ICRG collects political information and financial and economic data, converting these into risk points.

### 4.57.1 icrg qog ICRG Indicator of Quality of Government

The mean value of the ICRG variables "Corruption", "Law and Order" and "Bureaucracy Quality", scaled 0-1. Higher values indicate higher quality of government.

### Corruption (originally 6 points)

This is an assessment of corruption within the political system . Such corruption is a threat to foreign investment for several reasons: it distorts the economic and financial environment; it reduces the efficiency of government and business by enabling people to assume positions of power through patronage rather than ability; and, last but not least, it introduces an inherent instability into the political process. The most common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licenses, exchange controls, tax assessments, police protection, or loans. Such corruption can make it difficult to conduct business effectively, and in some cases may force the withdrawal or withholding of an investment. Although the measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, "favorfor-favors", secret party funding, and suspiciously close ties between politics and business. According to ICRG, these insidious sorts of corruption are potentially of much greater risk to foreign business in that they can lead to popular discontent, unrealistic and inefficient controls on the state economy, and encourage the development of the black market. The greatest risk in such corruption is that at some time it will become so overweening, or some major scandal will be suddenly revealed, so as to provoke a popular backlash, resulting in a fall or overthrow of the government, a major reorganizing or restructuring of the country's political institutions, or, at worst, a breakdown in law and order, rendering the country ungovernable.

### Law and order (originally 6 points)

Law and Order are assessed separately, with each sub-component comprising zero to three points. The Law sub-component is an assessment of the strength and impartiality of the legal system, while the Order sub-component is an assessment of popular observance of the law. Thus, a country can enjoy a high rating in terms of its judicial system, but a low rating if it suffers from a very high crime rate or if the law is routinely ignored without effective sanction (for example, widespread illegal strikes).

### Bureaucracy Quality (originally 4 points)

The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions.

https://www.wider.unu.edu/project/government-revenue-dataset (ICTD/UNU-WIDER, 2016) (Data downloaded: 2018-10-02)

### ICTD/UNU-WIDER Government Revenue Dataset

A major obstacle to cross-country research on the role of revenue and taxation in development has been the weakness of available data. This paper presents a new Government Revenue Dataset (GRD), developed through the International Centre for Tax and Development (ICTD). The dataset meticulously combines data from several major international databases, as well as drawing on data compiled from all available International Monetary Fund (IMF) Article IV reports.

### 4.58.1 ictd grants Grants

Total grants received by the government

**N:** 146

Min. Year:1980 Max. Year: 2016 N: 162 n: 4221  $\overline{N}$ : 114  $\overline{T}$ : 26

### 4.58.2 ictd nontax Consolidated Non-Tax Revenue

Total non-tax revenue, comprising data categorized as either "non-tax revenue" or "other revenue" depending on the underlying source. Includes revenue from both resource and non-resource sources.

Min. Year:2012 Max. Year: 2016 N: 174

Min. Year:1980 Max. Year: 2016 N: 186 n: 5204  $\overline{N}$ : 141  $\overline{T}$ : 28

### 4.58.3 ictd revexsc Revenue (excluding social contributions)

Total government revenue, excluding social contributions

4.58.4 ictd\_revinsc Revenue (including social contributions)

Total government revenue including taxes, non-tax revenue, grants and social contributions

### 4.58.5 ictd revres Total Resource Revenue

Total natural resource revenues, including natural resource revenues reported as "tax revenue" or "non-tax revenue". Natural resources are here defined as natural resources that include a significant component of economic rent, primarily from oil and mining activities.

Min. Year:2012 Max. Year: 2016 N: 111

Min. Year:1980 Max. Year: 2016 N: 125 n: 2913  $\overline{N}$ : 79  $\overline{T}$ : 23

### 4.58.6 ictd soccon Social Contributions

Total social contributions.

Min. Year:2012 Max. Year: 2016 N: 169

Min. Year:1980 Max. Year: 2016 N: 184 n: 5459  $\overline{N}$ : 148  $\overline{T}$ : 30

### 4.58.7 ictd\_taxcorp Taxes on Corporations and Other Enterprises

Total income and profit taxes on corporations, including taxes on resource firms.

Min. Year:1980 Max. Year: 2016 N: 170 n: 3996  $\overline{N}$ : 108  $\overline{T}$ : 24

4.58.8 ictd\_taxexsc Taxes (excluding social contributions)

Total tax revenue, excluding social contributions

### 4.58.9 ictd taxgs Taxes on Goods and Services

Total taxes on goods and services, which includes (but it not necessarily always equal to) sales taxes and excise taxes.

Min. Year:1980 Max. Year: 2016 N: 182 n: 4858  $\overline{N}$ : 131  $\overline{T}$ : 27

### 4.58.10 ictd taxinc Taxes on Income, Profits, and Capital Gains

Total taxes on income, profits and capital gains, including taxes on natural resource firms. This figure is always exclusive of social contributions. The total value of Taxes on Income, Profits and Capital Gains may sometimes exceed the sum of Individuals and Corporations, due to revenues that are unallocated between the two.

N: 155

Min. Year:1980 Max. Year: 2016 N: 182 n: 4854  $\overline{N}$ : 131  $\overline{T}$ : 27

### 4.58.11 ictd taxind Taxes on Individuals

Total income, capital gains and profit taxes on individuals. This figure is always exclusive of resource

Min. Year:1980 Max. Year: 2016 N: 173 n: 3959  $\overline{N}$ : 107  $\overline{T}$ : 23

### 4.58.12 ictd\_taxindirect Indirect Taxes

Total Indirect Taxes, including resource revenues. Includes taxes on goods and services, taxes on international trade and other taxes. Indirect may exceed the sum of Taxes on Goods and Services, Taxes on International Trade and Transactions and Other Taxes due to unallocated revenue not classified in any of these categories

### 4.58.13 ictd taxinsc Taxes (including social contributions)

Total tax revenue, including social contributions

Min. Year:2012 Max. Year: 2016 N: 172

Min. Year:1980 Max. Year: 2016 N: 184 n: 5322  $\overline{N}$ : 144  $\overline{T}$ : 29

### 4.58.14 ictd taxnresexsc Non-resource Tax (excluding social contributions)

Total non-resource tax revenue, excluding social contributions. Calculated as "Taxes excluding social contributions" minus "resource taxes". This is the variable recommended for econometric analysis, as it is most complete and consistent across countries.

Min. Year:2012 Max. Year: 2016 N: 166

Min. Year:1980 Max. Year: 2016 N: 184 n: 5396  $\overline{N}$ : 146  $\overline{T}$ : 29

### 4.58.15 ictd taxnresinsc Non-Resource Tax (including social contributions)

Total non-resource tax revenue, including social contributions. Calculated as "Taxes including social contributions" minus "resource taxes".

Min. Year:2012 Max. Year: 2016 N: 160

4.58.16 ictd taxother Other Taxes

Total other taxes

Min. Year:1980 Max. Year: 2016 N: 179 n: 5047  $\overline{N}$ : 136  $\overline{T}$ : 28

4.58.17 ictd taxpaywf Taxes on Payroll and Workforce

Total taxes on payroll and workforce. This variable is entirely distinct from social contributions, though in underlying sources social contributions are very occasionally reported as payroll taxes.

Min. Year:2012 Max. Year: 2016 N: 118

Min. Year:1980 Max. Year: 2016 N: 153 n: 3669  $\overline{N}$ : 99  $\overline{T}$ : 24

### 4.58.18 ictd\_taxprop Taxes on Property

Total taxes on property.

Min. Year:2012 Max. Year: 2016 N: 124

Min. Year:1980 Max. Year: 2016 N: 169 n: 4147  $\overline{N}$ : 112  $\overline{T}$ : 25

### 4.58.19 ictd\_taxres Resource Taxes

Min. Year:1980 Max. Year: 2016 N: 178 n: 5176  $\overline{N}$ : 140  $\overline{T}$ : 29

### 4.58.20 ictd\_taxtrade Taxes on International Trade and Transactions

Total taxes on international trade, including both import and export taxes. In some cases this figure may also include VAT collected at the border, where countries consistently report revenue in this way.

Component of reported tax revenue that is from natural resource sources, most often corporate

N: 158

Min. Year:1980 Max. Year: 2016 N: 184 n: 4933  $\overline{N}$ : 133  $\overline{T}$ : 27

### 4.59 Institute for Democracy and Electoral Assistance

https://www.idea.int/data-tools/data/electoral-system-design (The International Institute for Democracy and Electoral Assistance, 2018a) (Data downloaded: 2018-11-01)

### **Electoral System Design**

The Electoral System Design Database is comprised of various reviews of the electoral legislation of countries from around the world. The database research was sourced from national legal documents from different sources, including the official web portals of governments, regional organizations that work in the area of democracy and electoral processes, and research institutes specialized in the area of elections and politics in general.

### 4.59.2 ideaesd\_esnl Electoral System for the National Legislature

Electoral System for National Legislature:

1. List Proportional Representation (List PR)

Under a List Proportional Representation (List PR) system each party or grouping presents a list of candidates for a multi-member electoral district, the voters vote for a party, and parties receive seats in proportion to their overall share of the vote. In some (closed list) systems the winning candidates are taken from the lists in order of their position on the lists. If the lists are 'open' or 'free' the voters can influence the order of the candidates by marking individual preferences.

2. Block Vote (BV)

Block Vote is a plurality/majority system used in multi-member districts. Electors have as many votes as there are candidates to be elected. The candidates with the highest vote totals win the seats. Usually voters vote for candidates rather than parties and in most systems may use as many, or as few, of their votes as they wish.

### 3. First Past the Post (FPTP)

First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

### 4. Two-Round System (TRS)

The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

### 5. Mixed Member Proportional (MMP)

Mixed Member Proportional is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-where the List PR system compensates for the disproportionality in the results from the plurality/majority system.

### 6. Single Transferable Vote (STV)

The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

### 7. Alternative Vote (AV)

The Alternative Vote is a preferential plurality/majority system used in single-member districts. Voters use numbers to mark their preferences on the ballot paper. A candidate who receives an absolute majority (50 per cent plus 1) of valid first preference votes is declared elected. If no candidate achieves an absolute majority of first preferences, the least successful candidates are eliminated and their votes reallocated according to their second preferences until one candidate has an absolute majority. Voters vote for candidates rather than political parties.

### 8. Single Non-Transferable Vote (SNTV)

Under the Single Non-Transferable Vote system voters cast a single vote in a multi-member district. The candidates with the highest vote totals are declared elected. Voters vote for candidates rather than political parties.

### 9. Two-Round System, Party Block Vote (TRS PBV)

Party Block Vote (PBV) is a plurality/majority system using multi-member districts in which voters cast a single party-centered vote for a party of choice, and do not choose between candidates. The party with most votes will win every seat in the electoral district.

### 10. Limited Vote (LV)

Limited Vote is a candidate-centred electoral system used in multi-member districts in which electors have more than one vote, but fewer votes than there are candidates to be elected. The candidates with the highest vote totals win the seats.

11. First Past The Post, Party Block Vote (FPTP PBV)

12. First Past the Post, List Proportional Representation (FPTP List PR)

13. First Past the Post, Block Vote (FPTP BV)

14. First Past the Post, Party Block Vote, List Proportional Representation (FPTP PBV List PR)

### 15. Parallel

A Parallel System is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-but where no account is taken of the seats allocated under the first system in calculating the results in the second system.

### 16. In transition

### 17. Modified Borda Count (Modified BC)

Borda Count (BC) - A candidate-centred preferential system used in either single- or multimember districts in which voters use numbers to mark their preferences on the ballot paper and each preference marked is then assigned a value using equal steps. These are summed and the candidate(s) with the highest total(s) is/are declared elected.

18. Two-Round System, Party Block Vote, List Proportional Representation (TRS PBV List PR)

19. No direct elections.

Min. Year:2012 Max. Year: 2018 N: 191

Min. Year:1969 Max. Year: 2018 N: 195 n: 1165  $\overline{N}$ : 23  $\overline{T}$ : 6

### 4.59.3 ideaesd esp Electoral System for the President

Electoral System for the President:

### 1. Two-Round System (TRS)

The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

### 2. First Past the Post (FPTP)

First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

### 3. Supplementary Vote (SV)

Supplementary vote: Voters can rank up to three candidates, and if no candidate wins a majority in the first round of voting, second and third preferences from ballots whose first preference candidate has been eliminated are used to determine the winner.

### 4. Single Transferable Vote (STV)

The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

https://www.idea.int/data-tools/data/voter-turnout (The International Institute for Democracy and Electoral Assistance, 2018b) (Data downloaded: 2018-11-01)

### Voter Turnout Database

The Voter Turnout Database is the best resource for a wide array of statistics on voter turnout from around the world. It contains the most comprehensive global collection of voter turnout statistics from presidential and parliamentary elections since 1945. Always growing, the database also includes European Parliament elections, as presented by country using both the number of registered voters and voting age population as indicators, and in some cases the data includes statistics on spoilt ballot rate.

### 4.62 Mo Ibrahim Foundation

http://mo.ibrahim.foundation/ (Mo Ibrahim Foundation, 2017) (Data downloaded: 2018-09-14)

#### Ibrahim Index of African Governance

The Ibrahim Index of African Governance (IIAG) is a tool that measures and monitors governance performance in African countries. The IIAG governance framework comprises four categories: Safety & Rule of Law, Participation & Human Rights, Sustainable Economic Opportunity and Human Development. These categories are made up of 14 sub-categories, consisting of 100 indicators. The IIAG is refined on an annual basis. Refinements may be methodological, or based on the inclusion or exclusion of indicators. When new historical data are made available, or the structure of the IIAG is strengthened, the entire data set is updated back to 2000. Users of the Index should therefore always reference the most recent version of the IIAG data set.

#### 4.62.1 iiag acc Accountability

Accountability is one of the four sub-categories that are used to calculate the Safety & Rule of Law category score. It consists of eight indicators from nine data sources.

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.2 iiag\_be Business Environment

Business Environment is one of the four sub-categories that are used to calculate the Sustainable Economic Opportunity category score. It consists of seven indicators from eight data sources.

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.3 iiag edu Education

Education is one of the three sub-categories that are used to calculate the Human Development category score. It consists of eight indicators from five data sources.

#### 4.62.4 iiag gen Gender

Gender is one of the three sub-categories that are used to calculate the Participation & Human Rights category score. It consists of eight indicators from seven data sources.

#### 4.62.5 iiag gov Overall Governance

The Overall Governance score is calculated by aggregating the four categories: Safety & Rule of Law, Participation & Human Rights, Sustainable Economic Opportunity and Human Development. These categories are made up of 14 sub-categories, consisting of 100 indicators, from 36 data sources.

**Min. Year**:2000 **Max. Year**: 2016 **N**: 55 **n**: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.6 iiag hd Human Development

Human Development is one of the four categories that are used to calculate the Overall Governance score. It consists of three sub-categories, made up of 26 indicators, from 12 data sources.

**Min. Year**:2000 **Max. Year**: 2016 **N**: 55 **n**: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.7 iiag he Health

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.8 iiag\_inf Infrastructure

Infrastructure is one of the four sub-categories that are used to calculate the Sustainable Economic Opportunity category score. It consists of five indicators from seven data sources.

4.62.9 iiag ns National Security

National Security is one of the four sub-categories that are used to calculate the Safety & Rule of Law category score. It consists of six indicators from five data sources.

**N**: 54

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.10 iiag par Participation

Participation is one of the three sub-categories that are used to calculate the Participation & Human Rights category score. It consists of five indicators from six data sources.

N: 54

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.11 iiag\_phr Participation and Human Rights

Participation & Human Rights is one of the four categories that are used to calculate the Overall Governance score. It consists of three sub-categories, made up of 19 indicators, from 14 data sources.

#### 4.62.12 iiag\_pm Public Management

Public Management is one of the four sub-categories that are used to calculate the Sustainable Economic Opportunity category score. It consists of nine indicators from nine data sources.

#### 4.62.13 iiag\_ps Personal Safety

Personal Safety is one of the four sub-categories that are used to calculate the Safety & Rule of Law category score. It consists of six indicators from seven data sources.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.14 iiag rig Rights

Rights is one of the three sub-categories that are used to calculate the Participation & Human Rights category score. It consists of six indicators from eight data sources.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.15 iiag\_rol Rule of Law

Rule of Law is one of the four sub-categories that are used to calculate the Safety & Rule of Law category score. It consists of six indicators from nine data sources.

#### 4.62.16 iiag rs Rural Sector

Rural Sector is one of the four sub-categories that are used to calculate the Sustainable Economic Opportunity category score. It consists of eight indicators from two data sources.

4.62.17 iiag seo Sustainable Economic Opportunity

Sustainable Economic Opportunity is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 29 indicators, from 18 data sources.

**N**: 54

**Min. Year**:2000 **Max. Year**: 2016 **N**: 55 **n**: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.18 iiag srol Safety and Rule of Law

Safety & Rule of Law is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 26 indicators, from 17 data sources.

Min. Year:2015 Max. Year: 2015 N: 54

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

#### 4.62.19 iiag\_wel Welfare

Welfare is one of the three sub-categories that are used to calculate the Human Development category score. It consists of nine indicators from four data sources.

Min. Year:2000 Max. Year: 2016 N: 55 n: 907  $\overline{N}$ : 53  $\overline{T}$ : 16

### 4.63 ERCAS European Research Centre for Anti-Corruption and State-Building

http://integrity-index.org/ (Mungiu-Pippidi et al., 2017) (Data downloaded: 2018-07-09)

#### Index of Public Integrity

This dataset contains all data used in the construction of the Index of Public Integrity (IPI). The overall IPI score is the arithmetic average of the following six components scores: Judicial Independence, Administrative Burden, Trade Openness, Budget Transparency, E-Citizenship, and Freedom of the Press.

Several indices currently show that corruption remains a key issue not only in developing countries but also in many modern societies. How to control it better has thus become a major question of international development. Yet, the common corruption indices tell us mainly about how citizens and experts perceive the state of corruption in their society. They do not tell us anything about the causes of corruption nor about how the situation could be improved. The Index of Public Integrity ipi-toolbar takes a different approach. It assesses a society's capacity to control corruption and ensure that public resources are spent without corrupt practices. It is based on years of research and the evaluation of the efforts of different societies to make advances in the control of corruption.

Evidence from comparisons across countries shows that establishing effective control of corruption requires much more than the mere adoption of specific tools and strict legal regulations. It relies on a balance between a state calibrated to reduce the possibility of the abuse of influence and a society's capacity to hold its government accountable. The IPI highlights the most important dimensions of that mechanism. It correlates with the World Bank's and Transparency International's measures of control of corruption, but in contrast to them it is more objective and transparent.

#### 4.63.1 ipi ab Administrative Burden (index)

Administrative Burden measures the extent of domestic bureaucratic regulation. Am excessive administrative burden and too many regulations open doors for discretion and red tape, thereby resulting in a high risk of corruption. Consists of the simple mean of standardized values of: number of procedures required to start up a business; time needed to start up a business; number of tax payments per year; time to pay taxes. The indicators are taken from the World Bank Doing Business Data 2016. This mean value has been transformed to be in range between 1 and 10 with 10 implying the lowest administrative burden.

Min. Year:2016 Max. Year: 2016 N: 109

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.63.2 ipi e E-Citizenship (index)

E-Citizenship captures the ability of citizens to use online tools and social media and thus exercise social accountability. Internet media in general and social networks in particular are indispensable components of citizen empowerment. Simple mean of standardized values of the: Fixed broadband subscriptions (% population); Internet users (% population); Facebook users (% population). The first two variables were taken from International Telecommunication Union's ICT Dataset 2015, the latter from the Internet World Stats 2015. The value has been transformed to be in range between 1 and 10 with 10 implying the highest score for E-Citizenship.

#### 4.63.3 ipi ipi Index of Public Integrity (overall)

The overall IPI score is the arithmetic average of the following six components scores: Judicial Independence, Administrative Burden, Trade Openness, Budget Transparency, E-Citizenship, Freedom of the Press.

Min. Year:2016 Max. Year: 2016 N: 109

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.63.4 ipi tradeopen Trade Openness (index)

Trade Openness measures the extent of regulation concerning a country's external economic activity. Open countries can control corruption better by removing room for discretion at the level of administrative trade barriers and thus allowing free competition. Made up from the simple mean of standardized values of: average number of documents required to export and import; time for exporting and importing. The indicators stem from the World Bank Doing Business Data 2015. Their value has been transformed to be in range between 1 and 10 with 10 implying the highest trade openness.

Min. Year:2016 Max. Year: 2016 N: 109

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

### 4.64 Inter-Parliamentary Union

http://www.ipu.org/wmn-e/world-arc.htm (Inter-Parliamentary Union, 2017) (Data downloaded: 2018-09-19)

#### Inter-Parliamentary Union Data

The data has been compiled by the Inter-Parliamentary Union on the basis of information provided by National Parliaments. Comparative data on the world and regional averages as well as data concerning the two regional parliamentary assemblies elected by direct suffrage can be found on separate pages.

Note: The figures for South Africa on the distribution of seats in the Upper House do not include the

36 special rotating delegates appointed on an ad hoc basis, and all percentages given are therefore calculated on the basis of the 54 permanent seats. Included in the QoG Dataset are the data for January each year.

#### 4.64.1 ipu\_l\_s Number of Seats (Lower and Single Houses)

#### 4.65 Johnson and Wallack

https://dataverse.harvard.edu/dataset.xhtml?persistentId=hdl:1902.1/17901 (Johnson & Wallack, 2012) (Data downloaded: 2018-07-20)

#### Electoral Systems and the Personal Vote

This database updates and expands the coding of electoral systems presented in Gaviria et al's (2003) Database of Particularism. Data now cover up to 180 countries from 1978-2005 and distinguish electoral systems by the degree to which electoral institutions create incentives for candidates to cultivate a personal vote - as described theoretically in Carey and Shugart (1995) and Gaviria et al. (2003) - including the amount of vote pooling among co-partisan candidates, the amount of parties' control over ballot access, and whether voters cast their votes for candidates or parties. The database also contains several variables that rank-order electoral systems by tier, distinguish mixed-member and other multi-tier electoral systems, capture district magnitude (in two ways), and record election years. Database created 2007. Database last updated 2010.

#### 4.65.1 jw avgballot Party Control over Ballot(lower/only house)

Country-level weighted averages of Party Control over Ballot - SMD (lower/only house) (jw\_smdballot) and Party Control over Ballot - MMD (lower/only house) (jw\_mmdballot), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of ballots for the average member sitting in the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few

or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.2 jw avgballot2 Party Control over Ballot(upper house)

Country-level weighted averages of Party Control over Ballot - SMD (upper house) (jw\_smdballot2) and Party Control over Ballot - MMD (upper house) (jw\_mmdballot2), where the weights are the percentage of members that originate from each tier. This variable thus re-flects the value of ballots for the average member sitting in the upper house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.65.3 jw avgpool Sharing of Votes among Candidates(lower/only house)

Country-level weighted averages of Sharing of Votes among Candidates - SMD (lower/only house) (jw\_smdpool) and Sharing of Votes among Candidates - MMD (lower/only house) (jw\_mmdpool), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 135 n: 2373  $\overline{N}$ : 85  $\overline{T}$ : 18

#### 4.65.4 jw avgpool2 Sharing of Votes among Candidates(upper house)

Country-level weighted averages of Sharing of Votes among Candidates - SMD (upper house) (jw\_smdpool2) and Sharing of Votes among Candidates - MMD (upper house) (jw\_mmdpool2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the upper house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Nin. Year: 1978 Max. Year: N: 24 n: 473  $\overline{N}$ : 17  $\overline{T}$ : 20

#### 4.65.5 jw avgvote Candidate or Party-specific Voting(lower/only house)

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (lower/only house) (jw\_smdvote) and Candidate- or Party-specific Voting - MMD (lower/only house) (jw\_mmdvote), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where voters for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.6 jw avgvote2 Candidate or Party-specific Voting(upper house)

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (upper house) (jw\_smdvote2) and Candidate- or Party-specific Voting - MMD (upper house) (jw\_mmdvote2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the upper house. The Vote variables focus attention

on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

#### 4.65.8 jw domr Dominant or Populous Tier

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their most dominant or populous tier (or tier with the greater number of legislators). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey & Shugart's (1995) ranking. For example, a country with a ranking of 1 would have a tier with the lowest possible rank of personal vote incentives, and that tier would account for the majority of the members in the assembly.

Min. Year:1978 Max. Year: 2005 N: 126 n: 2236  $\overline{N}$ : 80  $\overline{T}$ : 18

4.65.9 jw election Year of Election(lower/only house)

Dummy variable, 1 if year of election to lower house.

# Variable not included in Cross-Section Data

 $\mathbf{N}:\,\mathrm{N/A}$  Min. Year:  $\mathrm{N/A}$  Max. Year:  $\mathrm{N/A}$ 

Min. Year:1978 Max. Year: 2005 N: 152 n: 2267  $\overline{N}$ : 81  $\overline{T}$ : 15

#### 4.65.10 jw\_election2 Year of Election(upper house)

Dummy variable, 1 if year of election to upper house.

#### 4.65.11 jw indy Ballot Access for Independent Candidates(lower/only house)

Equals 1 wherever independent candidates are legally allowed (even where the legal requirements are strict), and 0 otherwise. This complements the cases where the ballot variables above equal 1 or 2, since they are adjusted to capture de facto practice.  $jw_indy$  instead captures the de jure rules. A user could adjust the ballot variables above to be de jure if (s)he replaced values of 2 with values of 1 when  $jw_indy = 0$ . Refers to lower house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.12 jw indy2 Ballot Access for Independent Candidates(upper house)

Same as jw\_indy, but for upper house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.13 jw legsize Number of Coded Legislators(lower/only house)

The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 155 n: 2706  $\overline{N}$ : 97  $\overline{T}$ : 17

#### 4.65.14 jw\_legsize2 Number of Coded Legislators(upper house)

The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.15 jw mcand District Magnitude of Average Legislator(lower/only house)

In keeping with the emphasis on the incentives faced by individual legislators, this variable measures the district magnitude considering the viewpoint of the average legislator in the lower house. It is scored as a weighted average of the various district sizes, where weights are computed as the number of legislators running in the district of each magnitude divided by the total number of seats. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts has a magnitude for the average legislator of [(200\*200) + (100\*1)]/300, which yields a figure of 133.67.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 124 n: 2137  $\overline{N}$ : 76  $\overline{T}$ : 17

#### 4.65.16 jw\_mcand2 District Magnitude of Average Legislator(upper house)

This is the district magnitude of the average legislator in the upper house.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 42 n: 645  $\overline{N}$ : 23  $\overline{T}$ : 15

#### 4.65.17 jw mdist Average District Magnitude(lower/only house)

This is the standard magnitude of the average district in the lower house. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts would have an average district magnitude (jw mdist) of 2.97 (i.e., 300/101).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.65.18 jw mdist2 Average District Magnitude(upper house)

This is the average district magnitude in the upper house.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.19 jw mmdballot Party Control over Ballot - MMD(lower/only house)

Ballot (coded as above) for multi-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 94 n: 1620  $\overline{N}$ : 58  $\overline{T}$ : 17

#### 4.65.20 jw\_mmdballot2 Party Control over Ballot - MMD(upper house)

Ballot for multi-member district tiers in elections to the upper house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

#### 4.65.21 jw mmdpool Sharing of Votes among Candidates - MMD(lower/only house)

Pool for multi-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 94 n: 1600  $\overline{N}$ : 57  $\overline{T}$ : 17

#### 4.65.22 jw mmdpool2 Sharing of Votes among Candidates - MMD(upper house)

Pool for multi-member district tiers in elections to the upper house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.23 jw mmdvote Candidate or Party-specific Voting - MMD(lower/only house)

Vote for multi-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.65.24 jw mmdvote2 Candidate or Party-specific Voting - MMD(upper house)

Vote for multi-member district tiers in elections to the upper house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

**Min. Year**:1978 Max. Year: 2005 N: 16 n: 298  $\overline{N}$ : 11  $\overline{T}$ : 19

### 4.65.25 jw multiround Runoff Elections

N: N/A Min. Year: N/A Max. Year: N/A

The variable indicates whether there are run-off elections. These are usually for SMDs with absolute majority requirements. Where jw\_multiround is equal to 1, voters have more than a single vote to cast, albeit votes occur on separate election days.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### Min. Year:1978 Max. Year: 2005 N: 111 n: 2089 $\overline{N}$ : 75 $\overline{T}$ : 19

#### 4.65.26 jw\_multitier Multi Tier(lower/only house)

Indicates whether there are two or more tiers to the legislature.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 138 n: 2419  $\overline{N}$ : 86  $\overline{T}$ : 18

#### 4.65.27 jw\_multitier2 Multi Tier (upper house)

Equals 1 wherever there are multiple allocation tiers, regardless of whether they are the result of mixed member systems that incorporate different members under different rules, or systems that have upper tiers within a single electoral system to compensate for disproportionality in lower tiers.

Min. Year:1978 Max. Year: 2005

**N**: 28 **n**: 493  $\overline{N}$ : 18  $\overline{T}$ : 18

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.65.28 jw\_oneparty Single Party System

Dummy variable, 1 if single-party system.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 169 n: 3473  $\overline{N}$ : 124  $\overline{T}$ : 21

#### 4.65.29 jw parallel Tiers allocated in Parallel

Coded 1 if multiple tiers are elected in parallel fashion, 0 when they are elected in (at least some-what) compensatory fashion. Is coded only when  $jw_multitier = 1$ .

N: N/A Min. Year: N/A Max. Year: N/A

#### jw persr Personalistic Tier 4.65.30

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their more personalistic tier (or tier with the greater incentives to cultivate a personal vote). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey & Shugart's (1995) ranking. For example, a country with a ranking of 13 would have a tier with the highest possible rank of incentives to cultivate a personal vote, although that tier may only account for a minority or small fraction of its members.

N: N/A Min. Year: N/A Max. Year: N/A

5 9 9 1 1930 1970 1880 1990 2000 2010

Min. Year:1978 Max. Year: 2005 N: 155 n: 2742  $\overline{N}$ : 98  $\overline{T}$ : 18

4.65.34 jw\_propmmd2 Seats from Multi-Member Districts(upper house)

This is the proportion of coded legislators elected in multi-member districts.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

**Min. Year**:1978 **Max. Year**: 2005 **N**: 26 **n**: 479  $\overline{N}$ : 17  $\overline{T}$ : 18

4.65.35 jw propn Seats from a National District(lower/only house)

The proportion of legislators that are elected via a national tier.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.65.36 jw\_propn2 Seats from a National District(upper house)

This is the proportion of coded legislators that are elected via a national tier. This is often (but not always) similar to the proportion elected via multi-member districts (jw\_propmmd): some electoral systems have proportional representation based on regional multimember districts as well as national tiers (e.g. Hungary).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 155 n: 2702  $\overline{N}$ : 97  $\overline{T}$ : 17

#### 4.65.38 jw propsmd2 Seats from Single-Member Districts(upper house)

This is the proportion of coded legislators elected in single-member districts. (Note: In the original data for Kyrgyzstan propsmd2=60 in 1997-1999 and propsmd2=45 2000-2004. We have replaced these figures with missing values.).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005 N: 23 n: 422  $\overline{N}$ : 15  $\overline{T}$ : 18

#### 4.65.39 jw rank Rank Vote (lower/only house)

Equals 1 in two circumstances: where voters may rank order candidates according to preference, or where citizens have multiple preference votes for multiple candidates, even if they may not specifically rank the candidates. Otherwise, jw\_rank is equal to zero. Refers to lower house elections.

 $\mathbf{N}:\,\mathrm{N}/\mathrm{A}$  Min. Year:  $\mathrm{N}/\mathrm{A}$  Max. Year:  $\mathrm{N}/\mathrm{A}$ 

#### 4.65.41 jw smdballot Party Control over Ballot - SMD(lower/only house)

Ballot for single-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where

parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

#### jw smdpool Sharing of Votes among Candidates - SMD(lower/only house) 4.65.42

Pool for single-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.65.43jw smdvote Candidate or Party-specific Voting - SMD(lower/only house)

Vote for single-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

**N**: 73 **n**: 1111  $\overline{N}$ : 40  $\overline{T}$ : 15

#### 4.65.44 jw tiervote Tiervote (lower/only house)

#### Institutional Quality Dataset

More than 30 established institutional indicators can be clustered into three homogeneous groups of formal institutions: legal, political and economic, which capture to a large extent the complete formal institutional environment of a country. The latent qualities of legal, political and economic institutions for every country in the world and for every year are calculated. On this basis, a legal, political and economic World Institutional Quality Ranking are proposed, through which one can follow whether a country is improving or worsening its relative institutional environment. The calculated latent institutional quality measures can be useful in further panel data applications and add to the usual practice of using simply one or another index of institutional quality to capture the institutional environment.

#### Luxembourg Income Study Database and the Luxembourg Wealth Study Database

LIS, formerly known as The Luxembourg Income Study, is a data archive and research center dedicated to cross-national analysis. LIS is home to two databases, the Luxembourg Income Study Database, and the Luxembourg Wealth Study Database. The Luxembourg Income Study Database (LIS), under constant expansion, is the largest available database of harmonised microdata collected from multiple countries over a period of decades. The newer Luxembourg Wealth Study Database (LWS), is the only cross-national wealth microdatabase in existence.

#### 4.70 Hyde and Marinov

http://www.nelda.co/ (Hyde & Marinov, 2012) (Data downloaded: 2018-08-21)

#### National Elections Across Democracy and Autocracy (2012)

The National Elections across Democracy and Autocracy (NELDA)

#### 4.70.1 nelda\_fme First Multiparty Election

This indicates when a country is newly independent is having its first elections, when a country holds the first multiparty elections after a significant period of non-democratic rule, or when a country transitions from single-party elections to multiparty elections. Multiparty means that more than one party is allowed to contest the election, and that at least some of the parties are both nominally and effectively independent of the ruling actors.

#### 4.70.2 nelda mbbe Media Bias before Election

If there were reports by either domestic or outside actors of media bias in favor of the incumbent or ruling party, it is coded as a "yes." In cases where the media is totally controlled by the government, and/or no opposition is allowed, the answer is "yes." It is possible that the answer is "No" even if the political system is tightly controlled.

#### 4.70.3 nelda mtop Was More Than One Party Legal

This variable indicates whether multiple political parties were technically legal. The legalization of multiple parties need not necessarily mean the existence of a functioning opposition party, as there may be other non-legal barriers to the development of an opposition party. Similarly, a well organized opposition party may exist but may not be legal.

Min. Year:1946 Max. Year: 2012 N: 173 n: 2228  $\overline{N}$ : 33  $\overline{T}$ : 13

#### 4.70.4 nelda\_noe Number of Elections, Total

N: 45

The number of Elections during the year (counting legislative, executive and constituent assembly elections).

#### 4.70.5 nelda noea Number of Elections, Constituent Assembly

Number of constituent assembly elections during the year.

Min. Year:2012 Max. Year: 2012 N: 45

Min. Year:1946 Max. Year: 2012 N: 173 n: 2228  $\overline{N}$ : 33  $\overline{T}$ : 13

#### 4.70.6 nelda noee Number of Elections, Executive

Number of executive elections during the year.

Min. Year:2012 Max. Year: 2012 N: 45

Min. Year:1946 Max. Year: 2012 N: 173 n: 2228  $\overline{N}$ : 33  $\overline{T}$ : 13

#### 4.70.7 nelda noel Number of Elections, Legislative

Number of legislative elections during the year.

#### 4.70.8 nelda oa Was Opposition Allowed

This variable indicates whether at least one opposition political party existed to contest the election. Some countries have multiple government parties but no opposition political party. An opposition party is one that is not in the government, meaning it is not affiliated with the incumbent party in power.

#### 4.70.9 nelda rpae Riots and Protests after Election

If so, a "Yes" is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

#### 4.70.10 nelda vcdbe Violence and Civilian Deaths before Election

If there was any significant violence relating to the elections that resulted in civilian deaths, a "yes" is coded. These deaths should be at least plausibly related to the election, though sometimes it is difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Min. Year:1946 Max. Year: 2012 N: 173 n: 2224  $\overline{N}$ : 33  $\overline{T}$ : 13

#### 4.71 Pippa Norris

(Data downloaded: 2018-07-12)

#### Pippa Norris. 2009. Democracy Time-series Dataset

This dataset is in a country-year case format, suitable for cross-national time-series analysis. It contains data on the social, economic and political characteristics of 191 nations with over 600 variables from 1971 to 2007. In particular, it merges the indicators of democracy by Freedom House, Vanhanen, Polity IV, and Cheibub and Gandhi, selected institutional classifications and also socioeconomic indicators. Note that you should check the original codebook for the definition and measurement of each of the variables. The period for each series also varies. This is the replication dataset used in the book, Driving Democracy.

#### 4.71.1 no\_ce Classification of Executives

Classification of Executives:

- 1. Parliamentary Monarchy
- 2. Presidential Republic
- 3. Mixed Executive
- 4. Monarchy

#### 4.72 Natural Resource Management Index

http://sedac.ciesin.columbia.edu/data/collection/nrmi (Center for International Earth Science Information Network - CIESIN - Columbia University, 2018) (Data downloaded: 2018-11-13)

#### Natural Resource Management Index (NRMI) Data

The Natural Resource Protection and Child Health Indicators, 2017 Release, is produced in support of the U.S. Millennium Challenge Corporation (MCC) as selection criteria for funding eligibility. The Natural Resource Protection Indicator (NRPI) and Child Health Indicator (CHI) are based on proximity-to-target scores ranging from 0 to 100 (at target). The NRPI covers 234 countries and is calculated based on the weighted average percentage of biomes under protected status. The CHI is a composite index for 199 countries derived from the average of three proximity-to-target scores for access to at least basic water and sanitation, along with child mortality. The 2017 release includes a consistent time series of NRPI scores for 2013-2017 and CHI scores for 2010 to 2017.

#### 4.72.1 nrmi nrpi Natural Resource Protection Indicator

Natural Resource Protection Indicator assesses whether a country is protecting at least 17% of all of its biomes (e.g. deserts, forests, grasslands, aquatic, and tundra). It is designed to capture the comprehensiveness of a government's commitment to habitat preservation and biodiversity protection. The World Wildlife Fund provides the underlying biome data, and the United Nations Environment Program World Conservation Monitoring Center provides the underlying data on protected areas.

Min. Year:2015 Max. Year: 2015 N: 194

#### 4.73 Nunn and Puga

http://diegopuga.org/data/rugged/ (Nunn & Puga, 2012) (Data downloaded: 2018-07-10)

#### Country Ruggedness and Geographical Data (2012)

The dataset of terrain ruggedness and other geographical characteristics of countries was created by Nathan Nunn and Diego Puga for their article 'Ruggedness: The blessing of bad geography in Africa', published in the Review of Economics and Statistics 94(1), February 2012: 20-36.

#### 4.73.1 nunn desert % Desert

The percentage of the land surface area of each country covered by sandy desert, dunes, rocky or lava flows, was calculated on the basis of the desert layer of the Collins Bartholomew World Premium digital map data (Collins Bartholomew, 2005) and the country boundaries described above. This was initially computed as a cruder measure of soil (in)fertility for an early draft of the paper and is no longer used in the final version. Nunn and Puga have left it in the dataset in case it is of use to other researchers.

#### 4.73.2 nunn dist coast Average distance to nearest ice-free coast (1000 km.)

Average distance to nearest ice-free coast (1000 km). To calculate the average distance to the closest ice-free coast in each country, Nunn and Puga first compute the distance to the nearest ice-free coast for every point in the country in equi-rectangular projection with standard parallels at 30 degrees, on the basis of sea and sea ice area features contained in the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000) and the country boundaries described above. Then Nunn and Puga average this distance across all land in each country not covered by inland water features.

#### 4.73.3 nunn near coast % Within 100 km. of ice-free coast

Within 100 km of ice-free coast. On the basis of the same data used to calculate the average distance to nearest ice-free coast, Nunn and Puga calculate the percentage of the land surface area of each country that is within 100km of the nearest ice-free coast.

#### 4.73.4 nunn\_rugged Ruggedness (Terrain Ruggedness Index, 100 m.)

This is the Terrain Ruggedness Index originally devised by Riley, DeGloria, and Elliot (1999) to quantify topographic heterogeneity in wildlife habitats providing concealment for preys and lookout posts. The source of elevation data is GTOPO30 (US Geological Survey, 1996), a global elevation data set developed through a collaborative international effort led by staff at the US Geological Survey's Center for Earth Resources Observation and Science (EROS). Elevations in GTOPO30 are regularly spaced at 30 arc-seconds across the entire surface of the Earth on a map using a geographic projection, so the sea-level surface distance betNunn and Pugaen two adjacent grid points on a meridian is half a nautical mile or, equivalently, 926 metres. After calculating the Terrain Ruggedness Index for each point on the grid, Nunn and Puga average across all grid cells in the country not covered by water to obtain the average terrain ruggedness of the country's land area. Since the sea-level surface that corresponds to a 30 by 30 arcsecond cell varies in proportion to the cosine of its latitude, when calculating the average terrain ruggedness - or the average of any other variable - for each country, Nunn and Puga Nunn and Pugaigh each cell by its latitude-varying sea-level surface. Nunn and Puga assign land to countries - for this and other variables - using digital boundary data based on the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000), which Nunn and Puga have updated to reflect 2000 country boundaries using information from the International Organization for Standardization ISO 3166 Maintenance Agency and other sources. Nunn and Puga exclude areas covered by permanent inland water area features contained in the same edition of the Digital Chart of the World. The units for the terrain ruggedness index correspond to the units used to measure elevation differences. In our calculation, ruggedness is measured in hundreds of metres of elevation difference for grid points 30 arc-seconds (926 metres on the equator or any meridian) apart.

#### 4.73.5 nunn\_tropical % Tropical climate

Tropical climate. Using detailed temperature and precipitation data from the Climatic Research Unit of the University of East Anglia and the Global Precipitation Climatology Centre of the German Nunn and Pugaather Service, Kottek, Grieser, Beck, Rudolf, and Rubel (2006) classify each cell on a 30 arc-minute grid covering the entire land area of the Earth into one of 31 climates in the widely-used Köppen-Geiger climate classification. Based on these data and the country boundaries described above, Nunn and Puga calculate the percentage of the land surface area of each country that has any of the four Köppen-Geiger tropical climates.

#### **Country Statistical Profiles**

The Country Statistical Profiles database from the Organisation for Economic Cooperation and Development (OECD) includes a wide range of indicators on economy, education, energy, environment, foreign aid, health, information and communication, labour, migration, R&D, trade and society that better reflect key figures about the member states of the OECD. Historical data refer to the latest eight time periods.

Please note we have selected some of these variables for this version of the QoG Datasets. Find the full list of variables in the source's website.

# 4.75 The Ocean Health Index

http://www.oceanhealthindex.org (Halpern et al., 2012) (Halpern et al., 2018) (Data downloaded: 2018-12-05)

# The Ocean Health Index Data

The Ocean Health Index is a valuable tool for the ongoing assessment of ocean health. By providing a means to advance comprehensive ocean policy and compare future progress, the Index can inform decisions about how to use or protect marine ecosystems. The Index is a collaborative effort, made possible through contributions from more than 65 scientists/ocean experts and partnerships between organizations including the National Center for Ecological Analysis and Synthesis, Sea Around Us, Conservation International, National Geographic, and the New England Aquarium. The Index assesses the ocean based on 10 widely-held public goals for a healthy ocean. They are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Sense of Place, Coastal Livelihoods & Economies, Tourism & Recreation, Clean Waters, Biodiversity.

# 4.75.1 ohi\_ohi The Ocean Health Index

The Ocean Health Index establishes reference points for achieving ten widely accepted socio-ecological objectives, and scores the oceans adjacent to 171 countries and territories on how successfully they deliver these goals. Evaluated globally and by country, these ten public goals represent the wide range of benefits that a healthy ocean can provide; each country's overall score is the average of its respective goal scores. The ten socio-ecological objectives are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Coastal Livelihoods & Economies, Tourism & Recreation, Sense of Place, Clean Waters, Biodiversity.

#### 4.76Marshall and Jaggers

http://www.systemicpeace.org/inscrdata.html (Marshall et al., 2018) (Data downloaded: 2018-11-09)

# Polity IV Annual Time-Series, 1800-2016

The Polity project is one of the most widely used data resource for studying regime change and the effects of regime authority. Polity IV Project, Political Regime Characteristics and Transitions, 1800-2016, annual, cross-national, time-series and polity-case formats coding democratic and autocratic "patterns of authority" and regime changes in all independent countries with total population greater than 500,000 in 2016 (167 countries in 2016). Please note that the codes -99, -88, -77 and -66 has been recoded to missing.

## 4.76.1 p durable Regime Durability

Regime Durability: The number of years since the most recent regime change (defined by a three point change in the p polity score over a period of three years or less) or the end of a transition period defined by the lack of stable political institutions (denoted by a standardized authority score). In calculating the p durable value, the first year during which a new (post-change) polity is established is coded as the baseline "year zero" (value = 0) and each subsequent year adds one to the value of the p durable variable consecutively until a new regime change or transition period occurs.

**N**: 182 **n**: 9646  $\overline{N}$ : 134  $\overline{T}$ : 53

#### p polity2 Revised Combined Polity Score 4.76.2

Revised Combined Polity Score: The polity score is computed by subtracting the p autoc score from the p democ score; the resulting unified policy scale ranges from +10 (strongly democratic) to -10(strongly autocratic). The revised version of the polity variable is designed to facilitate the use of the polity regime measure in time-series analyses. It modifies the combined annual polity score by applying a simple treatment, or "fix" to convert instances of "standardized authority scores" (i.e., -66, -77, and -88) to conventional policy scores (i.e., within the range, -10 to +10). The values have been converted according to the following rule set:

- (-66) Cases of foreign "interruption" are treated as "system missing."
- (-77) Cases of "interregnum," or anarchy, are converted to a "neutral" Polity score of "0."
- (-88) Cases of "transition" are prorated across the span of the transition.

For example, country X has a p\_polity score of -7 in 1957, followed by three years of -88 and, finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follow: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

# Electoral Integrity Project (Version 5.5)

A global expert survey on Perceptions of Electoral Integrity (PEI). This study is conducted by Pippa Norris, Ferran Martínez i Coma and Richard W. Frank for the Electoral Integrity Project based at the Universities of Sydney and Harvard. The PEI asks experts to evaluate electoral integrity.

The concept of electoral integrity refers to international standards and global norms governing the appropriate conduct of elections. These standards have been endorsed in a series of authoritative conventions, treaties, protocols, and guidelines by agencies of the international community, notably by the decisions of the UN General Assembly, by regional bodies such as the Organization for Security and Cooperation in Europe (OSCE), the Organization of American States (OAS), and the African Union (AU), and by member states in the United Nations. Following endorsement, these standards apply universally to all countries throughout the electoral cycle, including during the pre-electoral period, the campaign, on polling day, and in its aftermath.

To operationalize this notion, the PEI asks experts to evaluate elections using 49 indicators, grouped into eleven categories reflecting the whole electoral cycle. The dataset also includes a summary 100point PEI Index based on summing all 49 indicators. The PEI index provides one way to summarize the overall integrity of the election. Alternatively, analysts can examine indices for each of the eleven dimensions, or use the disaggregated scores for each of the 49 individual indicators. In this way, data can be reaggregated flexibly to construct any measure which is preferred conceptually. The PEI dataset is designed to provide a comprehensive, systematic and reliable way to monitor the quality of elections worldwide. The third release of the dataset (PEI\_3) included 2012 and 2013 cases and expands the comparison by including all national elections held from January 1st to December 31st 2014. In total PEI\_3 included expert evaluations of 127 elections held in 107 countries. In addition, in 2014 elections in Haiti, Lebanon, and Comoros were delayed or suspended. Those are thus not included in the dataset. The election in Thailand was held and later annulled. Results are included in the data release.

# 4.77.1 pei\_eir Electoral Integrity Rating

Overall how would you rate the integrity of this election on a scale from 1 (very poor) to 10 (very good)?

# 4.77.2 pei eirhci Electoral Integrity Rating, Higher C.I.

The higher bound of the 95% confidence interval for either the election or the country level.

# 4.78 Social Policy Indicators (SPIN)

http://www.spin.su.se/datasets/plb (Social Policy Indicators Database (SPIN), 2015) (Data downloaded: 2018-10-30)

### The Parental Leave Benefit Dataset (PLB)

The Parental Leave Benefit dataset (PLB) is a data module of SPIN that establishes indicators on parental leave benefits and related family policy programs. The purpose of PLB is to improve possibilities for systematic, comparative and longitudinal institutional analyses of the causes and consequences of family policy development.

The first published version includes indicators on earnings-related parental leave insurance programs in 18 longstanding OECD-member countries 1950-2010. The aim of planned future releases is to extend the scope of analysis also to new EU-member countries as well as to related parental leave benefits, such as flat-rate childcare leave and lump-sum maternity grants.

# 4.79 Vincenzo Emanuele

http://www.vincenzoemanuele.com/dataset-of-party-system-innovation.html (Emanuele, 2016) (Data downloaded: 2018-07-05)

### New Parties and Party System Innovation in Western Europe

This dataset identifies and lists all the new parties emerged in Western Europe since 1945 and provides data about party system innovation, defined as the aggregate level of 'newness' recorded in a party system at a given election. Data are based on parliamentary elections (lower house) of 20 Western European countries since 1945. This dataset covers the entire universe of Western European elections held after World War II under democratic regimes. Data for Greece, Portugal and Spain have been collected after their democratizations in the 1970s.

### 4.79.1 psi cpsi1 Cummulative Party System Innovation

Cumulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1% of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1% of the votes) and parties that emerged later or were only marginal actors (those below 1%) at that time.

### 4.79.2 psi cpsi2 Cummulative Party System Innovation of a second election in a year

Cumulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1% of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1% of the votes) and parties that emerged later or were only marginal actors (those below 1%) at that time. This variable (psi\_cpsi2) refers to a second election held on the same year as an election reported on psi\_cpsi1.

### 4.79.3 psi edate1 Exact date of the election

Exact date of the election

### 4.79.4 psi edate2 Exact date of the second election in a year

Exact date of a second election in a same year

# 4.79.5 psi\_psi1 Party System Innovation (overall vote share of new parties in given election)

Party System Innovation: overall vote share of new parties in a given election. It is calculated at time t with respect to time t-1 (namely, PSInn is calculated with respect to the status quo established at the previous election) and therefore each observation in each country is completely independent from the previous ones. In order to exclude marginal parties, the author has set a threshold at 1% of the national share for a given party to be considered as part of the party system in a given election and has collected data starting from the third post-World War II or democratic election of each country, for a total of 209 new parties (see the complete list of new parties below) in 327 elections. The underlying assumption is that the party system innovation they are interested in is that occurring after the initial institutionalization of the party system. According to PSInn, a party is considered 'new' only in the first election when it enters the party system by receiving at least 1% of the national share. Then, in the subsequent elections, it becomes 'old'.

# The QoG Expert Survey

The QoG Survey is a data set on the structure and behavior of public administration, based on a web survey. The dataset covers key dimensions of quality of government, such as politicization, professionalization, openness, and impartiality.

Included in the QoG dataset are three indexes, each based on a group of questions from the survey. When constructing the indexes authors excluded countries with less than three responding experts.

The confidence interval variables give the higher and lower limits of the 95% confidence interval.

# 4.82.1 qs\_closed Closed Public Administration

Closed Public Administration: The index measures to what extent the public administration is more closed or public-like, rather than open or private-like. Higher values indicate a more closed public administration. It is based on three questions from the survey. The index is constructed by first taking the mean for each responding expert of the three questions above. The value for each country is then calculated as the mean of all the experts' means. (If one or more answers are missing, these questions are ignored when calculating the mean value for each expert).

# 4.82.3 qs\_closed\_cil Closed Public Administration - Confidence Interval (Low)

Closed Public Administration Confidence Interval (Low).

# 4.82.4 qs\_impar Impartial Public Administration

Impartial Public Administration: The index measures to what extent government institutions exercise their power impartially. The impartiality norm is defined as: "When implementing laws and policies, government officials shall not take into consideration anything about the citizen/case that is not beforehand stipulated in the policy or the law."

The index is constructed by adding each measure weighted by the factor loading obtained from a principle components factor analysis. Missing values on one or more of the questions have been imputed on the individual expert level. After that, aggregation to the country level has been made (mean value of all experts per country).

# 4.82.7 qs\_proff Professional Public Administration

Professional Public Administration: The index measures to what extent the public administration is professional rather than politicized. Higher values indicate a more professionalized public administration. It is based on four questions from the survey.

The index is constructed by first taking the mean for each responding expert of the four questions above. The value for each country is then calculated as the mean of all the experts' means. (If one or more answers are missing, these questions are ignored when calculating the mean value for each expert. The scales of the second and third questions are reversed so that higher values indicate more professionalism).

https://dataverse.harvard.edu/dataset.xhtml?persistentId=doi:10.7910/DVN/ZTPWOY (Ross & Mahdavi, 2015) (Data downloaded: 2018-09-11)

### Oil and Gas Data, 1932-2014

Global dataset of oil and natural gas production, prices, exports, and net exports. These data are based on the best available information about the volume and value of oil and natural gas production in all countries from 1932 to 2014. The volume figures are from the documents listed in the original source; to calculate the total value of production, the author multiplies the volume by the world price for oil or gas. Since these are world prices for a single (benchmark) type of oil/gas, they only approximate the actual price - which varies by country according to the quality, the terms of contracts, the timing of the transactions, and other factors. These figures do not tell how much revenues were collected by governments or companies - only the approximate volume and value of production. Data on oil production from 1946 to 1969, and gas production from 1955 (when it first was reported) to 1969, are from the US Geological Survey Minerals Yearbook, for various years.

# 4.85 Reporters Sans Frontières

http://en.rsf.org/ (Reporters Without Borders, 2018) (Data downloaded: 2018-11-06)

# World Press Freedom

The Reporters Without Borders World Press Freedom Index ranks the performance of 180 countries according to a range of criteria that include media pluralism and independence, respect for the safety and freedom of journalists, and the legislative, institutional and infrastructural environment in which the media operate.

# 4.85.1 rsf pfi Press Freedom Index

The Press Freedom index measures the amount of freedom journalists and the media have in each country and the efforts made by governments to see that press freedom is respected. It does not take account of all human rights violations, only those that affect press freedom. Neither is it an indicator of the quality of a country's media.

Note: With the exception of the year 2012 the index ranges between 0 (total press freedom) and 100 (no press freedom). However for the 2012 data release RSF changed the scale so that negative values can be and indeed are assigned to countries with more press freedom. We have decided leave the data as is.

# 4.86 Borcan, Olsson and Putterman

https://sites.google.com/site/econolaols/extended-state-history-index (Borcan et al., 2018) (Data downloaded: 2018-10-09)

# **Extended State History Index**

The data set extends and replaces previous versions of the State Antiquity Index (originally created by Bockstette, Chanda and Putterman, 2002). The updated data extends the previous Statehist data into the years before 1 CE, to the first states in Mesopotamia (in the fourth millennium BCE), along

with filling in the years 1951 - 2000 CE that were left out of past versions of the Statehist data.

The construction of the index follows the principles developed by Bockstette et al (2002). First, the duration of state existence is established for each territory defined by modern-day country borders. Second, this duration is divided into 50-year periods. For each half-century from the first period (state emergence) onwards, the authors assign scores to reflect three dimensions of state presence, based on the following questions: 1) Is there a government above the tribal level? 2) Is this government foreign or locally based? 3) How much of the territory of the modern country was ruled by this government?

#### 4.87Sea Around Us Project

http://www.seaaroundus.org/data/#/marine-trophic-index (Pauly & Zeller, 2016) (Data downloaded: 2016-10-24)

### Sea Around Us Project Data

The Sea Around Us Project is a scientific collaboration between the University of British Columbia and the Pew Environment Group that began in July 1999. The aims of the project are to provide an integrated analysis of the impacts of fisheries on marine ecosystems, and to devise policies that can mitigate and reverse harmful trends whilst ensuring the social and economic benefits of sustainable fisheries. The Sea Around Us has assembled global databases of catches, distribution of commercial marine species, countries fishing access agreements, ex-vessel prices, marine protected areas and other data.

#### sau mti Marine Trophic Index 4.87.1

The Marine Trophic Index is an index of marine biodiversity. Note: The data for the following countries has been set to missing due to the fact that they have several data observations (in parentheses) in the original data: USA (Alaska, East Coast, Gulf of Mexico, West Coast, Hawaii Main Islands and Hawaii Northwest Islands), Turkey (Black sea, Mediterranean Sea), Indonesia (Eastern, Western), Malaysia (Peninsula East, Peninsula West, Sabah, Sarawak), Russia (Baltic Sea (Kaliningrad)), Baltic Sea (St. Petersburg), Barents Sea, Black Sea, Pacific, Siberia), Japan (Main Islands, Outer Islands), Saudi Arabia (Persian Gulf, Red Sea) etc. The countries that have mainland and ilands, only index of mainland included as an index for the specific country (e.x. Brazil).

#### 4.89.12 scip abesw26s Accident, 26 weeks average gross benefit, single APW

Accident, 26 weeks average gross benefit, single APW. Standard amount of average weekly gross single worker benefit over 26-week work accident spell.

### 4.89.13 scip\_accfanet Accident net benefit 26w + APWW 26w, family

Accident net benefit 26w + APWW 26w, family. Net income for a family with one wage earner with 26-weeks of APW and 26-weeks with work accident insurance benefits.

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### 4.89.14 scip accsinet Accident net benefit 26w + APWW 26w, single

Accident net benefit 26w + APWW 26w, single. Net income for single person with 26-weeks of APW and 26-weeks with work accident insurance benefits.

#### 4.89.15 scip acontper Accident, contribution period

Accident, contribution period. Amount of weeks of contribution required to qualify for benefit, made in course of reference period.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.89.16 scip acovratl Accident, labour force coverage rate

Accident, labour force coverage rate. Coverage ratio as proportion of labour force (scip anoinsur /scip\_alabforc).

**N**: 20 **n**: 230  $\overline{N}$ : 4  $\overline{T}$ : 12

#### 4.89.17 scip aduratio Accident, duration

Accident, duration. Amount of weeks during which sickness benefit is payable to single industrial worker with work record as detailed in general information (indefinite duration maximised at 156 weeks, or three years.

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### 4.89.18 scip\_afinempr Accident, financing by employer

Accident, financing by employer. Total proportion of insurance fund receipts derived from employer contributions.

#### 4.89.19 scip afininsr Accident, financing by insured

Accident, financing by insured. Total proportion of insurance fund receipts derived from contributions by the individuals insured.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.89.20 scip afinstat Accident, financing by state

Accident, financing by state. Total proportion of insurance fund receipts derived from state general revenue.

#### 4.89.21 scip agapweek Gross APW weekly wage

Gross APW weekly wage. Gross average industrial production worker's wage per week.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.89.22 scip ainceil Accident, income ceiling

Accident, income ceiling. Maximum annual income which workers may earn and still be qualified for benefits.

4.89.23 scip\_alabforc Number in labour force

Number in labour force. Number in labour force (in hundreds of thousands).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1947 Max. Year: 2005

N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### scip prefrper Pension, reference period 4.89.92

Pension, reference period. Amount of years within which contribution record must have been fulfilled in order to qualify for benefit (if there is no specific reference period and the scheme is contributory, 50 years is coded).

#### 4.89.93scip presitst Pension, residence test

Pension, residence test. Dummy variable indicating whether there is a conditional residence test for benefit eligibility:

1. Residence test

0. None

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### 4.89.94 scip\_prtaverp Pension, average paid gross RR

Pension, average paid gross RR. The average pension replacement rate (  $scip_pbeaverp/ scip_gapwyear$ ).

#### 4.89.95 scip prtfulco Pension, full gross RR, couple

Pension, full gross RR, couple. Pension replacement rate full couple ( scip\_pbenfulco/ scip\_gap-wyear).

#### 4.89.144 scip\_swaiting Sickness, waiting days

N: N/A Min. Year: N/A Max. Year: N/A

Sickness, waiting days. Number of legislated administrative Şwaiting days" of sickness at beginning of sickness spell when no benefits are paid out.

**Min. Year**:1947 **Max. Year**: 2005 **N**: 20 **n**: 230  $\overline{N}$ : 4  $\overline{T}$ : 12

#### 4.89.145 scip sz2indf Sickness, net APW RR average 1 and 26 weeks, family

Sickness, net APW RR average 1 and 26 weeks, family.  $(scip\_s1stnerf+scip\_szrr26fa)/2$ . Average of two components: a four-person family, first week after waiting days and 26 weeks with benefits.

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4  $\overline{T}$ : 12

#### 4.89.146 scip sz2inds Sickness, net APW RR average 1 and 26 weeks, single

Sickness, net APW RR average 1 and 26 weeks, single.  $(scip\_s1stners+scip\_szrr26si)/2$ . Average of two components: a single person, first week after waiting days and 26 weeks with benefits.

#### 4.89.147 scip\_sz4ind Sickness, net RR average 1 and 26 weeks

Sickness, net APW RR average 1 and 26 weeks.  $(scip\_s1stners+scip\_s1stnerf+scip\_szrr26si+scip\_szrr26fa)/4$ . Average of four components: a single person and a four-person family, for first week after waiting days and 26 weeks with benefits.

#### 4.89.148 scip szrr26fa Sickness, 26 weeks net RR, family

Sickness, 26 weeks net APW RR exclusive, family. Standard net familied worker replacement rate for total 26-week period of sickness benefit, excluding prior half-year's wage income from numerator and denominator.

#### 4.89.149 scip szrr26si Sickness, 26 weeks net RR, single

Sickness, 26 weeks net APW RR exclusive, single. Standard net single worker replacement rate for total 26-week period of sickness benefit, excluding prior half-year's wage income from numerator and denominator.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### 4.89.150 scip u1stnerf Unemployment, first week net RR, family

Unemployment, first week net APW RR, family. Net familied worker replacement rate in first week of unemployment spell: (UBESTW1F / NAPWEKFA) for years and in countries when benefit not taxable, and (UBESTW1F / UGAPWEEK) for years and in countries when benefit taxable.

#### 4.89.151 scip u1stners Unemployment, first week net RR, single

Unemployment, first week net APW RR, single. Net single worker replacement rate in first week of unemployment spell: (UBESTW1S / NAPWEKSI) for years and in countries when benefit not taxable, and (UBESTW1S / UGAPWEEK) for years and in countries when benefit taxable.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.89.152 scip ubenfulf Unemployment, weekly full gross benefit (26w), family

Unemployment, weekly full gross benefit (26w), family. Full amount of average weekly gross familied worker benefit over 26-week spell (calculated on assumptions parallel to those above).

4.89.153 scip ubenfuls Unemployment, weekly full gross benefit (26w), single worker

Unemployment, weekly full gross benefit (26w), single worker. Full amount of average weekly gross single worker benefit over 26-week spell.

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### 4.89.154 scip ubenmaxf Unemployment, weekly maximum gross benefit (26w), family

Unemployment, weekly maximum gross benefit (26w), family. Maximum amount of average weekly gross familied worker benefit over 26-week spell (calculated on assumptions parallel to those above).

## 4.89.155 scip\_ubenmaxs Unemployment, weekly maximum gross benefit (26w), single worker

Unemployment, weekly maximum gross benefit (26w), single worker. Maximum amount of average weekly gross single worker benefit over 26-week spell.

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.89.156 scip ubenminf Unemployment, weekly minimum gross benefit (26w), family

Unemployment, weekly minimum gross benefit (26w), family. Minimum amount of average weekly gross familied worker benefit over 26-week spell (calculated on assumptions parallel to those above).

## 4.89.157 scip\_ubenmins Unemployment, weekly minimum gross benefit (26w), single worker

Unemployment, weekly minimum gross benefit (26w), single worker. Minimum amount of average weekly gross single worker benefit over 26-week spell (as calculated on basis of earnings of worker in lowest insured wage class specified in legislation; or, in some countries, on the basis of legislated minimum absolute levels of daily insurance or assistance benefit).

Min. Year:1947 Max. Year: 2005 N: 20 n: 221  $\overline{N}$ : 4  $\overline{T}$ : 11

#### 4.89.158 scip ubestw1f Unemployment, first week gross benefit (26w), family APW

Unemployment, first week gross benefit (26w), family APW . Standard amount of average weekly gross benefit paid to familied worker in first week of unemployment spell.

#### 4.89.159 scip ubestw1s Unemployment, first week gross benefit, single APW

Unemployment, first week gross benefit, single APW. Standard amount of gross benefit paid to single worker in first week of unemployment spell.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.89.160 scip ubesw26f Unemployment, 26 weeks average gross benefit, family APW

Unemployment, 26 weeks average gross benefit, family APW. Standard amount of average weekly gross familied worker benefit over 26-week spell.

#### 4.89.161 scip ubesw26s Unemployment, 26 weeks average gross benefit, single APW

Unemployment, 26 weeks average gross benefit, single APW. Standard amount of average weekly gross single worker benefit over 26-week unemployment spell.

Min. Year:1947 Max. Year: 2005 N: 20 n: 230  $\overline{N}$ : 4 $\overline{T}$ : 12

#### scip ucontper Unemployment, contribution period 4.89.162

Unemployment, contribution period. Amount of weeks of contribution required to qualify for benefit, made in course of reference period.

#### 4.89.163 scip ucovrate Unemployment, employee coverage rate

Unemployment, employee coverage rate. Unemployment insurance coverage ratio as proportion of employees (scip unoinsur / scip emplyes).

2							
8							
01

Unemployment, 26 weeks net APW RR exclusive, single. Standard net single worker replacement rate for total 26-week period of unemployment spell, excluding prior half-year's wage income from numerator and denominator.

#### 4.90 Sustainable Governance Indicators

http://www.sgi-network.org/2017/ (Kroll et al., 2018) (Data downloaded: 2018-10-31)

#### **Sustainable Governance Indicators**

The SGI is a platform built on a cross-national survey of governance that identifies reform needs in 41 EU and OECD countries. SGI explores how governments target sustainable development and advocate for more sustainable governance built on three pillars:

- Policy Performance

- Democracy
- Governance

#### 4.90.1 sgi\_ec Policy Performance: Economic Policies - Overall

Policy Performance: Economic Policies (Economy, Labor Market, Taxes, Budgets, Research and Innovation, Global Financial System)

#### 4.90.2 sgi ecbg Policy Performance: Economic Policies - Budgets

Policy Performance: Economic Policies - Budgets (Budgetary Policy, Debt to GDP, Primary Balance, Debt Interest Ratio, Budget Consolidation)

Min. Year:2015 Max. Year: 2015 N: 41

Min. Year:2013 Max. Year: 2017 N: 41 n: 205  $\overline{N}$ : 41  $\overline{T}$ : 5

#### 4.90.3 sgi\_ecec Policy Performance: Economic Policies - Economy

Policy Performance: Economic Policies - Economy (Economic Policy, GDP per Capita, Inflation, Gross Fixed Capital Formation, Real Interest Rate, Potential Output Growth Rate)

#### 4.90.4 sgi ecgf Policy Performance: Economic Policies - Global Financial System

Policy Performance: Economic Policies - Global Financial System (Stabilizing Global Financial System, Tier 1 Capital Ratio, Banks' Nonperforming Loans)

4.90.5 sgi eclm Policy Performance: Economic Policies - Labor Markets

Policy Performance: Economic Policies - Labor Market (Labor Market Policy, Unemployment, Longterm Unemployment, Youth Unemployment, Low-skilled Unemployment, Employment, Low Pay Incidence)

4.90.6 sgi ecri Policy Performance: Economic Policies - Research and Innovation

Policy Performance: Economic Policies - Research and Innovation (Research and Innovation Policy, Public R&D Spending, Non-public R&D Spending, Total Researchers, Intellectual Property Licenses, PCT Patent Applications)

4.90.7 sgi\_ectx Policy Performance: Economic Policies - Taxes

Policy Performance: Economic Policies - Taxes (Tax Policy, Tax System Complexity, Structural Balance, Marginal Tax Burden for Businesses, Redistribution Effect)

4.90.8 sgi\_en Policy Performance: Environmental Policies - Overall

Policy Performance: Environmental Policies (Environment, Global Environmental Protection)

4.90.9 sgi enen Policy Performance: Environmental Policies - Environment

Policy Performance: Environmental Policies - Environment (Environmental Policy, Energy Productivity, Greenhouse Gas Emissions, Particulate Matter, Water Usage, Waste Generation, Material Recycling, Biodiversity, Renewable Energy)

### 4.90.10 sgi\_enge Policy Performance: Environmental Policies - Global Environmental Protection

Policy Performance: Environmental Policies - Global Environmental Protection (Global Environmental Policy, Multilateral Environmental Agreements, Kyoto Participation and Achievements)

#### 4.90.11 sgi go Governance

This pillar of the SGI examines the governance capacities of a political system in terms of its executive capability and accountability. Sustainable governance is defined here as the political management of public affairs that adopts a long-term view of societal development, takes into account the interests of future generations, and facilitates capacities for social change.

The Governance index examines how effective governments are in directing and implementing policies appropriate to these three goals. As a measuring tool grounded in practical evidence, the Governance index draws on 37 qualitative indicators posed in an expert survey that measure a country's institutional arrangements against benchmarks of good practices in governance. Governance in this context implies both the capacity to act ("executive capacity") and the extent to which non-governmental actors and institutions are endowed with the participatory competence to hold the government accountable to its actions ("executive accountability"). This includes citizens, legislatures, parties, associations and the media, that is, actors that monitor the government's activities and whose effective inclusion in the political process improve the quality of governance.

The dimension of Executive Capacity draws on the categories of steering capability, policy implementation and institutional learning. Steering capability questions explore the roles of strategic planning and expert advice, the effectiveness of interministerial coordination and regulatory impact assessments, and the quality of consultation and communication policies. Questions about implementation assess the government's ability to ensure effective and efficient task delegation to ministers, agencies or subnational governments. Questions on institutional learning refer to a government's ability to reform its own institutional arrangements and improve its strategic orientation.

The dimension of Executive Accountability is comprised of three categories corresponding to actors or groups of actors considered to be important agents of oversight and accountability in theories of democracy and governance. The questions here are designed to examine the extent to which citizens are informed of government policies, whether the legislature is capable of evaluating and acting as a "check" on the executive branch, and whether intermediary organizations (i.e., media, parties, interest associations) demonstrate relevance and policy know-how in exercising oversight. This approach is based on a dynamic understanding of governance in which power and authority is dispersed throughout the institutions, processes and structures of government. In order to account for the diversity of institutional arrangements, the index explicitly considers functional equivalencies in different countries, and pays equal attention to formal and informal as well as hierarchical and non-hierarchical institutional arrangements.

N: 41 n: 205  $\overline{N}$ : 41  $\overline{T}$ : 5

#### 4.90.13 sgi\_goec Governance: Executive Capacity

Governance: Executive Capacity (Steering Capability, Policy Implementation, Institutional Learning)

#### 4.90.14 sgi pp Policy Performance

This pillar of the SGI examines each country's policy performance in terms of three dimensions of sustainable development. If the goal of politics is to promote sustainable development, and if citizens are to be empowered to live their lives in accordance with their own individual talents, then governments must be able to establish and maintain the social, economic and environmental conditions for such well-being and empowerment. The conditions for social progress must be generated by suitable outcomes in certain policy fields. Such outcomes are examined by the Policy Performance pillar, which is comprised of 16 policy fields grouped in terms of economic, social and environmental sustainability. Each policy field is addressed by a qualitative assessment and additional quantitative data. The point here is to examine domestic policymaking as well as the extent to which governments actively contribute to the provision of global public goods. The areas examined are:

1. Economic Policies: economy, labor markets, taxes, budgets, research and innovation, global financial system

2. Social Policies: education, social inclusion, health, families, pensions, integration policy, safe living conditions, global inequalities

3. Environmental Policies: environment policy, global environmental protection

#### 4.90.15sgi qd Quality of Democracy

This pillar of the SGI examines the quality of democracy in each country. From the perspective of long-term system stability and political performance, the quality of democracy and political participation are crucial aspects of a society's success. The stability and performance of a political system depends in large part upon the assent and confidence of its citizens. Democratic participation and oversight are also essential to genuine learning and adaptation processes, and to the ability to change. In this sense, guaranteeing opportunities for democratic participation and oversight, as well as the presence of due process and respect for civil rights, are fundamental prerequisites for the legitimacy of a political system. The quality of democracy in each country is measured against a definitional norm that considers issues relating to participation rights, electoral competition, access to information and the rule of law. Given that all OECD and EU member states constitute democracies, the questions posed here focus on the quality rather than the presence of democracy. Individual indicators monitor the following criteria:

- 1. Electoral processes
- 2. Access to information
- 3. Civil rights and political liberties
- 4. Rule of law

Min. Year:2013 Max. Year: 2017 **N**: 41 **n**: 205  $\overline{N}$ : 41  $\overline{T}$ : 5

#### 4.90.16 sgi qdai Quality of Democracy: Access to Information

Quality of Democracy: Access to Information (Media Freedom, Media Pluralism, Access to Government Information)

4.90.17 sgi qdcr Quality of Democracy: Civil Rights and Political Liberties

Quality of Democracy: Civil Rights and Political Liberties (Civil Rights, Political Liberties, Non-discrimination)

#### 4.90.18 sgi\_qdep Quality of Democracy: Electoral Process

Quality of Democracy: Electoral Process (Candidacy Procedures, Media Access, Voting and Registration Rights, Party Financing, Popular Decision-making)

N: 41

Min. Year:2013 Max. Year: 2017 N: 41 n: 205  $\overline{N}$ : 41  $\overline{T}$ : 5

#### 4.90.19 sgi qdrl Quality of Democracy: Rule of Law

Quality of Democracy: Rule of Law (Legal Certainty, Judicial Review, Appointment of Justices, Corruption Prevention)

### 4.90.20 sgi\_qdrlc Quality of Democracy: Rule of Law - Corruption Prevention

Quality of Democracy: Rule of Law - Corruption Prevention. To what extent are public officeholders prevented from abusing their position for private interests? This question addresses how the state and society prevent public servants and politicians from accepting bribes by applying mechanisms to guarantee the integrity of officeholders: auditing of state spending; regulation of party financing; citizen and media access to information; accountability of officeholders (asset declarations, conflict of interest rules, codes of conduct); transparent public procurement systems; effective prosecution of corruption. (1, 2): Public officeholders can exploit their offices for private gain as they see fit without fear of legal consequences or adverse publicity. (3, 4, 5): Some integrity mechanisms function, but do not effectively prevent public officeholders from abusing their positions. (6, 7, 8): Most integrity mechanisms function effectively and provide disincentives for public officeholders willing to abuse their positions. (9, 10): Legal, political and public integrity mechanisms effectively prevent public officeholders from abusing their positions.

#### 4.90.21 sgi so Policy Performance: Social Policies - Overall

#### Social Insurance Entitlements Dataset

The Social Insurance Entitlements Dataset (SIED) is a continuation of the SCIP project, but carries on data collection beyond 2005 for a larger number of countries. The SIE dataset closely follows the structure of SCIP, thus covering the same social insurance programs and sharing the same variable names. The SIE dataset includes the original 18 SCIP countries, but also stores data for all EU Member States as of 2010. The current version of SIED stores two waves of data for all EU countries, 2005 and 2010. Data for Greece, Portugal and Spain goes back to 1980.

The Social Citizenship Indicator Program (SCIP) covered institutional structures of core social insurance programs. Detailed information was provided on citizens' rights and duties based on legislation related to five major programs, including old age pensions and benefits in cases of sickness, unemployment and work accidents.

#### 4.92.1 sied\_acovratl Accident, labour force coverage rate

Coverage ratio as proportion of labour force (ANOINSUR /ALABFORC)

#### 4.93 Nathan Nunn

http://scholar.harvard.edu/nunn/pages/data-0 (Nunn, 2008) (Data downloaded: 2018-07-06)

#### "The Long-Term Effects of Africa's Slave Trades" Dataset (2008)

To construct a measure of the total number of slaves taken from each country during the four slave trades between 1400 and 1900, Nunn collected data that report the total number of slaves exported from each port or region in Africa and data that reports the ethnic identity of slaves shipped from Africa.

There were a number of ways Nunn identified the ethnicity or "nation" of a slave:

"The easiest was often by a slave's name. Slaves were often given a Christian first name and a surname that identified their ethnicity (e.g., Tardieu [2001]). As well, a slave's ethnicity could often be determined from ethnic markings, such as cuts, scars, hairstyles, or the filing of teeth (Karasch 1987, pp. 4-9)."

"Information on the ethnicities of slaves shipped during the trans-Atlantic slave trade comes from 54 different samples, totalling 80,656 slaves, with 229 distinct ethnic designations reported. Table I summarizes information about the samples used in the trans-Atlantic slave trade. The table reports the location, the years covered, the number of slaves, and the number of ethnicities that could be identified for each sample. Similar tables for the other three slave trades are reported in Nunn (2007).

The ethnicity data for the Indian Ocean slave trade come from six samples, with a total of 21,048 slaves and 80 different ethnicities reported. The data for the Red Sea slave trade are from two samples: one from Jedda, Saudi Arabia, and the other from Bombay, India. The samples provide information for 67 slaves, with 32 different reported ethnicities. For the trans-Saharan slave trade two samples are available: one from central Sudan and the other from western Sudan. The samples provide information on the origins of 5,385 slaves, with 23 different ethnicities recorded. The shipping data from Austen (1992) also provide additional information on which caravan slaves were shipped on, the city or town that the caravan originated in, the destination of the caravan, and in some cases the ethnic identity of the slaves being shipped."

Nunn combines the data in the following way:

Using the shipping data, Nunn first calculates the number of slaves shipped from each coastal country in Africa. In an example 100,000 slaves were shipped from Country A and 250,000 were shipped from Country C. The problem with relying on the shipping data alone is that many of slaves shipped from Country A may have come from Country B, which lies landlocked behind Country A. Then, using the ethnicity data, Nunn calculates the ratio of slaves from each coastal country relative to any landlocked countries located inland of the coastal country. This requires to map ethnicities to countries and aggregate up to the country level. In practice, this step relied on a great amount of past research by African historians, linguists, and ethnographers. The sources most heavily used are Koelle (1854), Murdock (1959), Curtin (1969), Higman (1984), and Hall (2005).

#### 4.93.1 slavet lnexparea Log Total Slave Export (Normalized by Land Area)

### 4.94 The Political Terror Scale (PTS) project

http://www.politicalterrorscale.org/Data/Documentation-SVS.html (Gibney et al., 2015) (Data downloaded: 2018-10-03)

#### The Societal Violence Scale

The Societal Violence Scale seeks to develop measures of societal violence based on annual US State Department's Human Rights reports. The Societal Violence Scale ranks countries on a 5-point scale (from the lowest level of societal violence to the highest) based on three criteria. First, the authors look at scope: the proportion of society that is victimized. Thus, widespread violence against women (who account for 50 percent of the population) figures more heavily in the final score than widespread abuses against human rights defenders, who represent a very small number. The authors also look at the severity of abuses. For example, evidence that human rights defenders are killed weighs more heavily than beatings of human rights defenders. Likewise, while women are routinely subjected to sexual violence and domestic violence, the addition of other types of violence against women like gang rape, sex trafficking, and/or FGM/C adds to the assessment of severity.

#### 4.94.1 svs ind Societal Violence Scale Index 1-5

The Societal Violence Scale is coded on a 5-point scale where:

1 Societal violence is limited in scopre and severity, with relatively few victims and few perpetrators. 2 Societal violence is a problem, affecting a significant number of victims, albeit across few victim categories and of a less severe nature.

3 Societal violence is widespread and serious in nature. It affects a significant number of people across several victim categories.

4 Societal violence is pervasive in scope, severe in nature, assumes a variety of forms and affects a large proportion of the population typically across several victim categories and perpetrators.

5 Societal violence is ubiquitous in scope, egregious in nature and assumes a variety of forms. If affects a large proportion of the population, commonly crossing numerous victim groups and perpetrators.

### **Comparative Political Parties Dataset**

Dataset captures characteristics of political parties in Australia, Austria, Belgium, Canada, Denmark, Finland, France, West Germany, Ireland, Italy, Japan, Netherlands, New Zealand, Norway, Sweden, Switzerland, United Kingdom, United States, Greece, Portugal, and Spain between 1950 to 2011.

This dataset uses the following categories for parties: Left: communist; socialist, social democratic, and labor; and other various left-wing parties (e.g., left-libertarian parties); Right: far-right (e.g., neo-fascist, right-wing populist), classical liberal, Conservative Christian Democratic, and other various right-wing parties; Centrist Christian Democratic (Centrist CD): non-conservative Catholic parties; Secular Center (Secular Cent): non-catholic parties of the center. The data set also includes a total Christian Democratic party category and all variables for Radical Right-Wing Populist and Left-Libertarian parties.

#### 4.96**Transparency International**

https://www.transparency.org/news/feature/corruption\_perceptions\_index\_2017 (Transparency International, 2019) (Data downloaded: 2019-01-29)

#### **Corruption Perceptions Index**

The CPI focuses on corruption in the public sector and defines corruption as the abuse of public office for private gain. The surveys used in compiling the CPI tend to ask questions in line with the misuse of public power for private benefit, with a focus, for example, on bribe-taking by public officials in public procurement. The sources do not distinguish between administrative and political corruption. The CPI Score relates to perceptions of the degree of corruption as seen by business people, risk analysts and the general public and ranges between 100 (highly clean) and 0 (highly corrupt).

Note: The time-series information in the CPI scores can only be used if interpreted with caution. Year-to-year shifts in a country's score can result not only from a changing perception of a country's performance but also from a changing sample and methodology. That is, with differing respondents and slightly differing methodologies, a change in a country's score may also relate to the fact that different viewpoints have been collected and different questions have been asked. Moreover, each country's CPI score is composed as a 3-year moving average, implying that if changes occur they only

gradually affect a country's score. For a more detailed discussion of comparability over time in the CPI, see Lambsdorff 2005.

Note: In 2012 TI changed methodology for which the data is no comparable and only data from 2012 can be compared.

Also, the observation "Belgium/Luxembourg" from the 1995 data has been dropped.

#### The World Top Incomes Database

Built to accompany the publishing of the two books Top Incomes : a Global Perspective (2010, Oxford University Press) and Top Incomes over the XXth Century (2007, Oxford University Press), the World Top Incomes Database offers the most comprehensive set of historical series on income inequality available so far. In the 2010 book, the authors analyze the long term evolution of top incomes in 12 new countries (after the 10 initial countries analysed in the 2007 book).

### 4.97.1 top\_top10\_income\_share Top 10% income share

Top 10% income share. Pre-tax national income share held by a given percentile group. Pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system. The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the tax unit defined by national fiscal administrations to measure personal income taxes.

#### 4.97.2 top top1 income share Top 1% income share

Top 1% income share. Pre-tax national income share held by a given percentile group. Pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system. The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

#### Unified Democracy Scores

The Unified Democracy Scores (UDS) now covers the time period 1946-2012. These new scores incorporate recent updates to three of the ten original measures - Freedom House (2014), Polity IV (Marshall et al. 2012), and VanHanen (2012) - that feature in the analysis that the authors report in their 2010 article. In addition, the current release adds a recently developed measure of democracy - Economist Intelligence Unit (2012) - to its framework.

### 4.100 United Nations Development Program

http://hdr.undp.org/en/data (United Nations Development Program, 2018b) (Data downloaded: 2018-11-14)

### Human Development Report

The Human Development Report (HDR) is an annual report published by the Human Development Report Office of the United Nations Development Programme (UNDP).

The entire series of Human Development Index (HDI) values and rankings are recalculated every year using the most recent (revised) data and functional forms. The HDI rankings and values in the 2014 Human Development Report cannot therefore be compared directly to indices published in previous Reports. Please see hdr.undp.org for more information.

The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes.

### 4.100.1 undp\_hdi Human Development Index

The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes. These contrasts can stimulate debate about government policy priorities.

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and have a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

The health dimension is assessed by life expectancy at birth, the education dimension is measured by mean of years of schooling for adults aged 25 years and more and expected years of schooling for children of school entering age. The standard of living dimension is measured by gross national income per capita. The HDI uses the logarithm of income, to reflect the diminishing importance of income with increasing GNI. The scores for the three HDI dimension indices are then aggregated into a composite index using geometric mean. Refer to Technical notes for more details.

The HDI simplifies and captures only part of what human development entails. It does not reflect on inequalities, poverty, human security, empowerment, etc. The HDRO offers the other composite indices as broader proxy on some of the key issues of human development, inequality, gender disparity and human poverty.

### 4.102 Tatu Vanhanen

https://services.fsd.uta.fi/catalogue/FSD1289?tab=description&lang=en&study\_language= en (Vanhanen, 2016) (Data downloaded: 2018-07-12)

### Measures of Democracy 1810-2014

The data contain three different variables, created by Tatu Vanhanen. The variables in question are political competition, political participation and the index of democratization.

### 4.102.1 van comp Competition

The competition variable portrays the electoral success of smaller parties, that is, the percentage of votes gained by the smaller parties in parliamentary and/or presidential elections. The variable is calculated by subtracting from 100 the percentage of votes won by the largest party (the party which wins most votes) in parliamentary elections or by the party of the successful candidate in presidential elections. Depending on their importance, either parliamentary or presidential elections are used in the calculation of the variable, or both elections are used, with weights. If information on the distribution of votes is not available, or if the distribution does not portray the reality accurately, the distribution of parliamentary seats is used instead. If parliament members are elected but political parties are not allowed to take part in elections, it is assumed that one party has taken all votes or seats. In countries where parties are not banned but yet only independent candidates participate in elections, it is assumed that the share of the largest party is not over 30 percent.

#### 4.102.2 van index Index of Democratization

The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100.

### 4.102.3 van part Participation

The political participation variable portrays the voting turnout in each election, and is calculated as the percentage of the total population who actually voted in the election. In the case of indirect elections, only votes cast in the final election are taken into account. If electors have not been elected by citizens, only the number of actual electors is taken into account, which means that the degree of participation drops to the value 0. If an election to choose electors has been held, the participation variable is calculated from the number and distribution of votes in that election. National referendums raise the variable value by five percent and state (regional) referendums by one percent for the year they are held. Referendums can add the degree of participation at maximum by 30 percent a year. The value of the combined degree of participation cannot be higher than 70 percent, even in cases where the sum of participation and referendums would be higher than 70.

### 4.103 Varieties of Democracy (V-Dem) Project

https://v-dem.net/en/data/ (Coppedge et al., 2017) (Pemstein et al., 2018) (Data downloaded: 2018-07-09)

#### Varieties of Democracy Dataset version 8

Varieties of Democracy (V-Dem) is a new approach to conceptualizing and measuring democracy. It is a collaboration among more than 50 scholars worldwide which is co-hosted by the Department of Political Science at the University of Gothenburg, Sweden; and the Kellogg Institute at the University of Notre Dame, USA.

#### 4.103.1 vdem corr Political corruption index

Political corruption. Question: How pervasive is political corruption?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive (at the level of the rulers/cabinet) on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished

types of corruption: both 'petty' and 'grand'; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation. Aggregation: The index is arrived at by taking the average of (a) public sector corruption index; (b) executive corruption index; (c) the indicator for legislative corruption; and (d) the indicator for judicial corruption. In other words, these four different government spheres are weighted equally in the resulting index. V-Dem replace missing values for countries with no legislature by only taking the average of (a), (b) and (d).

### 4.103.2 vdem delibdem Deliberative democracy index

Deliberative democracy index. Question: To what extent is the ideal of deliberative democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

### 4.103.3 vdem dl delib Deliberative component index

Deliberative component index. Question: To what extent is the deliberative principle of democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To measure these features of a polity we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification, common good justification, respect for counterarguments, range of consultation, and engaged society.

### 4.103.4 vdem edcomp thick Electoral component index

Electoral component index. Question: To what extent is the electoral principle of democracy achieved?

Clarification: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected (directly or indirectly) through elections. Aggregation: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive.

### 4.103.5 vdem\_egal Egalitarian component index

Egalitarian component index. Question: To what extent is the egalitarian principle achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. Aggregation: This index is formed by averaging the following indices: equal protection index and equal distribution of resources.

#### 4.103.6 vdem egaldem Egalitarian democracy index

Egalitarian democracy index. Question: To what extent is the ideal of egalitarian democracy achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities

inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

#### 4.103.7vdem elvotbuy Election vote buying

Election vote buying. Question: In this national election, was there evidence of vote and/or turnout buying?

Clarification: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, i.e., "porkbarrel" legislation. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

**N**: 179 **n**: 2538  $\overline{N}$ : 35  $\overline{T}$ : 14

#### 4.103.8 vdem exbribe Executive bribery and corrupt exchanges

Executive bribery and corrupt exchanges. Question: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year: 2015 Max. Year: 2015 N: 171

Min. Year:1946 Max. Year: 2017 **N**: 183 **n**: 9792  $\overline{N}$ : 136  $\overline{T}$ : 54

### 4.103.9 vdem excrptps Public sector corrupt exchanges

Public sector corrupt exchanges. Question: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

Clarification: When responding to this question, we would like to you think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year:2015 Max. Year: 2015 N: 171

Min. Year:1946 Max. Year: 2017 N: 183 n: 9792  $\overline{N}$ : 136  $\overline{T}$ : 54

#### 4.103.10 vdem execorr Executive corruption index

Executive corruption index. Question: How routinely do members of the executive, or their agents grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for executive bribery and executive embezzlement.

#### 4.103.11 vdem exembez Executive embezzlement and theft

Executive embezzlement and theft. Question: How often do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, steal, embezzle, or misappropriate public funds or other state resources for personal or family use? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

### 4.103.12 vdem exthftps Public sector theft

Public sector theft. Question: How often do public sector employees steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: When responding to this question, we would like to you think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. Scale: ordinal, converted to interval by the measurement model.

#### 4.103.13 vdem gcrrpt Legislature corrupt activities

Legislature corrupt activities. Do members of the legislature abuse their position for financial gain? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

### 4.103.14 vdem gender Women political empowerment index

Women political empowerment index. Question: How politically empowered are women?

Clarifications: Women's political empowerment is defined as a process of increasing capacity for women, leading to greater choice, agency, and participation in societal decision-making. It is understood to incorporate three equally-weighted dimensions: fundamental civil liberties, women's open discussion of political issues and participation in civil society organizations, and the descriptive representation of women in formal political positions. Aggregation: The index is formed by taking the average of women's civil liberties index, women's civil society participation index, and women's political participation index.

### 4.103.15 vdem jucorrdc Judicial corruption decision

Judicial corruption decision. Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay the process or to obtain a favorable judicial decision? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year:1946 Max. Year: 2017 N: 182 n: 9746  $\overline{N}$ : 135  $\overline{T}$ : 54

#### 4.103.16 vdem libdem Liberal democracy index

Liberal democracy index. Question: To what extent is the ideal of liberal democracy achieved? Clarifications: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

#### 4.103.17 vdem liberal Liberal component index

Liberal component index. Question: To what extent is the liberal principle of democracy achieved?

Clarification: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. Aggregation: This index is formed by averaging the following indices: equality before the law and individual liberties, judicial constraints on the executive, and legislative constraints on the executive.

Min. Year:2015 Max. Year: 2015 N: 171

**Min. Year**:1946 **Max. Year**: 2017 **N**: 183 **n**: 9760  $\overline{N}$ : 136  $\overline{T}$ : 53

### 4.103.18 vdem\_mecorrpt Media corrupt

Media corrupt. Question: Do journalists, publishers, or broadcasters accept payments in exchange for altering news coverage? V-Dem uses a specifically designed measurement model to provide countryyear point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

#### 4.103.19 vdem partip Participatory component index

Participatory component index. Question: To what extent is the participatory principle achieved?

Clarification: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. Aggregation: This index is formed by averaging the following indices: civil society participation, direct popular vote, elected local government power, and elected regional government power.

#### 4.103.20 vdem partiplem Participatory democracy index

Participatory democracy index. Question: To what extent is the ideal of participatory democracy achieved?

Clarifications: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock
practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. To make it a measure of participatory democracy, the index also takes the level of electoral democracy into account.

**N**: 171

Min. Year:1946 Max. Year: 2017 N: 183 n: 9788  $\overline{N}$ : 136  $\overline{T}$ : 53

#### 4.103.21 vdem polyarchy Electoral democracy index

Electoral democracy index. Question: To what extent is the ideal of electoral democracy in its fullest sense achieved?

Clarifications: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the VDem conceptual scheme, electoral democracy is understood as an essential element of any other conception of (representative) democracy - liberal, participatory, deliberative, egalitarian, or some other. Aggregation: The index is formed by taking the average of, on the one hand, the sum of the indices measuring freedom of association (thick), suffrage, clean elections, elected executive (de jure) and freedom of expression; and, on the other, the five-way interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahls sub-components (with the one exception of the non-electoral component).

**N**: 171

Min. Year:1946 Max. Year: 2017 N: 183 n: 9788  $\overline{N}$ : 136  $\overline{T}$ : 53

#### 4.103.22 vdem pubcorr Public sector corruption index

Public sector corruption index. Question: To what extent do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for public sector bribery and embezzlement.

Min. Year:2015 Max. Year: 2015 N: 171

### 4.104 Jelle Visser

http://uva-aias.net/en/ictwss (Visser, 2016) (Data downloaded: 2018-07-10)

#### The ICTWSS database

The ICTWSS database covers four key elements of modern political economies: trade unionism, wage setting, state intervention and social pacts. The database contains annual data for all OECD and EU member states.

#### 4.104.1 vi\_ext Mandatory extension of collective agreements to non-organised employers

Mandatory extension of collective agreements to non-organised employers.

0. There are neither legal provisions for mandatory extension, nor is there a functional equivalent.

1. Extension is rather exceptional, used in some industries only, because of absence of sector agreements, very high thresholds (supermajorities of 60% or more, public policy criteria, etc.), and/or resistance of Employers.

2. Extension is used in many industries, but there are thresholds and Ministers can (and sometimes do) decide not to extend (clauses in) collective agreements.

3. Extension is virtually Automatic and more or less general (including enlargement).

Min. Year:2012 Max. Year: 2015 N: 49

Min. Year:1960 Max. Year: 2015 N: 52 n: 1871  $\overline{N}$ : 33  $\overline{T}$ : 36

#### 4.104.2 vi mws Minimum Wage Setting

Minimum Wage Setting.

0. No statutory minimum wage, no sectoral or national agreements.

1. Minimum wages are set by (sectoral) collective agreement or tripartite wage boards in (some) sectors.

2. Minimum wages are set by national (cross-sectoral or inter-occupational) agreement ("autonomous agreement") between unions and employers.

3. National minimum wage is set by agreement (as in 1 or 2) but extended and made binding by law or Ministerial decree.

4. National minimum wage is set through tripartite negotiations.

5. National minimum wage is set by Government, but after (non-binding) tripartite consultations.

6. Minimum wage set by judges or expert committee, as in award-system.

7. Minimum wage is set by government but government is bound by fixed rule (index-based minimum wage).

8. Minimum wage is set by government, without fixed rule.

Min. Year:1960 Max. Year: 2015 N: 51 n: 2048  $\overline{N}$ : 37  $\overline{T}$ : 40

#### 4.104.3 vi nmw National Minimum Wage

National Minimum Wage.

- 0. No statutory minimum wage.
- 1. Statutory minimum wage in some sectors (occupations, regions/states) only.
- 2. Statutory national (cross-sectoral or interoccupational) minimum wage exists.

#### 4.104.4 vi rag Right of Association, government

Right of Association, Government Sector.

0. No.

1. Yes, with major restrictions (e.g., monopoly union, government authorization, major groups excluded.

2. Yes, with minor restrictions (e.g., recognition procedures, thresholds, only military, judiciary or police excluded, as per ILO convention).

3. Yes.

#### 4.104.5 vi\_ram Right of Association, market

Right of Association, Market Sector.

#### 0. No.

1. Yes, with major restrictions (e.g. monopoly union, prior authorization, major groups excluded).

Yes, with minor restrictions (e.g. recognition procedures, workplace elections, thresholds).
 Yes.

#### 4.104.6 vi rcbg Right of Collective bargaining, government

Right of Collective Bargaining, Government Sector.

0. No.

1. Yes, with major restrictions (e.g. monopoly union, government authorization, limitations on content, major groups excluded).

2. Yes, with minor restrictions (e.g. registration, thresholds, only military, judiciary or police excluded - as per ILO convention).

3. Yes.

#### 4.104.7 vi rcbm Right of Collective bargaining, market

Right of Collective Bargaining, Market Sector.

0. No.

1. Yes, with major restrictions (e.g. monopoly union, government authorization, limitations on content, major groups excluded).

2. Yes, with minor restrictions (e.g. registration, thresholds).

3. Yes.

Right to Strike, Government Sector.

#### 0. No.

1. Yes, with major restrictions (e.g. monopoly union, compulsory arbitration or conciliation, restrictions on issues or content, major groups excluded).

2. Yes, with minor restrictions (e.g. recognized union, balloting, proportionality, respect of peace

obligation, only only military, judiciary or police excluded - as per ILO convention). 3. Yes.

Min. Year:1960 Max. Year: 2014 N: 55 n: 2486  $\overline{N}$ : 45  $\overline{T}$ : 45

#### 4.104.9 vi rsm Right to Strike, market

Right to Strike, Market Sector.

0. No.

1. Yes, with major restrictions (e.g. monopoly union, compulsory arbitration or conciliation, restrictions on issues or content, major groups excluded).

2. Yes, with minor restrictions (e.g. recognized union, balloting, proportionality, respect of peace obligation).

3. Yes.

#### 4.104.10 vi\_udr Union Density Rate

Union density rate, net union membership as a proportion of wage and salary earners in employment.

#### 4.104.11 vi wcoord Coordination of wage-setting

Coordination of Wage-Setting.

1. Fragmented wage bargaining, confined largely to individual firms or plants.

2. Mixed industry and firm-level bargaining, with no or little pattern bargaining and relatively weak elements of government coordination through the setting of minimum wage or wage indexation.

3. Negotiation guidelines based on a) centralized bargaining by peak associations with or without government involvement b) informal centralisation of industry-level bargaining c) government arbitration or intervention.

4. Wage norms or guidelines (recommendations) based on a) centralized bargaining by peak associations with or without government involvement b) informal centralisation of industry-level bargaining by a powerful and monopolistic union confederation c) extensive, regularized pattern setting coupled with high degree of union concentration. 5. Maximum or minimum wage rates/increases based on a) centralized bargaining by peak association(s), with or without government involvement, and/or government imposition of wage schedule/freeze, with peace obligation b) informal centralisation of industry-level bargaining by a powerful and monopolistic union confederation c) extensive, regularized pattern setting and highly synchronized bargaining coupled with coordination of bargaining by influential large firms.

#### 4.104.12 vi wgi Government intervention in wage bargaining

Government Intervention in Wage Bargaining.

1. None of the following.

2. The government influences wage bargaining by providing an institutional framework of consultation and information exchange, by conditional agreement to extend private sector agreements, and/or by providing a conflict Resolution mechanism which links the settlement of disputes across the economy and/or allows the intervention of state arbitrators or Parliament.

3. The government influences wage bargaining outcomes indirectly through price-ceilings, indexation, tax measures, minimum wages, and/or pattern setting through public sector wages.

4. The government participates directly in wage bargaining (tripartite bargaining, as in social pacts).5. The government imposes private sector wage settlements, places a ceiling on bargaining outcomes or suspends bargaining.

#### 4.104.13 vi wl The predominant level at which wage bargaining takes place

The predominant level at which wage bargaining takes place.

1. Bargaining predominantly takes place at the local or company level.

2. Intermediate or alternating between sector and company bargaining.

3. Bargaining predominantly takes place at the sector or industry level.

4. Intermediate or alternating between central and industry bargaining.

5. Bargaining predominantly takes place at central or cross-industry level and there are centrally determined binding norms or ceilings to be respected by agreements negotiated at lower levels.

### 4.105 Institute for Economics & Peace

http://www.visionofhumanity.org/#/page/indexes/terrorism-index (Vision of Humanity, 2017) (Data downloaded: 2018-11-06)

#### **Global Terrorism Index**

The Global Terrorism Index (GTI) is a comprehensive study which accounts for the direct and indirect impact of terrorism in 162 countries in terms of its effect on lives lost, injuries, property damage and the psychological after-effects of terrorism. This study covers 99.6 per cent of the world's population. It aggregates the most authoritative data source on terrorism today, the Global Terrorism Database (GTD) collated by the National Consortium for the Study of Terrorism and Responses to Terrorism (START) into a composite score in order to provide an ordinal ranking of nations on the negative impact of terrorism. The GTD is unique in that it consists of systematically and comprehensively coded data on domestic as well as international terrorist incidents and now includes more than 140,000 cases.

### 4.106 The World Bank Group

http://info.worldbank.org/governance/wgi/index.aspx#home (Kaufmann et al., 2010) (Data downloaded: 2018-09-24)

#### The Worldwide Governance Indicators

These indicators are based on several hundred individual variables measuring perceptions of governance, drawn from 31 separate data sources constructed by 25 different organizations. These individual measures of governance are assigned to categories capturing key dimensions of governance. An unobserved component model is used to construct six aggregate governance indicators. Point estimates of the dimensions of governance, the margins of error as well as the number of sources are presented for each country. The governance estimates are normally distributed with a mean of zero and a standard deviation of one each year of measurement. This implies that virtually all scores lie between -2.5 and 2.5, with higher scores corresponding to better outcomes.

Note: Since the estimates are standardized (with a mean of zero and a standard deviation of one) each year of measurement, they are not directly suitable for over-time comparisons within countries. Kaufmann et al. (2006) however find no systematic time-trends in a selection of indicators that do allow for comparisons over time, which suggests that time-series information in the WBGI scores can be used if interpreted with caution.

#### 4.106.1 wbgi\_cce Control of Corruption, Estimate

Control of Corruption - Estimate: "Control of Corruption" measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency of "additional payments to get things done", to the effects of corruption on the business environment, to measuring "grand corruption" in the political arena or in the tendency of elite forms to engage in "state capture".

http://data.worldbank.org/data-catalog/world-development-indicators
(World Bank, 2016)
(Data downloaded: 2018-10-05)

#### World Development Indicators

The primary World Bank collection of development indicators, compiled from officially-recognized international sources.

This is an adaptation of an original work by The World Bank. Views and opinions expressed in the adaptation are the sole responsibility of the author or authors of the adaptation and are not endorsed by The World Bank.

#### 4.107.1 wdi accf Access to clean fuels and technologies for cooking (% of population)

Access to clean fuels and technologies for cooking is the proportion of total population primarily using clean cooking fuels and technologies for cooking. Under WHO guidelines, kerosene is excluded from clean cooking fuels.

Min. Year:2000 Max. Year: 2016 N: 189 n: 3171  $\overline{N}$ : 187  $\overline{T}$ : 17

#### 4.107.2 wdi acel Access to electricity (% of population)

Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources.

#### 4.107.3 wdi\_acelr Access to electricity, rural (% of rural population)

Access to electricity, rural is the percentage of rural population with access to electricity.

Min. Year:2013 Max. Year: 2016 N: 189

Min. Year:1990 Max. Year: 2016 N: 191 n: 4618  $\overline{N}$ : 171  $\overline{T}$ : 24

#### 4.107.4 wdi acelu Access to electricity, urban (% of urban population)

Access to electricity, urban is the percentage of urban population with access to electricity.

Min. Year:2015 Max. Year: 2015 N: 192

Min. Year:1990 Max. Year: 2016 N: 195 n: 5010  $\overline{N}$ : 186  $\overline{T}$ : 26

Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces. Labor force comprises all people who meet the International Labour Organization's definition of the economically active population.

#### 4.107.6 wdi afpt Armed forces personnel, total

Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

#### 4.107.7 wdi agedr Age dependency ratio (% of working-age population)

Age dependency ratio is the ratio of dependents–people younger than 15 or older than 64–to the working-age population–those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population.

Min. Year:1960 Max. Year: 2017 N: 189 n: 8993  $\overline{N}$ : 155  $\overline{T}$ : 48

#### 4.107.8 wdi agrland Agricultural irrigated land (% of total agricultural land)

Agricultural land refers to the share of land area that is arable, under permanent crops, and under permanent pastures. Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded. Land under permanent crops is land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee, and rubber. This category includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber. Permanent pasture is land used for five or more years for forage, including natural and cultivated crops.

### 4.107.9 wdi\_ane Alternative and nuclear energy (% of total energy use)

Clean energy is noncarbohydrate energy that does not produce carbon dioxide when generated. It includes hydropower and nuclear, geothermal, and solar power, among others.

Min. Year:1960 Max. Year: 2015 N: 142 n: 5570  $\overline{N}$ : 99  $\overline{T}$ : 39

#### 4.107.10 wdi\_araland Arable land (% of land area)

Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Min. Year:1961 Max. Year: 2015 N: 195 n: 8744  $\overline{N}$ : 159 $\overline{T}$ : 45

### 4.107.11 wdi area Land area (sq. km)

Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

**N**: 191

**Min. Year**:1961 **Max. Year**: 2017 **N**: 198 **n**: 9267  $\overline{N}$ : 163  $\overline{T}$ : 47

# 4.107.12 wdi\_areabelow Land area where elevation is below 5 meters (% of total land area)

Land area below 5m is the percentage of total land where the elevation is 5 meters or less.

#### 4.107.13 wdi armexp Arms exports (SIPRI trend indicator values)

Exports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

4.107.14 wdi armimp Arms imports (SIPRI trend indicator values)

Imports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Min. Year:1960 Max. Year: 2017 N: 190 n: 5867  $\overline{N}$ : 101  $\overline{T}$ : 31

#### 4.107.15 wdi\_bhr CPIA building human resources rating (1=low to 6=high)

The CPIA measures the extent to which a country's policy and institutional framework supports sustainable growth and poverty reduction and, consequently, the effective use of development assistance. More specifically, this indicator assesses the national policies and public and private sector service delivery that affect the access to and quality of health and education services, including prevention and treatment of HIV/AIDS, tuberculosis, and malaria.

#### 4.107.16 wdi birth Birth rate, crude (per 1,000 people)

Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Min. Year:2014 Max. Year: 2016 N: 188

Min. Year:1960 Max. Year: 2016 N: 197 n: 8978  $\overline{N}$ : 158  $\overline{T}$ : 46

#### 4.107.17 wdi\_birthreg Completeness of birth registration (%)

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

#### 4.107.18 wdi\_birthregr Completeness of birth registration, rural (%)

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the rural areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

#### 4.107.19 wdi birthregu Completeness of birth registration, urban (%)

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the urban areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

#### 4.107.20 wdi birthskill Births attended by skilled health staff (% of total)

Births attended by skilled health staff are the percentage of deliveries attended by personnel trained to give the necessary supervision, care, and advice to women during pregnancy, labor, and the post-partum period; to conduct deliveries on their own; and to care for newborns.

4.107.21 wdi\_brdeath Battle-related deaths (number of people)

Battle-related deaths are deaths in battle-related conflicts between warring parties in the conflict dyad (two conflict units that are parties to a conflict). Typically, battle-related deaths occur in warfare involving the armed forces of the warring parties. This includes traditional battlefield fighting, guerrilla activities, and all kinds of bombardments of military units, cities, and villages, etc. The targets are usually the military itself and its installations or state institutions and state representatives, but there is often substantial collateral damage in the form of civilians being killed in crossfire, in indiscriminate bombings, etc. All deaths-military as well as civilian-incurred in such situations, are counted as battle-related deaths.

## 4.107.22 wdi\_bribfirm Bribery incidence (% of firms experiencing at least one bribe request)

Bribery incidence is the percentage of firms experiencing at least one bribe payment request across 6 public transactions dealing with utilities access, permits, licenses, and taxes.

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.107.23 wdi broadb Fixed broadband subscriptions (per 100 people)

Fixed broadband subscriptions refers to fixed subscriptions to high-speed access to the public Internet (a TCP/IP connection), at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fiber-to-the-home/building, other fixed (wired)-broadband subscriptions, satel-lite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile-cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.

## 4.107.24 wdi\_busden New business density (new registrations per 1,000 people ages 15-64)

New businesses registered are the number of new limited liability corporations registered in the calendar year.

**N**: 123

Min. Year:2006 Max. Year: 2016 N: 135 n: 1292  $\overline{N}$ : 117  $\overline{T}$ : 10

#### 4.107.25 wdi chexppgdp Current health expenditure (% of GDP)

Current health expenditure (% of GDP). Level of current health expenditure expressed as a percentage of GDP. Estimates of current health expenditures include healthcare goods and services consumed during each year. This indicator does not include capital health expenditures such as buildings, machinery, IT and stocks of vaccines for emergency or outbreaks.

Min. Year:2000 Max. Year: 2015 N: 190 n: 2964  $\overline{N}$ : 185  $\overline{T}$ : 16

#### 4.107.26 wdi\_co2 CO2 emissions (metric tons per capita)

Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

#### 4.107.27 wdi death Death rate, crude (per 1,000 people)

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate

of natural increase, which is equal to the rate of population change in the absence of migration.

# 4.107.28 wdi\_deathreg Completeness of death registration with cause-of-death information (%)

Completeness of death registration is the estimated percentage of deaths that are registered with their cause of death information in the vital registration system of a country.

#### 4.107.29 wdi debt Central government debt, total (% of GDP)

Debt is the entire stock of direct government fixed-term contractual obligations to others outstanding on a particular date. It includes domestic and foreign liabilities such as currency and money deposits, securities other than shares, and loans. It is the gross amount of government liabilities reduced by the amount of equity and financial derivatives held by the government. Because debt is a stock rather than a flow, it is measured as of a given date, usually the last day of the fiscal year.

Min. Year:2012 Max. Year: 2016 N: 67

Min. Year:1970 Max. Year: 2017 N: 107 n: 1360  $\overline{N}$ : 28  $\overline{T}$ : 13

#### 4.107.30 wdi\_dgovhexp Domestic general government health expenditure (% of GDP)

Domestic general government health expenditure (% of GDP). Public expenditure on health from domestic sources as a share of the economy as measured by GDP.

Min. Year:2012 Max. Year: 2015 N: 188

Min. Year:2000 Max. Year: 2015 N: 190 n: 2878  $\overline{N}$ : 180  $\overline{T}$ : 15

# 4.107.31 wdi\_dprivhexp Domestic private health expenditure (% of current health expenditure)

Domestic private health expenditure (% of current health expenditure). Share of current health expenditures funded from domestic private sources. Domestic private sources include funds from households, corporations and non-profit organizations. Such expenditures can be either prepaid to voluntary health insurance or paid directly to healthcare providers.

Min. Year:2012 Max. Year: 2015 N: 188

Min. Year:2000 Max. Year: 2015 N: 190 n: 2879  $\overline{N}$ : 180  $\overline{T}$ : 15

### 4.107.32 wdi eduprp School enrollment, primary, private (% of total primary)

Percentage of enrollment in primary education in private institutions (%)

in. Year:2012 Max. Year: 2016 N: 174

Min. Year:1970 Max. Year: 2017 N: 193 n: 4780  $\overline{N}$ : 100  $\overline{T}$ : 25

### 4.107.33 wdi\_eduprs School enrollment, secondary, private (% of total secondary) Percentage of enrollment in secondary education in private institutions (%)

Min. Year:2012 Max. Year: 2016 N: 157

#### 4.107.34 wdi\_effrev mob CPIA efficiency of revenue mobilization rating (1=low to 6=high)

Efficiency of revenue mobilization assesses the overall pattern of revenue mobilization–not only the de facto tax structure, but also revenue from all sources as actually collected.

Min. Year:2013 Max. Year: 2017 N: 81

Min. Year:2005 Max. Year: 2017 N: 86 n: 986  $\overline{N}$ : 76  $\overline{T}$ : 11

#### 4.107.35 wdi ehexpp External health expenditure (% of current health expenditure)

External health expenditure (% of current health expenditure). Share of current health expenditures funded from external sources. External sources compose of direct foreign transfers and foreign transfers distributed by government encompassing all financial inflows into the national health system from outside the country. External sources either flow through the government scheme or are channeled through non-governmental organizations or other schemes.

4.107.36 wdi elerenew Renewable electricity output (% of total electricity output)

Renewable electricity is the share of electricity generated by renewable power plants in total electricity generated by all types of plants.

4.107.37 wdi\_elprodcoal Electricity production from coal sources (% of total)

Sources of electricity refer to the inputs used to generate electricity. Coal refers to all coal and brown coal, both primary (including hard coal and lignite-brown coal) and derived fuels (including patent fuel, coke oven coke, gas coke, coke oven gas, and blast furnace gas). Peat is also included in this category.

4.107.38 wdi\_elprodgas Electricity production from natural gas sources (% of total)

Sources of electricity refer to the inputs used to generate electricity. Gas refers to natural gas but excludes natural gas liquids.

4.107.39 wdi elprodhyd Electricity production from hydroelectric sources (% of total)

Sources of electricity refer to the inputs used to generate electricity. Hydropower refers to electricity produced by hydroelectric power plants.

Min. Year:1960 Max. Year: 2015 N: 142 n: 5692  $\overline{N}$ : 102  $\overline{T}$ : 40

#### 4.107.40 wdi elprodnuc Electricity production from nuclear sources (% of total)

Sources of electricity refer to the inputs used to generate electricity. Nuclear power refers to electricity produced by nuclear power plants.

Min. Year:2014 Max. Year: 2015 N: 137

Min. Year:1960 Max. Year: 2015 N: 142 n: 5589  $\overline{N}$ : 100  $\overline{T}$ : 39

#### 4.107.41 wdi elprodoil Electricity production from oil sources (% of total)

Sources of electricity refer to the inputs used to generate electricity. Oil refers to crude oil and petroleum products.

### 4.107.42 wdi\_emp Employers, total (% of total employment) (modeled ILO estimate)

Employers refers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced), and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

# 4.107.43 wdi\_empagr Employment in agriculture (% of total employment) (modeled ILO estimate)

Employment in agriculture as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

N: 177

Min. Year:1991 Max. Year: 2017 N: 179 n: 4693  $\overline{N}$ : 174  $\overline{T}$ : 26

#### 4.107.44 wdi\_empagrf Employment in agriculture, female (% female employment) (modeled ILO est.)

Female employment in agriculture as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Min. Year:2015 Max. Year: 2015 N: 177

Min. Year:1991 Max. Year: 2017 N: 179 n: 4693  $\overline{N}$ : 174  $\overline{T}$ : 26

#### 4.107.45 wdi\_empagrm Employment in agriculture, male (% male employment) (modeled ILO estimate)

Male employment in agriculture as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

4.107.46 wdi\_empch Children in employment, total (% of children ages 7-14)

Children in employment refer to children involved in economic activity for at least one hour in the reference week of the survey.

Children in employment refer to children involved in economic activity for at least one hour in the reference week of the survey. Female.

Min. Year:1994 Max. Year: 2016 N: 100 n: 278  $\overline{N}$ : 12  $\overline{T}$ : 3

### 4.107.48 wdi\_empchm Children in employment, male (% of male children ages 7-14)

Children in employment refer to children involved in economic activity for at least one hour in the reference week of the survey. Male.

### 4.107.49 wdi\_empf Employers, female (% of female employment) (modeled ILO estimate)

Employers refers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced), and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

### 4.107.50 wdi\_empind Employment in industry (% of total employment) (modeled ILO estimate)

Employment in industry as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

#### 4.107.51 wdi\_empindf Employment in industry, female (% female employment) (modeled ILO est.)

Female employment in industry as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

Min. Year:2015 Max. Year: 2015 N: 177

Min. Year:1991 Max. Year: 2017 N: 179 n: 4693  $\overline{N}$ : 174  $\overline{T}$ : 26

#### 4.107.52 wdi\_empindm Employment in industry, male (% of male employment) (modeled ILO estimate)

Male employment in industry as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

#### 4.107.53 wdi\_empm Employers, male (% of male employment) (modeled ILO estimate)

Employers refers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced), and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). # 4.107.66 wdi\_empser Employment in services (% of total employment) (modeled ILO estimate)

Total employment in services as percentage of total employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

#### 4.107.67 wdi\_empserf Employment in services, female (% of female employment) (modeled ILO est.)

Female employment in services (% of female employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

#### 4.107.68 wdi\_empserm Employment in services, male (% of male employment) (modeled ILO estimate)

Male employment in services (% of male employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

#### 4.107.69 wdi eneimp Energy imports, net (% of energy use)

Net energy imports are estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

#### 4.107.70 wdi\_energy Renewable energy consumption (% of total final energy consumption)

Renewable energy consumption is the share of renewables energy in total final energy consumption.

Min. Year:1990 Max. Year: 2015 N: 193 n: 4775  $\overline{N}$ : 184  $\overline{T}$ : 25

#### 4.107.71 wdi\_eneuse Energy use (kg of oil equivalent per capita)

Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

N: 136

#### 4.107.73 wdi eqpubres CPIA equity of public resource use rating (1=low to 6=high)

Equity of public resource use assesses the extent to which the pattern of public expenditures and revenue collection affects the poor and is consistent with national poverty reduction priorities.

#### 4.107.74 wdi expedu Government expenditure on education, total (% of GDP)

General government expenditure on education (current, capital, and transfers) is expressed as a percentage of GDP. It includes expenditure funded by transfers from international sources to government. General government usually refers to local, regional and central governments.

Note: The value for Tuvalu in 1997 has been recoded to missing due to an extreme and very unlikely value.

#### 4.107.75 wdi\_expeduge Government expenditure on education, total (% of government expenditure)

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditure funded by transfers from international sources to government. Public education expenditure includes spending by local/municipal, regional and national governments (excluding household contributions) on educational institutions (both public and private), education administration, and subsidies for private entities (students/households and other privates entities). In some instances data on total public expenditure on education refers only to the ministry of education and can exclude other ministries that spend a part of their budget on education incurred by all government agencies/departments by the total government expenditure and multiplying by 100. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Min. Year:2012 Max. Year: 2016 N: 137

Min. Year:1980 Max. Year: 2016 N: 179 n: 2426  $\overline{N}$ : 66  $\overline{T}$ : 14

#### wdi expedup Expenditure on primary education (% of government expendi-4.107.76ture on edu.)

Expenditure on Primary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

#### 4.107.77wdi expedus Expenditure on secondary education (% of government expenditure on edu.)

Expenditure on Secondary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

**N**: 177 **n**: 2718  $\overline{N}$ : 57  $\overline{T}$ : 15

#### 4.107.78wdi expedut Expenditure on tertiary education (% of government expenditure on edu.)

Expenditure on Tertiary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

#### 4.107.79 wdi expmil Military expenditure (% of GDP)

Military expenditure (% of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

**Min. Year**:1960 **Max. Year**: 2017 **N**: 171 **n**: 6905  $\overline{N}$ : 119  $\overline{T}$ : 40

#### 4.107.80 wdi\_expmilge Military expenditure (% of central government expenditure)

Military expenditure (% of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

#### 4.107.81 wdi export Exports of goods and services (% of GDP)

Exports of goods and services represent the value of all goods and other market services provided to the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Min. Year:1960 Max. Year: 2017 N: 189 n: 7867  $\overline{N}$ : 136  $\overline{T}$ : 42

## 4.107.82 wdi\_expstup Government expenditure per student, primary (% of GDP per capita)

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the primary level of education, expressed as a percentage of GDP per capita.

### 4.107.83 wdi\_expstus Government expenditure per student, secondary (% of GDP per capita)

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the secondary level of education, expressed as a percentage of GDP per capita.

Min. Year:2012 Max. Year: 2017 N: 117

Min. Year:1995 Max. Year: 2017 N: 154 n: 1277  $\overline{N}$ : 56  $\overline{T}$ : 8
# 4.107.84 wdi\_expstut Government expenditure per student, tertiary (% of GDP per capita)

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the given tertiary of education, expressed as a percentage of GDP per capita.

### 4.107.85 wdi fdiin Foreign direct investment, net inflows (% of GDP)

Foreign direct investment are the net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net inflows (new investment inflows less disinvestment) in the reporting economy from foreign investors, and is divided by GDP.

Foreign direct investment are the net outflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net outflows of investment from the reporting economy to the rest of the world and is divided by GDP.

# 4.107.87 wdi\_fertility Fertility rate, total (births per woman)

Total fertility rate represents the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with age-specific fertility rates of the specified year.

### 4.107.88 wdi firfown Firms with female participation in ownership (% of firms)

Firms with female participation in ownership are the percentage of firms with a woman among the principal owners.

### 4.107.89 wdi firftopm Firms with female top manager (% of firms)

Firms with female top manager refers to the percentage of firms in the private sector who have females as top managers. Top manager refers to the highest ranking manager or CEO of the establishment. This person may be the owner if he/she works as the manager of the firm. The results are based on surveys of more than 100,000 private firms.

Variable not included in Time-Series Data

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

# 4.107.90 wdi\_firgifttax Firms expected to give gifts in meetings w. tax officials (% of firms)

Firms expected to give gifts in meetings with tax officials is the percentage of firms that answered positively to the question "was a gift or informal payment expected or requested during a meeting with tax officials?"

#### 4.107.91 wdi fooddef Depth of the food deficit (kilocalories per person per day)

The depth of the food deficit indicates how many calories would be needed to lift the undernourished from their status, everything else being constant. The average intensity of food deprivation of the undernourished, estimated as the difference between the average dietary energy requirement and the average dietary energy consumption of the undernourished population (food-deprived), is multiplied by the number of undernourished to provide an estimate of the total food deficit in the country, which is then normalized by the total population.

### 4.107.92 wdi forest Forest area (% of land area)

Forest area is land under natural or planted stands of trees of at least 5 meters in situ, whether productive or not, and excludes tree stands in agricultural production systems (for example, in fruit plantations and agroforestry systems) and trees in urban parks and gardens.

### 4.107.93 wdi\_fossil Fossil fuel energy consumption (% of total)

Fossil fuel comprises coal, oil, petroleum, and natural gas products.

### 4.107.94 wdi\_gdpagr Agriculture, forestry, and fishing, value added (% of GDP)

Agriculture corresponds to ISIC divisions 1-5 and includes forestry, hunting, and fishing, as well as cultivation of crops and livestock production. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Min. Year:2013 Max. Year: 2015 N: 182

Min. Year:1960 Max. Year: 2017 N: 193 n: 7116  $\overline{N}$ : 123  $\overline{T}$ : 37

#### 4.107.95 wdi gdpcapcon2010 GDP per capita (constant 2010 US dollar)

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2010 U.S. dollars.

### 4.107.96 wdi gdpcapcur GDP per capita (current US dollar)

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars.

# 4.107.97 wdi\_gdpcapgr GDP per capita growth (annual %)

Annual percentage growth rate of GDP per capita based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP per capita is gross domestic product divided by midyear population. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

# 4.107.98 wdi\_gdpcappppcon2011 GDP per capita, PPP (constant 2011 international dollar)

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2011 international dollars.

Min. Year:2014 Max. Year: 2015 N: 184

# 4.107.99 wdi gdpcappppcur GDP per capita, PPP (current international dollar)

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round.

# 4.107.100 wdi\_gdpgr GDP growth (annual %)

Annual percentage growth rate of GDP at market prices based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

### 4.107.101 wdi gdpind Industry (including construction), value added (% of GDP)

Industry corresponds to ISIC divisions 10-45 and includes manufacturing (ISIC divisions 15-37). It comprises value added in mining, manufacturing (also reported as a separate subgroup), construction, electricity, water, and gas. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3. Note: For VAB countries, gross value added at factor cost is used as the denominator.

### 4.107.102 wdi gdppppcon2011 GDP, PPP (constant 2011 international dollar)

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2011 international dollars.

# 4.107.103 wdi\_gdppppcur GDP, PPP (current international dollar)

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round.

#### 4.107.104 wdi gender CPIA gender equality rating (1=low to 6=high)

Gender equality assesses the extent to which the country has installed institutions and programs to enforce laws and policies that promote equal access for men and women in education, health, the economy, and protection under law.

4.107.105 wdi gerp School enrollment, primary (% gross)

Total enrollment in primary education, regardless of age, expressed as a percentage of the population of official primary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

N: 176

Min. Year:1970 Max. Year: 2017 N: 192 n: 6598  $\overline{N}$ : 137  $\overline{T}$ : 34

# 4.107.106 wdi gerpf School enrollment, primary, female (% gross)

Total female enrollment in primary education, regardless of age, expressed as a percentage of the total female population of official primary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Nin. Year:2012 Max. Year: 2016 N: 176

Min. Year:1970 Max. Year: 2017 N: 192 n: 6268  $\overline{N}$ : 131  $\overline{T}$ : 33

### 4.107.107 wdi gerpm School enrollment, primary, male (% gross)

Total male enrollment in primary education, regardless of age, expressed as a percentage of the total male population of official primary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

### 4.107.108 wdi gerpp School enrollment, preprimary (% gross)

Total enrollment in pre-primary education, regardless of age, expressed as a percentage of the total population of official pre-primary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

### 4.107.109 wdi gerppf School enrollment, preprimary, female (% gross)

Total female enrollment in pre-primary education, regardless of age, expressed as a percentage of the total female population of official pre-primary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Min. Year:2012 Max. Year: 2016 N: 162

### 4.107.110 wdi gerppm School enrollment, preprimary, male (% gross)

Total male enrollment in pre-primary education, regardless of age, expressed as a percentage of the total male population of official pre-primary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Min. Year:1970 Max. Year: 2017 N: 188 n: 4320  $\overline{N}$ : 90  $\overline{T}$ : 23

### 4.107.111 wdi gers School enrollment, secondary (% gross)

Total enrollment in secondary education, regardless of age, expressed as a percentage of the population of official secondary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Min. Year:1970 Max. Year: 2017 N: 192 n: 5623  $\overline{N}$ : 117  $\overline{T}$ : 29

### 4.107.112 wdi\_gersf School enrollment, secondary, female (% gross)

Total female enrollment in secondary education, regardless of age, expressed as a percentage of the female population of official secondary education age. GER can exceed 100% due to the inclusion of

over-aged and under-aged students because of early or late school entrance and grade repetition.

4.107.113 wdi gersm School enrollment, secondary, male (% gross)

Total male enrollment in secondary education, regardless of age, expressed as a percentage of the male population of official secondary education age. GER can exceed 100% due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Min. Year:1970 Max. Year: 2017 N: 191 n: 5089  $\overline{N}$ : 106  $\overline{T}$ : 27

### 4.107.114 wdi gert School enrollment, tertiary (% gross)

Total enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total population of the five-year age group following on from secondary school leaving.

Min. Year:1970 Max. Year: 2017 N: 186 n: 4968  $\overline{N}$ : 104  $\overline{T}$ : 27

### 4.107.115 wdi gertf School enrollment, tertiary, female (% gross)

Total female enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total female population of the five-year age group following on from secondary school leaving.

N: 147

Min. Year:1970 Max. Year: 2017 N: 184 n: 4220  $\overline{N}$ : 88  $\overline{T}$ : 23

### 4.107.116 wdi\_gertm School enrollment, tertiary, male (% gross)

Total male enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total male population of the five-year age group following on from secondary school leaving.

### 4.107.117 wdi gini GINI index (World Bank estimate)

Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

### 4.107.118 wdi gniatlcur GNI, Atlas method (current US dollar)

GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

#### 4.107.119 wdi gnicapatlcur GNI per capita, Atlas method (current US dollar)

GNI per capita (formerly GNP per capita) is the gross national income, converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population. GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

4.107.120 wdi gnicapcon2010 GNI per capita (constant 2010 US dollar)

GNI per capita is gross national income divided by midyear population. GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in constant 2010 U.S. dollars.

Min. Year:2012 Max. Year: 2015 N: 153

Min. Year:1960 Max. Year: 2017 N: 188 n: 4974  $\overline{N}$ : 86  $\overline{T}$ : 26

### 4.107.121 wdi gnicapgr GNI per capita growth (annual %)

Annual percentage growth rate of GNI per capita based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GNI per capita is gross national income divided by midyear population. GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad.

# 4.107.122 wdi\_gnicappppcon2011 GNI per capita, PPP (constant 2011 international dollar)

GNI per capita based on purchasing power parity (PPP). PPP GNI is gross national income (GNI) converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GNI as a U.S. dollar has in the United States. GNI is the sum

of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in constant 2011 international dollars.

Min. Year:2012 Max. Year: 2015 N: 154

Min. Year:1961 Max. Year: 2017 N: 164 n: 5072  $\overline{N}$ : 89  $\overline{T}$ : 31

### 4.107.127 wdi gnipppcon2011 GNI, PPP (constant 2011 international dollar)

PPP GNI (formerly PPP GNP) is gross national income (GNI) converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GNI as a U.S. dollar has in the United States. Gross national income is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in constant 2011 international dollars.

Min. Year:2012 Max. Year: 2015 N: 154

Min. Year:1990 Max. Year: 2017 N: 186 n: 3520  $\overline{N}$ : 126  $\overline{T}$ : 19

# 4.107.128 wdi\_gnipppcur GNI, PPP (current international dollar)

PPP GNI (formerly PPP GNP) is gross national income (GNI) converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GNI as a U.S. dollar has in the United States. Gross national income is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current international dollars. For most economies PPP figures are extrapolated from the 2011 International Comparison Program (ICP) benchmark estimates or imputed using a statistical model based on the 2011 ICP. For 47 high- and upper middle-income economies conversion factors are provided by Eurostat and the Organisation for Economic Co-operation and Development (OECD).

#### 4.107.129 wdi homicides Intentional homicides (per 100,000 people)

Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

#### 4.107.130 wdi homicides Intentional homicides, female (per 100,000 female)

Intentional homicides, female (per 100,000 female). Intentional homicides, female are estimates of unlawful female homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

#### 4.107.131 wdi homicidesm Intentional homicides, male (per 100,000 male)

Intentional homicides, male (per 100,000 male). Intentional homicides, male are estimates of unlawful male homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

4.107.132 wdi hwf People with basic handwashing facilities (% of populartion)

People with basic handwashing facilities including soap and water (% of populartion). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

### 4.107.133 wdi\_hwfr People with basic handwashing facilities, rural (% of rural population)

People with basic handwashing facilities including soap and water, rural (% of rural population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

4.107.134 wdi\_hwfu People with basic handwashing facilities, urban (% of urban population)

People with basic handwashing facilities including soap and water, urban (% of urban population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

### 4.107.135 wdi\_idpdis Internally displaced persons, new displacement-disasters (number)

Internally displaced persons, new displacement associated with disasters (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internaldisplacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

### 4.107.136 wdi\_idpvc Internally displaced persons, new displacement-conflict & violence (number)

Internally displaced persons, new displacement associated with conflict and violence (number of cases). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

### 4.107.137 wdi\_idpvp Internally displaced persons, total displaced by conflict-violence (number)

Internally displaced persons, new displacement associated with conflict and violence (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups

of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. ŞPeople displacedŤ refers to the number of people living in displacement as of the end of each year.

### 4.107.138 wdi imig International migrant stock (% of population)

International migrant stock is the number of people born in a country other than that in which they live. It also includes refugees. The data used to estimate the international migrant stock at a particular time are obtained mainly from population censuses. The estimates are derived from the data on foreign-born population-people who have residence in one country but were born in another country. When data on the foreign-born population are not available, data on foreign populationthat is, people who are citizens of a country other than the country in which they reside-are used as estimates. After the breakup of the Soviet Union in 1991 people living in one of the newly independent countries who were born in another were classified as international migrants. Estimates of migrant stock in the newly independent states from 1990 on are based on the 1989 census of the Soviet Union. For countries with information on the international migrant stock for at least two points in time, interpolation or extrapolation was used to estimate the international migrant stock on July 1 of the reference years. For countries with only one observation, estimates for the reference years were derived using rates of change in the migrant stock in the years preceding or following the single observation available. A model was used to estimate migrants for countries that had no data.

Min. Year:2000 Max. Year: 2015 N: 190 n: 2958  $\overline{N}$ : 185  $\overline{T}$ : 16
#### wdi peacekeep Presence of peace keepers (N. troops, police & military in 4.107.210mandate)

Presence of peacebuilders and peacekeepers are active in peacebuilding and peacekeeping. Peacebuilding reduces the risk of lapsing or relapsing into conflict by strengthening national capacities at all levels of for conflict management, and to lay the foundation for sustainable peace and development. Peacekeepers provide essential security to preserve the peace, however fragile, where fighting has been halted, and to assist in implementing agreements achieved by the peacemakers. Peacekeepers deploy to war-torn regions where no one else is willing or able to go and prevent conflict from returning or escalating. Peacekeepers include police, troops, and military observers.

#### wdi piesr CPIA policy and institutions for environmental sustain. rating 4.107.211(1 to 6=high)

Policy and institutions for environmental sustainability assess the extent to which environmental policies foster the protection and sustainable use of natural resources and the management of pollution.

# **N**: 86 **n**: 986 $\overline{N}$ : 76 $\overline{T}$ : 11

#### 4.107.212 wdi pop Population, total

N: 81

Total population is based on the defacto definition of population, which counts all residents regardless of legal status or citizenship. The values shown are midyear estimates.

Min. Year:2015 Max. Year: 2015 N: 191

Min. Year: 1960 Max. Year: 2017 **N**: 199 **n**: 9441  $\overline{N}$ : 163  $\overline{T}$ : 47

#### 4.107.213wdi pop14 Population ages 0-14 (% of total)

Total population between the ages 0 to 14 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

# 4.107.214 wdi pop1564 Population ages 15-64 (% of total)

Total population between the ages 15 to 64 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Min. Year:2015 Max. Year: 2015 N: 181

**Min. Year**:1960 **Max. Year**: 2017 **N**: 189 **n**: 8996  $\overline{N}$ : 155  $\overline{T}$ : 48

### 4.107.215 wdi pop65 Population ages 65 and above (% of total)

Population ages 65 and above as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

**Min. Year**:1960 Max. Year: 2017 N: 189 n: 8996  $\overline{N}$ : 155  $\overline{T}$ : 48

# 4.107.216 wdi\_popbelow Population living in areas where elevation below 5 mts (% of total pop.)

Population below 5m is the percentage of the total population living in areas where the elevation is 5 meters or less.

#### 4.107.217 wdi popden Population density (people per sq. km of land area)

Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship–except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

# 4.107.218 wdi popf Population, female (% of total)

Female population is the percentage of the population that is female. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Min. Year:1960 Max. Year: 2017 N: 189 n: 8996  $\overline{N}$ : 155  $\overline{T}$ : 48

# 4.107.219 wdi popgr Population growth (annual %)

Annual population growth rate for year t is the exponential rate of growth of midyear population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Min. Year:2015 Max. Year: 2015 N: 191

Min. Year:1960 Max. Year: 2017 N: 199 n: 9438  $\overline{N}$ : 163  $\overline{T}$ : 47

#### 4.107.220 wdi poprul Rural population (% of total population)

Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

#### 4.107.221 wdi poprulgr Rural population growth (annual %)

Rural population growth. Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Urban population refers to people living in urban areas as defined by national statistical offices. The data are collected and smoothed by United Nations Population Division.

Min. Year:1960 Max. Year: 2017 N: 199 n: 9450  $\overline{N}$ : 163  $\overline{T}$ : 47

### 4.107.223 wdi popurbagr Urban population growth (annual %)

Urban population growth. Urban population refers to people living in urban areas as defined by national statistical offices. It is calculated using World Bank population estimates and urban ratios from the United Nations World Urbanization Prospects.

Min. Year:1960 Max. Year: 2017 N: 199 n: 9446  $\overline{N}$ : 163  $\overline{T}$ : 47

# 4.107.224 wdi\_povgap190 Poverty gap at dollar1.90 a day (2011 PPP) (%)

Poverty gap at 1.90 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 1.90 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. As a result of revisions in PPP exchange rates, poverty rates for individual countries cannot be compared with poverty rates reported in earlier editions. Note: five countries – Bangladesh, Cabo Verde, Cambodia, Jordan, and Lao PDR – use the 2005 PPP conversion factors and corresponding 1.25 dollars a day and 2 dollars a day poverty lines. This is due to the large deviations in the rate of change in PPP factors relative to the rate of change in domestic consumer price indexes. See Box 1.1 in the Global Monitoring Report 2015/2016 (http://www.worldbank.org/en/publication/global-monitoring-report) for a detailed explanation.

Min. Year:1977 Max. Year: 2017 N: 158 n: 1379  $\overline{N}$ : 34  $\overline{T}$ : 9

# 4.107.225 wdi povgap320 Poverty gap at dollar3.20 a day (2011 PPP) (%)

Poverty gap at 3.20 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 3.20 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence (% of population).

# 4.107.226 wdi\_povgaphc Urban poverty headcount ratio at national poverty lines (% of urban pop.)

Urban poverty headcount ratio is the percentage of the urban population living below the national poverty lines.

### 4.107.227 wdi\_povgapnpl Poverty gap at national poverty lines (%)

Poverty gap at national poverty lines is the mean shortfall from the poverty lines (counting the nonpoor as having zero shortfall) as a percentage of the poverty lines. This measure reflects the depth of poverty as well as its incidence.

#### 4.107.228 wdi povgaprur Rural poverty gap at national poverty lines (%)

Rural poverty gap at national poverty lines is the rural population's mean shortfall from the poverty lines (counting the nonpoor as having zero shortfall) as a percentage of the poverty lines. This measure reflects the depth of poverty as well as its incidence.

4.107.229 wdi povgapurb Urban poverty gap at national poverty lines (%)

Urban poverty gap at national poverty lines is the urban population's mean shortfall from the poverty lines (counting the nonpoor as having zero shortfall) as a percentage of the poverty lines. This measure reflects the depth of poverty as well as its incidence.

# 4.107.230 wdi\_povhrrur Rural poverty headcount ratio at national poverty lines (% of rural pop.)

Rural poverty headcount ratio is the percentage of the rural population living below the national poverty lines.

### 4.107.231 wdi powcon Electric power consumption (kWh per capita)

Electric power consumption measures the production of power plants and combined heat and power plants less transmission, distribution, and transformation losses and own use by heat and power plants.

# 4.107.232 wdi\_precip Average precipitation in depth (mm per year)

Average precipitation is the long-term average in depth (over space and time) of annual precipitation in the country. Precipitation is defined as any kind of water that falls from clouds as a liquid or a solid.

# 4.107.233 wdi\_prrbgr CPIA property rights and rule-based governance rating (1=low to 6=high)

Property rights and rule-based governance assess the extent to which private economic activity is facilitated by an effective legal system and rule-based governance structure in which property and contract rights are reliably respected and enforced.

Min. Year:2013 Max. Year: 2017 N: 81

Min. Year:2005 Max. Year: 2017 N: 86 n: 986  $\overline{N}$ : 76  $\overline{T}$ : 11

### 4.107.234 wdi\_psm CPIA public sector management and institution cluster average (1=low to 6=high)

The public sector management and institutions cluster includes property rights and rule-based governance, quality of budgetary and financial management, efficiency of revenue mobilization, quality of public administration, and transparency, accountability, and corruption in the public sector.

# 4.107.235 wdi pte Part time employment, total (% of total employment)

Part time employment, total (% of total employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Min. Year:2012 Max. Year: 2017 N: 119

Min. Year:1976 Max. Year: 2017 N: 132 n: 1389  $\overline{N}$ : 33  $\overline{T}$ : 11

### 4.107.236 wdi ptef Part time employment, female (% of total female employment)

Part time employment, female (% of total female employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

**N**: 119

Min. Year:1976 Max. Year: 2017 N: 132 n: 1387  $\overline{N}$ : 33  $\overline{T}$ : 11

# 4.107.237 wdi\_ptem Part time employment, male (% of total male employment)

Part time employment, male (% of total male employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

# 4.107.238 wdi qpubadm CPIA quality of public administration rating (1=low to 6=high)

Quality of public administration assesses the extent to which civilian central government staff is structured to design and implement government policy and deliver services effectively.

#### 4.107.239 wdi refasy Refugee population by country or territory of asylum

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers-people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers-are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

4.107.240 wdi refori Refugee population by country or territory of origin

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers-people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers-are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

#### 4.107.241 wdi\_semp Self-employed, total (% of total employment) (modeled ILO estimate)

Self-employed workers are those workers who, working on their own account or with one or a few partners or in cooperative, hold the type of jobs defined as a "self-employment jobs." i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced. Self-employed workers include four sub-categories of employers, own-account workers, members of producers' cooperatives, and contributing family workers. Modeled ILO estimate.

Min. Year:1991 Max. Year: 2017 N: 179 n: 4693  $\overline{N}$ : 174  $\overline{T}$ : 26

# 4.107.242 wdi\_sempf Self-employed, female (% of female employment) (modeled ILO estimate)

Self-employed female workers are those workers who, working on their own account or with one or a few partners or in cooperative, hold the type of jobs defined as a "self-employment jobs." i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced. Self-employed workers include four sub-categories of employers, own-account workers, members of producers' cooperatives, and contributing family workers. Modeled ILO estimate.

# 4.107.243 wdi\_sempm Self-employed, male (% of male employment) (modeled ILO estimate)

Self-employed male workers are those workers who, working on their own account or with one or a few partners or in cooperative, hold the type of jobs defined as a "self-employment jobs." i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced. Self-employed workers include four sub-categories of employers, own-account workers, members of producers' cooperatives, and contributing family workers. Modeled ILO estimate.

Min. Year:1991 Max. Year: 2017 N: 179 n: 4693  $\overline{N}$ : 174  $\overline{T}$ : 26

#### 4.107.244 wdi smokf Smoking prevalence, females (% of adults)

Prevalence of smoking, female is the percentage of women ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Min. Year:2000 Max. Year: 2016 N: 146 n: 1309  $\overline{N}$ : 77  $\overline{T}$ : 9

#### 4.107.245 wdi smokm Smoking prevalence, males (% of adults)

Prevalence of smoking, male is the percentage of men ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Min. Year:2000 Max. Year: 2016 N: 144 n: 1291  $\overline{N}$ : 76  $\overline{T}$ : 9

### 4.107.246 wdi\_smop Smoking prevalence, total (ages 15+)

Smoking prevalence, total, ages 15+. Prevalence of smoking is the percentage of men and women ages 15 and over who currently smoke any tobacco product on a daily or non-daily basis. It excludes smokeless tobacco use. The rates are age-standardized.

**N**: 146

Min. Year:2000 Max. Year: 2016 N: 146 n: 1309  $\overline{N}$ : 77  $\overline{T}$ : 9

### 4.107.247 wdi spr CPIA social protection rating (1=low to 6=high)

Social protection and labor assess government policies in social protection and labor market regulations that reduce the risk of becoming poor, assist those who are poor to better manage further risks, and ensure a minimal level of welfare to all people.

#### 4.107.248 wdi statcap Statistical Capacity score (Overall average)

The Statistical Capacity Indicator provides an overview of the capacity of a country's national statistical system based on a diagnostic framework thereby assessing three dimensions: Methodology, Source Data, and Periodicity and Timeliness.

# 4.107.249 wdi\_statcapmet Methodology assessment of statistical capacity (scale 0 - 100)

The Methodology score measures a country's ability fo adhere to internationally recommended standards and methods.

Min. Year:2015 Max. Year: 2016 N: 147

Min. Year:2004 Max. Year: 2017 N: 148 n: 1973  $\overline{N}$ : 141  $\overline{T}$ : 13

# 4.107.250 wdi\_statcaptime Periodicity and timeliness assessment of statistical capacity (0-100)

The Periodicity score measures the availability and periodicity of key socioeconomic indicators.

Min. Year:2004 Max. Year: 2017 N: 148 n: 1973  $\overline{N}$ : 141  $\overline{T}$ : 13

### 4.107.251 wdi sva2010 Services, value added (constant 2010 US dollar)

Services, value added (constant 2010 US dollar). Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4. Data are in constant 2010 U.S. dollars.

### 4.107.252 wdi svapg Services, value added (annual % growth)

Services, value added (annual % growth). Annual growth rate for value added in services based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Min. Year:2013 Max. Year: 2015 N: 178

**Min. Year**:1961 **Max. Year**: 2017 **N**: 187 **n**: 6217  $\overline{N}$ : 109  $\overline{T}$ : 33

#### 4.107.253 wdi svapgdp Services, value added (% of GDP)

Services, value added (% of GDP). Services correspond to ISIC divisions 50-99 and they include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

# 4.107.254 wdi\_tacpsr CPIA transparency-accountability-corruption in the pub. sector rating (1-6)

Transparency, accountability, and corruption in the public sector assess the extent to which the executive can be held accountable for its use of funds and for the results of its actions by the electorate and by the legislature and judiciary, and the extent to which public employees within the executive are required to account for administrative decisions, use of resources, and results obtained. The three main dimensions assessed here are the accountability of the executive to oversight institutions and of public employees for their performance, access of civil society to information on public affairs, and state capture by narrow vested interests.

### 4.107.255 wdi taxrev Tax revenue (% of GDP)

Tax revenue refers to compulsory transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue.

Note: The value for San Marino for 1995 was extremely high (44326) and has been recoded to missing.

Min. Year:1972 Max. Year: 2017 N: 162 n: 3871  $\overline{N}$ : 84  $\overline{T}$ : 24

#### 4.107.256 wdi tele Fixed telephone subscriptions (per 100 people)

Fixed telephone subscriptions refers to the sum of active number of analogue fixed telephone lines, voice-over-IP (VoIP) subscriptions, fixed wireless local loop (WLL) subscriptions, ISDN voice-channel equivalents and fixed public payphones.

N: 192

# 4.108 Christian Welzel

http://www.leuphana.de/en/university/staff-members/cristian-welzel.html (Welzel, 2013)

(Data downloaded: 2015-04-14)

### Data from Freedom Rising by Christian Welzel

The World Values Survey measures of secular values and emancipative values are theoretically explained and empirically tested for their cross-cultural reliability and validity in Freedom Rising , pp. 57-105. The backward estimates of emancipative values for decades before available survey data are explained in Freedom Rising, pp. 157-161.

#### 4.108.1 wel aa Associational Activity

Meaning: Formative 7-item index measuring to what extent people are active in all of the associations from type 1 to type 3 (see above). At the country level, the indicator measures the prevalence of such activity in a given society, using the population average.

Source: World Values Surveys, all countries and time points with available data.

Scaling: Variables are rescaled such that non-membership is coded 0, inactive membership coded 0.5 and active membership 1 for each association. Then the average over the associations is calculated. Country-level scores are the average of each national sample from the WVS.

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.108.2 wel aa1 Associational Activity (Type 1)

Meaning: Formative 3-item index measuring to what extent people are active in recreational, humanitarian and environmental associations. At the country level, the indicator measures the prevalence of such activity in a given society, using the population average.

Source: World Values Surveys, all countries and time points with available data.

Scaling: Variables are rescaled such that non-membership is coded 0, inactive membership coded 0.5 and active membership 1 for each association. Then the average over the associations is calculated. Country-level scores are the average of each national sample from the WVS.

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

### 4.108.3 wel aa2 Associational Activity (Type 2)

Meaning: Formative 3-item index measuring to what extent people are active in the church or religious organizations. At the country level, the indicator measures the prevalence of such activity in a given society, using the population average.

Source: World Values Surveys, all countries and time points with available data.

Scaling: Variables are rescaled such that non-membership is coded 0, inactive membership coded 0.5 and active membership 1. Country-level scores are the average of each national sample from the WVS.

# 4.108.4 wel aa3 Associational Activity (Type 3)

Meaning: Formative 3-item index measuring to what extent people are active in political parties, labour unions and professional associations. At the country level, the indicator measures the prevalence of such activity in a given society, using the population average.

Source: World Values Surveys, all countries and time points with available data.

Scaling: Variables are rescaled such that non-membership is coded 0, inactive membership coded 0.5 and active membership 1 for each association. Then the average over the associations is calculated. Country-level scores are the average of each national sample from the WVS.

Min. Year:2012 Max. Year: 2014 N: 30

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

# 4.108.5 wel\_citrig Citizen Rights

Meaning: Conditional index that measures the prevalence of citizen rights as the presence of respect of political participation rights on the condition of the presence of respect of personal autonomy rights, using multiplication to combine the two [CitRig = PAR \* PPR].

Source: Welzel's (2013: 254-263) "citizen rights index," available annually for most countries in the world from 1981 to 2010.

Scaling: Index scores range from 0 for the complete absence of citizen rights in law and practice to 1 for their full presence in law and practice, with proper fractions for intermediate positions.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Note: the missing code (-99) has been recoded to missing (.).

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A

#### 4.108.6 wel cm Cognitive Mobilization

Meaning: Formative multi-item index measuring the extent of people's cognitive mobilization over the domains of informational connectedness, perceived stimulation and emancipative values [(InfCon + PerSti + EVI) / 3 calculated at the individual level and then aggregated to the country level]. Source: Index invented by Welzel, based on data from the World Values Surveys, all countries from rounds five and six.

Scaling: Multi-point index with original scores on each of the multiple items rescaled from minimum 0 to maximum 1, with proper fractions for intermediate positions, and then averaged over the three measures. Components load on the same dimension at the individual level, with pretty similar loadings, and their combination produces a highly reliable overall index (alpha above .80). Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

### 4.108.7 wel\_coc Control of Corruption

Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of corruption control in a country.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed corruption control) to maximum 1.0 (for the highest ever observed corruption control), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Min. Year:2012 Max. Year: 2012 N: 186

Min. Year:1996 Max. Year: 2012 N: 189 n: 2545  $\overline{N}$ : 150  $\overline{T}$ : 13

#### 4.108.8 wel culture Culture Zone

Meaning: Culture zone scheme, attributing each country to one of ten distinct culture zones created on the basis of religious traditions, imperial/colonial legacies and ethno-linguistic composition. Source: Classification invented and developed in Welzel, Freedom Rising (2013: 23-34), www.cambridge.org/welzel (Online Appendix, p. 8-11).

Coding:

1. "Reformed West" (Western European societies strongly affected by the Reformation)

2. "New West" (overseas offshoots of Western Europe)

3. "Old West" (mostly Catholic parts of Western Europe being core parts of the Roman Empire)

4. "Returned West" (Catholic and Protestant parts of post-communist Europe returning to the EU)

5. "Orthodox East" (Christian Orthodox or Islamic parts of the post-communist world, mostly parts of former USSR)

6. "Indic East" (parts of South and South East Asia under the historic influence of Indian culture)

7. "Islamic East" (regions of the Islamic world that have been parts of the Arab/Caliphate, Persian and Ottoman empires)

8. "Sinic East" (parts of East Asia under the historic influence of Chinese culture)

9. "Latin America" (Central and South America and the Caribbean)

10. "Sub-Saharan Africa" (African countries South of the Sahara).

Remarks: A cluster analysis asking to place countries into ten different clusters on the basis of religious traditions, imperial legacies and ethno-linguistic composition variables produces a ninety percent overlapping classification of countries.

Min. Year:2012 Max. Year: 2014 N: 32

Min. Year:1981 Max. Year: 2014 N: 104 n: 286  $\overline{N}$ : 8  $\overline{T}$ : 3

# 4.108.9 wel cwi Cool Water Index

Meaning: The indicator measures the prevalence of relatively cool temperatures in each season combined with abundant fresh water resources throughout the year, on a country's historically most populated areas.

Source: Index construction based on geo-climate data from the Harvard Geography Project, as documented in the appendix to Welzel's (2013) Freedom Rising, online at www.cambirdge.org/welzel, pp. 105-112.

Scaling: Scores range from 0 for the hottest and driest countries to 1 for countries combining highly consistent precipitation with cold temperatures.

### 4.108.10 wel demenl Enlightened Understanding of Democracy

Meaning: 6-item index measuring the extent to which people's understanding of democracy is enlightened in the sense that they define democracy "correctly" by its liberal core and at the same time explicitly reject non-liberal alternative notions.

Source: Index invented and documented in Welzel, Freedom Rising (2013: 79; 310-315), www.cambridge.org/welzel (Online Appendix, p. 100), based on data from the World Values Surveys, countries from rounds five and six.

Scaling: Multi-point index from minimum 0 when all three liberal notions of democracy are fully rejected and all three non-liberal notion fully accepted, to maximum 1.0, when the exact opposite is the case, with proper fractions for intermediate positions. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

Min. Year:2012 Max. Year: 2014 N: 31

Variable not included in Time-Series Data

 $\mathbf{N}:$  N/A Min. Year: N/A Max. Year: N/A $\overline{N}:$  N/A  $\overline{T}:$  N/A

### 4.108.11 wel demlib Liberal Understanding of Democracy

Meaning: 3-item index measuring the extent to which people's understanding of democracy is liberal in the sense that they define democracy "correctly" by its liberal, including free elections, civil liberties and equal rights.

Source: Index invented and documented in Welzel, Freedom Rising (2013: 79; 310-315), www.cambridge.org/welzel (Online Appendix, p. 100), based on data from the World Values Surveys, countries from rounds five and six.

Scaling: Multi-point index from minimum 0 when all three liberal notions of democracy are fully rejected, to maximum 1.0, when the exact opposite is the case, with proper fractions for intermediate positions. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

Min. Year:2012 Max. Year: 2014 N: 32

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

### 4.108.12 wel\_demnlib Non-Liberal Understanding of Democracy

Meaning: 3-item index measuring the extent to which people's understanding of democracy is nonliberal in the sense that they define democracy "incorrectly" by non-liberal attributes, including religious authority over the laws, military authority over government and unemployment benefits. Source: Index invented and documented in Welzel, Freedom Rising (2013: 79; 310-315), www.cambridge.org/welzel (Online Appendix, p. 100), based on data from the World Values Surveys, countries from rounds five and six.

Scaling: Multi-point index from minimum 0 when all three non-liberal notions of democracy are fully rejected, to maximum 1.0, when the exact opposite is the case, with proper fractions for intermediate positions. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

Min. Year:2012 Max. Year: 2014 N: 31

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.108.13 wel\_dr Democratic Rights

Meaning: 14-point index measuring the prevalence of democratic rights based on Freedom House's "civil liberties" and "political rights" ratings.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: The two Freedom House scales are inverted, averaged and standardized into a range from minimum 0 (no democratic rights) to 100 (maximum democratic rights), with percentages of the maximum rights for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

# 4.108.14 wel\_edi Effective Democracy Index

Meaning: Conditional multi-point index measuring the extent of effective democracy, understood as the presence of democratic rights on the condition that honest governance puts them into real practice [EDI = DemRig \* HonGov].

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: Scores are weighted percentages ranging from a theoretical minimum of 0 for the least effective or absent democracy to 100 for the most effective democracy. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

#### 4.108.15 wel evau Emancipative Values: Autonomy Component

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of personal autonomy (independence, imagination and non-obedience as desired child qualities). Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Four-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

### 4.108.16 wel\_evch Emancipative Values: Choice Component

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of reproductive choices (acceptance of divorce, abortion, homosexuality). Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points. Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

#### 4.108.17 wel eveq Emancipative Values: Equality Component

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of gender equality (support of women's equal access to education, jobs and power).

Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

### 4.108.18 wel evi Emancipative Values Index

Meaning: "Protective-vs.-Emancipative Values" - 12-item index measuring a national culture's emphasis on universal freedoms in the domains of (1) reproductive choice (acceptance of divorce, abortion, homosexuality), (2) gender equality (support of women's equal access to education, jobs and power), (3) people's voice (priorities for freedom of speech and people's say in national, local and job affairs), and (4) personal autonomy (independence, imagination and non-obedience as desired child qualities). Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Continuous scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 12 items, to a maximum of 1.0 when the most emancipative position is taken on all 12 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: The EVI is a conceptual refinement of Inglehart and Welzel's (2005) "Survival-vs.-Selfexpression Values." Individual-level scores are normally distributed around the mean in each national sample. In the context of Freedom Rising's human empowerment framework, emancipative values are interpreted as motivational empowerment.

4.108.19 wel evvo Emancipative Values: Voice Component

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of people's voice (priorities for freedom of speech and people's say in national and local affairs). Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: This index partly overlaps with Inglehart's (1977; 1997) measure of postmaterialist values.

### 4.108.20 wel\_ic Informational Connectedness

Meaning: 8-item index measuring the diversity of information sources used by the average individual in a nation.

Source: Index invented and documented in Welzel, Freedom Rising (2013: 79), www.cambridge.org/welzel (Online Appendix, p. 29-30), based on data from the World Values Surveys, countries from rounds five and six.

Scaling: Multi-point index, ranging from a theoretical minimum of 0, when not a single one of the eight information sources has been used "last week," to a maximum of 1.0, when all eight sources were used. Intermediate positions are measured in fractions of 1. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample. In Freedom Rising's (2013) human empowerment framework, informational connectedness is interpreted as connective empowerment.

Min. Year:2012 Max. Year: 2014 N: 32

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.108.21 wel ie Individual Empowerment

Meaning: Formative multi-item index measuring the extent to which the people in a society are mentally and habitually empowered to make their own choices and to pursue them in their actions. The index covers the domains of motivational empowerment (emancipative values), connective empowerment (informational connectedness), perceptive empowerment (perceived stimulation), intellectual empowerment (formal education) and behavioural empowerment (social movement activity) [(EVI + InfCon + PerSti + ForEdu + SMA) / 5 calculated at the individual level and then aggregated to the country level].

Source: Index invented by Welzel, based on data from the World Values Surveys, all countries from rounds five and six.

Scaling: Multi-point index with original scores on each of the multiple items rescaled from minimum 0 to maximum 1, with proper fractions for intermediate positions, and then averaged over all the measures. Components load on the same dimension at the individual level, with pretty similar load-ings, and their combination produces a highly reliable overall index (alpha above .80). Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

N: 31

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}:$  N/A  $\overline{T}:$  N/A

#### 4.108.22 wel mob Mobilization Potential for Democratizing Pressures

Meaning: Index measures the extent to which people's enlightened democratic desires exceed exceed the perceived democraticness of their country, assuming that this gap between desired and perceived democraticness creates mass mobilization potential for democratic reform movements. The potential is the 0-to-1 standardized residuals obtained from regressing EnlDes on PerDem at the individual level and aggregating these scores to the country level by using the mean.

Source: Welzel, based on data from the World Values Surveys, all countries from rounds five and six. Scaling: Multi-point index ranging from minimum 0, when a respondent's enlightened democratic desire is much lower than what her democracy assessment predicts, to maximum 1.0, when the enlightened democratic desire is much higher than what the democracy assessment predicts. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

Min. Year:2012 Max. Year: 2014 N: 29

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

### 4.108.23 wel\_par Personal Autonomy Rights

Meaning: The indicator measures to what extent a country enacts personal autonomy rights by law and respects them in practice.

Source: Welzel's (2013: 254-263) "personal autonomy rights index" based on Freedom House's "civil liberties" as well as Cingranelli/Richards' "integrity rights." Freedom House civil liberties are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI integrity rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure personal autonomy rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.

Scaling: Index scores range from 0 for the completely absent or disrespected personal autonomy rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Note: the missing code (-99) has been recoded to missing (.).

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.108.24wel ppr Political Participation Rights

Meaning: The indicator measures to what extent a country enacts political participation rights by law and respects them in practice.

Source: Welzel's (2013: 254-263) "political participation rights index" based on Freedom House's "political rights" as well as Cingranelli/Richards' "empowerment rights." Freedom House political rights are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI empowerment rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure political participation rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.

Scaling: Index scores range from 0 for completely absent or disrespected political participation rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Note: the missing code (-99) has been recoded to missing (.).

#### 4.108.25wel ps Perceived Stimulation

Meaning: 3-item index measuring the extent of people's perceived cognitive stimulation based on whether they perceive their daily tasks as mostly "routine versus creative," mostly "manual versus intellectual" and as mostly "remote controlled versus supervised," with the latter option in each of these three (1 to 10 scaled) polarities indicating stronger perceived stimulation.

Source: Welzel, based on data from the World Values Surveys, all countries from rounds five and six. Scaling: Multi-point index with original scores on each of the three items rescaled from minimum 0 to maximum 1, with proper fractions for intermediate positions, and then averaged over the three measures. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample. In Welzel's human empowerment framework, perceived stimulation is interpreted as perceptive empowerment.

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

# 4.108.26 wel\_regtype Regime Type

Meaning: Regime types measure the 4-fold combination of personal autonomy rights and political participation rights, resulting in four combinations.

Source: Welzel, Freedom Rising (2013: 257-258). Typology is available in annual measures for most countries of the world from 1981 to 2010.

Scaling: 1 "Pure Autocracy": both personal autonomy rights and political participation rights below the scale midpoint (0.50); 2 "Inclusive Autocracy": personal autonomy rights below the scale midpoint, political participation rights above the scale midpoint; 3 "Liberal Autocracy": personal autonomy rights above the scale midpoint, political participation rights below; 4 "Minimal Democracy": both personal autonomy rights and political participation rights above the scale midpoint.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Min. Year:2012 Max. Year: 2012 N: 188

Min. Year:1981 Max. Year: 2010 N: 192 n: 4534  $\overline{N}$ : 151  $\overline{T}$ : 24

Min. Year:1996 Max. Year: 2012 N: 189 n: 2557  $\overline{N}$ : 150  $\overline{T}$ : 14

#### 4.108.28 wel rol Rule of Law

Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of law enforcement in a country.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed rule of law score) to maximum 1.0 (for the highest ever observed rule of law score), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

#### 4.108.29 wel scalezone Scalezone on Citizen Rights

Meaning: Categorical scale zones on the citizen rights index, distinguishing four categories from more completely to less completely autocratic, and then from less completely to more completely democratic.

Source: Welzel, Freedom Rising (2013: 255-256). Categorization is available in annual measures for most countries of the world from 1981 to 2010.

Scaling: 1 "Complete Autocracy": citizen rights score less equal 0.25; 2 "Incomplete Autocracy": citizen rights score above 0.25 and less equal 0.50; 3 "Incomplete Democracy": citizen rights score above 0.50 and less equal 0.75; 4 "Complete Democracy": citizen rights score above 0.75.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Min. Year:1981 Max. Year: 2010 N: 192 n: 4534  $\overline{N}$ : 151  $\overline{T}$ : 24

4.108.30

wel sma Social Movement Activity

N: N/A Min. Year: N/A Max. Year: N/A

Meaning: 3-item index measuring to what extent three types of peaceful social movement activities (petitions, demonstrations, boycotts) are part of a national culture's action repertoire.

Source: Index invented and documented in Welzel, Freedom Rising (2013: 222-225), www.cambridge.org/welzel (Online Appendix, p. 66-70), based on data from the World Values Surveys.

Scaling: Multi-point index from a theoretical minimum 0 when none of the three activities is part of the action repertoire to 1.0 when all three of them are. On each activity, non-execution is coded 0, anticipated execution .33 and actual execution 1. Then for each individual the average over the three activities is calculated. Country scores are population averages (arithmetic mean) on the 0-1 index. Remarks: Individual-level scores are normally distributed around the mean in each national sample. In the context of Freedom Rising's human empowerment framework, social movement activity is interpreted as behavioural empowerment.

Min. Year:2012 Max. Year: 2014 N: 31

Min. Year:1981 Max. Year: 2014 N: 100 n: 272  $\overline{N}$ : 8  $\overline{T}$ : 3

#### 4.108.31 wel svde Secular Values: Defiance Component

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of patrimonial authority (the nation, the state, the parents).

Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

#### 4.108.32 wel svdi Secular Values: Disbelief Component

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of religious authority (faith, commitment, practice).

Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Min. Year:1981 Max. Year: 2014 N: 103 n: 280  $\overline{N}$ : 8  $\overline{T}$ : 3

#### 4.108.33 wel svi Secular Values Index

Meaning: "Sacred-vs.-Secular Values" - 12-item index measuring a national culture's secular distance to "sacred" sources of authority, including (1) religious authority (faith, commitment, practice), (2) patrimonial authority (the nation, the state, the parents), (3) order institutions (army, police, courts), and (4) normative authority (anti-bribery, anti-cheating and anti-evasion norms).

Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Continuous scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 12 items, to a maximum of 1.0 when the most secular position is taken on all 12 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: The SVI is a conceptual refinement of Inglehart and Welzel's (2005) "Traditional-vs.-Secular-rational Values." Individual-level scores are normally distributed around the mean in each national sample.

4.108.34 wel\_svre Secular Values: Relativism Component

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of normative authority (anti-bribery, anti-cheating and anti-evasion norms). Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Note: The value for Slovenia in 2005 is considerably higher than the values for Slovenia in other years.

### 4.108.35 wel svsk Secular Values: Skepticism Component

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of order institutions (army, police, courts).

Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

# 4.108.36 wel\_sys Political System Type

Meaning: 4-fold system typology derived from cross-tabulating democratic rights and honest governance.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is

available in annual measures for most countries of the world from 1996 to 2006.

1. "Unbound Autocracy": both democratic rights and honest governance below their scale midpoints

2. "Bounded Autocracy": democratic rights below, honest governance above the scale midpoint

3. "Ineffective Democracy": democratic rights above, honest governance below the scale midpoint

4. "Effective Democracy": both democratic rights and honest governance above the scale midpoint.

Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Min. Year:1996 Max. Year: 2012 N: 189 n: 2569  $\overline{N}$ : 151  $\overline{T}$ : 14

# 4.108.37 wel\_trgen Generalized Trust

Meaning: Multi-item formative index measuring to what extent trust in others is general, assigning increasing weights to trust's generality from close to unspecified to remote others [(IngTru + 2 \* UnsTru + 3 \* OutTru) / 6 calculated at the individual level and then aggregated to the country level using the population average].

Source: Index invented and documented in Welzel, Freedom Rising (2013: 199-200), www.cambridge.org/welzel (Online Appendix, p. 62-63), based on data from the World Values Surveys, countries from rounds five and six.

Scaling: Multi-point index ranging from 0 when there is no generalized trust to 1.0 for the opposite case, with proper fractions for intermediate positions. Country-level scores are the average of each national sample.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

Min. Year:2012 Max. Year: 2014 N: 32

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

#### 4.108.38 wel trigr In-Group Trust

Meaning: 3-item formative index measuring to what extent people trust others to whom they are acquainted.

Source: Delhey, Newton and Welzel (2011), based on the Welzel-trust items in the World Values Surveys, all countries and time points from rounds 5 and 6.

Scaling: 4-point rating scales recoded from lowest trust (0) to highest trust (1) and averaged over the three items. Country-level scores are the average of each national sample.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

### 4.108.39 wel trogr Out-Group Trust

Meaning: 3-item formative index measuring to what extent people trust others to whom they are not familiar and who are dissimilar on important group-forming criteria, including religion and nationality. Source: Delhey, Newton and Welzel (2011), based on the Welzel-trust items in the World Values Surveys, all countries and time points from rounds 5 and 6.

Scaling: 4-point rating scales recoded from lowest trust (0) to highest trust (1) and averaged over the three items. Country-level scores are the average of each national sample.

Remarks: Individual-level scores are normally distributed around the mean in each national sample.

Min. Year:2012 Max. Year: 2014 N: 32

N: N/A Min. Year: N/A Max. Year: N/A  $\overline{N}$ : N/A  $\overline{T}$ : N/A

### 4.108.40 wel trstd Trust (Standard)

Meaning: Dummy coded standard trust question indicating to what extent people believe that they can trust unspecified other people.

Source: World Values Surveys, all countries and time points from rounds 1 to 6.

Scaling: Dummy index standardized into 0 for non-trust and 1.0 for trust in unspecified others. Country-level scores are the average of each national sample, thus transforming the individual-level dummy codes into a continuous 0-to-1.0 scale.

Min. Year:2012 Max. Year: 2014 N: 32

Min. Year:1981 Max. Year: 2014 N: 104 n: 286  $\overline{N}$ : 8  $\overline{T}$ : 3

#### 4.108.41 wel trunsp Unspecific Trust

Meaning: 3-item formative index measuring to what extent people trust others or believe them to be fair when these others are neither specified as close or remote or in any other way [(PerFai + StaTru) / 2 calculated at the individual level and then aggregated to the country level using the population average].

Source: Index invented and documented in Welzel, Freedom Rising (2013: 199-200), www.cambridge.org/welzel (Online Appendix, p. 62-63), based on data from the World Values Surveys, countries from rounds five and six.

Scaling: Multi-point index ranging from 0 when there is no trust and perceived fairness of unspecified others to 1.0 for the opposite case, with proper fractions for intermediate positions. Country-level scores are the average of each national sample.

Min. Year:2012 Max. Year: 2014 N: 32

### 4.111 UNU-WIDER

https://www.wider.unu.edu/database/world-income-inequality-database-wiid34 (UNU-WIDER, 2018) (Data downloaded: 2019-01-28)

### World Income Inequality Database - WIID4

The UNU-WIDER World Income Inequality Database - widely known by its acronym WIID - has information on income inequality for 182 developed, developing, and transition countries (including historical entities).

Version WIID3.4 is an update of the third major revision of the database, WIID3. The data includes observations for 182 countries with 8,817 observations.

The original data includes several definitions of income inequality. Included in the QoG Data 2019 is the data for the following:

- Quality: High
- Age Coverage: All
- Area Coverage: All
- Population Coverage: All
- Reference Period: Year
- Unit of Analysis: Person
- Income Sharing Unit: Household
- Welfare Definition: Disposable income
- Equivalence Scale: Household Adult Equivalence

For data based on other definitions of income equality, get the original data from the World Income Inequality Database.

### 4.112 Geddes, Wright and Frantz

http://sites.psu.edu/dictators/ (Geddes et al., 2014b) (Data downloaded: 2018-07-20)

### Autocratic Regime Data: All Political Regimes

Data to identify and analyze autocracy-to-autocracy transitions. Version 1.2. When the leader of an autocratic regime loses power, one of three things happens. The incumbent leadership group is replaced by democratically elected leaders. Someone from the incumbent leadership group replaces him, and the regime persists. Or the incumbent leadership group loses control to a different group that replaces it with a new autocracy. Much scholarship exists on the first kind of transition, but little on transitions from one autocracy to another, though they make up about half of all regime changes.

### 4.112.1 wr\_nonautocracy Non-Autocracy

Variable on what substituted the autocracy. Classes are:

### 4.114 The World Bank Group

https://datacatalog.worldbank.org/dataset/worldwide-bureaucracy-indicators (The World Bank, 2018) (Data downloaded: 2018-12-06)

### Worldwide Bureacracy Indicators

The Worldwide Bureaucracy Indicators (WWBI) is a dataset on public sector employment and wages that can help researchers and development practitioners gain a better understanding of the personnel dimensions of state capability, the footprint of the public sector on the overall labor market, and the fiscal implications of the government wage bill. The WWBI aim to fill the gap in information on the personnel of the state by providing more objective measures drawing on administrative data and household surveys, thereby complementing existing, expert perception-based approaches.
